A report has been published by the association, in which it makes a forcible appeal to the sympathies and support of the public. The following extract from this report will give some idea of the condition of the needle women of that city.

"The condition of the shirt sewers of our city is lamentable, and calls for your kindest and warmest sympathies. It is estimated that their numbers at present exceed six thousand Many of these are young and friendless orphans, early left to struggle with poverty, and solely dependent upon the precarious pittance of wages doled out by employers. Others are widows, depending upon the needle for support of helpless children, and with the pittance of some \$2 or \$2,50 per week,trying to feed clothe and pay the rent of a family. We need not tell you this cannot be done. They bear in silence sufferings and trials that would chill the sternest hearts to recount. The defenceless girl often wrestles with poverty, hunger, temptation, until dire necessity forces sad and fearful alternatives upon her.

The Russian peasant, as he is rashly called, says a letter from St. Petersburg, is bought and sold with the land on which he lives, and is a being in no way superior to Monsieur Cuffee, although his skin is white or rather brownish, with beards that were never visited by that companion of civilization, the razor; his person is the impersonation of filth, and his countenance of ignoance. The depressions and poverty of and Tobin have made their escape-now be it these poor creatures is really pitiable, and next to some parts of Ireland, I must give to this class of humanity the unenviable position of the most miserable part of the great family to which we all belong.

Perhaps it is not generally known, but such is the fact, that the seed of the rose, if planted, will produce a flower, in all cases, different from the original.

Botton Mercantile Journal, and we kope if any of our numerous reacers are suffering from any of the complaints which
it is said to cure, they will speeddly avail themselves of it.

DR. WISTAR'S BALSAM OF WILD CHERRY.

It was known many years ago that the wild cherry tree
of this climate possessed valuable medicinal properties.
Indeed this fact was known to the Aborigines, and a decoction of the leaves or bank of this tree has even been regarded by their physicians, as one of the most effectual remedies in many diseases. This fact, several years since, arrested the attention of Dr. Wistar, a highly respectable
practifioner. He investigated with care the healing properities of the wild cherry—tested its effects when admiristered alone, and when in combination with other remediat
agents. He found that its natural virtues might be greatly improved, and by combining it with ingredient, whose
properties were all proved and generally organized, medicine was produced which constitutes a remedy of great
value in pulmonary affections and diseases of the chest and
throat—diseases which are proverbially prevalent in our
cities and large towns, and often prove fatal, swelling the
with most other, we had almost said all other classes of
diseases.
