Mr. J. B. Campbell introduced a bill to define the line of the Channel of the Ashley River adjacent to the city of Charleston.

He also offered the following resolutions, which were ordered to be printed, and made the special order for to-morrow at 1 o'clock.

Resolved, That the Banking Capital already invested in the chartered Banks of this State, ought not to be diminished, and that existing Bank Charters, where no abuse of their chartered privileges or violation of duty is charged, ought to be renewed; but where there are, or hereafter shall be, two or more Banks in the same town or city, it is good policy that the amount of Capital Stock of each shall be the same.

Resolved, That it is against sound policy to encourage by chartered privileges, or otherwise the aggregation of Capital for the purpose of sending it abroad to be engaged in adventures in no wise connected, except in rivalry with the Agriculture, Commerce, or Manufactures of this State.

Resolved, That the practice of sending abroad a large portion of our Banking Capital periodically, each year, for the purpose of dealing and speculating in bills of Exchange based upon the purchase of produce and Merchandise which never reaches any market in this State, would necessarily cause contractions and expansions in Banking affairs, prejudicial to mercantile enterprises, and to our great agricultural staples, and that such practices ought to be prevented by provisions in all future Bank Charters to be granted or renewed by this General Assembly.

Mr. Mazyck, from the Committee on Finance and Banks, reported a bill to charter the Commercial Bank of Columbia with amendments; also, reported the bill to establish a Bank in the town of Chester, with amendments; also, a bill to establish a Bank in the town of Newberry, with amendments. THE BLUE RIDGE RAILROAD.—This matter, we are glad to state has been brought fairly before the Legislature, and its great importance must commend it to the earnest consideration of that enlightened body. A heavy responsibility rests upon its members, and we cannot doubt that they will avail themselves of this opportunity to connect South Carolina with the rich and fertile valleys of the great West, thereby placing her on an equality, so far as regards interior communication, with those States which have manifested a judicious appreciation of its value and insuring for her own metropolis an advance in the race of population and wealth not to be accomplished by any other means. The amount asked for by the memorialists is small in comparison with the vast sums which have been appropriated to similar purposes by other States, and we earnestly hope that no notions of a false economy will deter the members of the Legislature from promoting this great enterprise by granting such aid as may be found necessary to its completion. It will not do for South Carolina to stand still in an age like this, when the energies of the whole civilized world, and particularly that portion of it which lies contiguous to herself, are directed to the development of resources and the progress of improvement.

The able report, submitted on Tuesday in the Senate by Mr. Crew, sets forth in strong and convincing language, the advantages that must result from the contemplated connection, and we feel it our duty to do what we can in urging upon our fellow citizens to seize the golden opportunity now presented bringing to our doors the untold treasures of the West.

Later from Europe.

ARRIVAL OF THE EUROPA.

BALTIMORE, Dec. 2.—The British Mail steamship Europa, Capt. Ryre, has arrived at New York from Liverpool, which port she left on the 20th of November, with 68 passengers.

THE LIVERPOOL MARKETS.—Cotton was dull and had declined 1 1/2d a 1 1/8d. The sales during the two days comprised 9000 bales, of which speculators took 1000, making a total for the week of 20,000 bales, of which speculators took 6000, and exporters 300 bales.

The quotations were as follows: Fair Orleans 6 1-4d, Middling Orleans 5 3-4d; Fair Mobile 6 1-8d, Middling Mobile 5 3-4d; Fair Uplands 6d, and Middling Uplands 5 5 1/8d.

ENGLAND.—The Chancellor of the Exchequer has given notice of his intention to introduce an amendment fully endorsing Free Trade.

The obsequies of the Duke of Wellington took place on the 18th of November. The ceremonies were conducted with great pomp.

FRANCE.—The Paris Monitor announces that a reduction to the extent of thirty thousand men, will take place in the French Army on the 1st of January next.

THE GRANDSON OF BYRON.—The eldest son of Lord and Lady Lovelace, who was lately advertised in the London Times, as a fugitive, has been recovered by the police. He had gone to Liverpool with the intention of shipping as a cabin boy, to avoid being put on a man-of-war. This youth, who is described as well looking is the grandson of Lord Byron, the eldest son of "Ada, sole daughter of his house and heart." But Lord Lovelace, in a letter, denies the stories in the papers.

During the week ending the 27th of November, the Postmaster General established ten new post-offices, discontinued nine, and changed the names of three. Among the offices discontinued we observe that at Spring Rock, York District, in this State.

THE SEMI-WEEKLY JOURNAL.

TUESDAY EVENING, DECEMBER 7, 1852.

THO. J. WARREN, Editor.

A Gentle Hint.

