All communications pertaining to this depart-E. W. M. KING, Esq.

MEMPHIS, Tenn., March 1850. The Faculties, for intellectual abilities, moral worth and professional acquirements, will compare lave rable with the most distinguished in our country. The medical faculty constitutes an anomaly in this or any other country-all of them are able lecturers and the best of teachers.

Those who will contemptate our geographical position, and the extent of our population, can have no doubt as to the eligibility of our situation for an enterprise of the kind. As to health, including all seasons of the year, we deny that ANY OTHER CITY HAS MORE.

A common error exists in the minds of many students relative to the place of studying medicine; those who intend practicing among the diseases of the West and South should certainly educate themselves at a school whose faculty are practicaliy acquainted with those diseases.

That the public may be satisfied of the permanency of this school, we feel it our duty to state, that the Trustees and Faculty form a UNIT in action which augurs well for its inture success; and that the peculiar internal organization which connects them, cannot be interrupted.
