The Faculties, for intellectual abilitie moral worth and professional acquirements, will compere fav. rable with the most distingvished in our coun ry. The medical faculty constitutes an anomaly in this or any other country—all of them are able lecturers and the best of teachers.

Those who will contemplate our geographical position, and the extent of our population, can have no doubt as to the eligibility of our situation for an enterprise of the kind. As to health, including all seasons of the year, we deny that ANY OTHER COTY HAS MORE.

A common error exists in the minds of many students relative to the place of studying medicine; those who intend practicing among the diseases of West and South should certainly educate themselves at a school whose faculty are practicaly acquainted with those diseases.