On the first of January, we design commencing a new system of operations. Our books will be examined, and those who have paid us nothing since 1850, need not be surprised to find their papers stopped, and their accounts placed in proper lands for collection.—This rule will be rigidly observed in regard to those residing out of the State, of many of whom we know nothing. Others personally known to us to be good, we shall exercise our discretion. Some arrangement like this is absolutely necessary, as it is impossible to succeed in any business, particularly like ours, unless we get paid for our labor. Hereafter the CASU must accompany all orders for the paper. It will be found in the end mutually advantageous, and all parties will be greatly benefited.

Our Cotton Market.

Our Cotton Market continues depressed, with a further reduction in prices. We quote extremes at 7 to 8 1/2. Charleston quotations, 8 1/2 to 9 1/2.

Hogs.

A drove of 275 Hogs arrived in this place on Friday last, and left on Sunday for Sumter. They were offered at 6 1/2 cents gross, but only 12 or 14 were sold.

A second drove arrived last evening, which are offered at the same price.

Editorial Correspondence.

COLUMBIA, Dec. 3.

As you will see, from the published proceedings, our Press Convention met on Wednesday last. It will be seen by reference to the minutes, that the Association has adopted as a general rule, that no paper shall be mailed to new subscribers, unless at least six months subscription be paid for in advance; and all papers will be discontinued (due notice having been given to the subscriber,) after the time paid for has expired. We do hope that this rule will be adhered to by every member of the press in our State, whether a member of the Association or not. The mutual interest of both publisher and subscriber will teach this doctrine, for the cash system is the only one by which newspapers can ever live and do well, unless it be such as the Charleston Courier, whose existence is now beyond the meridian; even these papers could not do well, if their patrons did not pay them.

Our brethren in Columbia, aided by some of the citizens, gave us a splendid banquet on Wednesday night last, at which Judge Butler and several other prominent men of our State were present. The members of the Association also enjoyed the hospitality of Dr. R. W. Gibbs, on Thursday night. We were not only handsomely entertained by an abundance of the choicest viands, but literally and emphatically enjoyed—"A feast of reason, and a flow of soul."

Dr. Gibbs is certainly an interesting gentleman with whom to pass an evening. He has a large collection of natural curiosities, with choice paintings, by some of the best artists of our day.

The election of United States Senator has caused a vacancy on the law bench. Several gentlemen have been named, to-wit: Col. T. N. Dawkins, C. P. Sullivan, Esq., Hon. F. I. Moses, Col. Thomas W. Glover—Clerk of the House, and Col. S. Fair. I am not certain that all of the gentlemen above named will be Candidates, indeed, with regard to Col. Fair it is very questionable. The impression is quite strong that Col. Glover will be elected, and if we may judge a little too, from the manner in which things are managed, his chance is almost certain. I learn that there are lots of candidates for the office of Clerk in the event of Col. Glover's election. This fact of itself will aid in the election of that gentleman, who, apart from such considerations, is considered eminently qualified from his great business habits, and intelligence, for the distinguished position.

The re-districting of the State has been a subject of no little debate outside, as well as in the Legislative Halls. The final plan you will find published, which please give our readers.

On Wednesday night I wrote, giving the result of the fourth and last ballot for Senator, but from some cause or other I perceive it is not published in my letter. The run which Col. Chesnut made, we regard highly complimentary to him; under the circumstances it could hardly have been expected, for he is one of the youngest of our leading men in the State, and in time, we have no doubt, will occupy the highest office in its gift.

In connection with my remarks about the Press Convention, I ought to have stated, that I am highly pleased with my brethren generally, and if our meeting shall do nothing more, it will at least effect good by bringing the fraternity together, face to face, and cultivating those social and friendly relations which can only be accomplished through this instrumentality. Our meeting has been a most pleasant and harmonious one. The fact is, I believe the Press in our State will compare with that of any other in the Union. A more social and gentlemanly set of men you can rarely meet with.

SATURDAY, Dec. 4.

In the Legislature there is but little of special interest. A bill has been introduced "For the establishment of a general system of registration of Births, Marriages and Deaths in this State." The Committee on the Military to whom was referred "A bill to alter the ninety seventh section of the Militia Law of this State, so as to authorize Colonels of Regiments to appoint their own Collectors of fines," recommend that the bill do not pass.

We understand that the probability is that Col. Moses, of Sumter, and Hon. Joseph A. Black, of Richland, will be Candidates for Congress in Mr. Woodward's place.

The College Commencement takes place on Monday next. The Hotels are already crowded, and where the people are to find quarters remains to be seen.

An alarm of fire was given to-night about half-past Eight o'clock, but as the bells have ceased ringing, and the noise is nearly hushed, we suppose it is out.

Accidents on the Rail Road.

On Friday morning last, as we learn from the Charleston papers, the Express Train from Augusta, and a Freight Train came in collision near the fourteen mile post. The Fireman of the freight train was thrown between the tender and the boiler, and instantly killed. No other personal injury was sustained, the other Firemen and Engineers having jumped off, and the passengers on the Express Train were uninjured.

We understand that the detention of the Cars, on Sunday evening was caused by the breaking down of a freight train on the Charleston road. The extent of the damage we have not learned.

The Lancaster Ledger.

If Mr. Bailey is satisfied with the reply which he has made to our notice of his remarks concerning Camden and its prosperity, we ought to be; we are quite indifferent to his opinion either one way or the other. The fact that he does not read our articles, or lay them to heart, will not cause us many anxious moments.—He might, however, in his anxiety "to see Camden a town growing in wealth and prosperity" state, that real estate in the upper part of the town sells readily at a fair valuation, and not take extreme cases, where local causes have the effect of depreciating the price of property. The lines which concludes his tirade are not as appropriate as he imagines them to be; "babbling" is a bad word for him to use in reference to any one else. We suppose he is aware that it means an idle talker, and when applied editorially, worse than this—an idle writer. We are not willing that the Ledger should decide who is the babbling, but will leave the public to determine the question between us.

U. S. Senator.

THE HON. JOSIAH J. EVANS was elected U. S. Senator for six years from the fourth of March next. The vote stood, for J. J. Evans 86, James Chesnut, jr. 59, R. F. W. Allston 2, C. G. Memminger 3, Z. P. Herndon 1, Blank 1.

INDIANA U. S. SENATOR.—The Governor of Indiana has appointed Hon. Charles W. Cathcart as Senator in Congress, to fill the vacancy caused by the death of Senator Whitcomb.

Speaking of the recent fatal accident that occurred on the Camden Branch of the South Carolina Rail Road, the Darlington Flag says that the Conductor, Mr. Scanlin, received severe internal injuries, but refused assistance from those proffering it, telling them to let him alone and attend to the passengers. Mr. Sloan, an officer on the cars, was severely injured. So soon as he recovered from the stunning effects of the fall, with his face all bleeding, returned manfully to his duty; and his assistance was of great benefit to the wounded, and afterwards to the passengers. Several other persons connected with the Rail Road, rendered material assistance to the sufferers.

A gentleman, by the name of Fallen, was observed, with great presence of mind, immediately after the accident occurred, giving all necessary directions for receiving the dead and wounded from the wreck of the broken cars, and nobly working himself for the preservation of the lives and property of others.

A most thrilling scene occurred immediately after the breakdown; a child's voice was heard falling from the bottom of the cars, which had fallen in, Pa! Pa! It was covered up with broken plank and the trunks of 60 or 70 passengers. It was the child of the Rev. Mr. Pringle, an Episcopal clergyman, who, in great agony, was wringing his hands, exclaiming "my poor baby!" and supplicating the Almighty to save his child—and his supplications were heard, for, after a half hour's hard work, his baby was miraculously saved, with scarcely a scratch upon it. Mr. Muldrow, who was also in the same car, escaped uninjured, and Mr. Henry B. DeLorme only had his leg a little bruised.

COTTON.—Great Britain now consumes upwards of 31,500 lbs. of cotton weekly, or more than 1,600,000 bales annually, with a progress of consumption from year to year, much larger than the pro rata increase of population. According to late and authentic statements of the English manufactures, it seems that there are in Great Britain 21,000,000 spindles in constant motion, spinning upwards of 105,000,000 hanks, (or 50,000 miles) of yarn per day, in length sufficient to circumscribe the globe 2,000 times.—Out of this immense production, in one country only, about 130,000,000 yards of yarn are exported to foreign countries, the remainder being converted into cloth, lace, and other fabrics.—There are also in operation in Great Britain, at this time, 220,000 power looms, each of which will produce, on an average, five or six pieces of cloth per week, each piece about 28 yards long, or a daily product of 6,256,000 yards of 2,550 miles.

THE BRIDE OF NAPOLEON.—The Baden correspondent of the Cologne Gazette, writes from Carlruhe on the 11th ult: "The betrothment of Louis Napoleon with the Princess Carola of Vasa may now be regarded as a certainty; it has, however, as I learn, from most trustworthy sources, only been brought about after the conquest of great difficulties. Not only were high political advisers against the match, but many warning voices were raised among the family connexions of the lady, to remind her of the unhappy lot of another Princess of Baden. But the policy of the Grand Duchess Stephanie, grandmother of the young Princess, and the firmness of the bride, have triumphed over every obstacle."

AN EXPERIMENT.—The New York Tribune says:—"Singular results are obtained in this city from a very simple application of the nervous fluid, animal magnetism, or whatever be the agency, to brute matter. Let a party of six or eight persons sit around a common ping table for twenty minutes to half an hour with the palms of the hands held flat on the top of the table; it is not necessary that their minds should pay any attention to the process, or conversation be suspended but presently the table becomes so charged with the mysterious fluid that it begins to move; then rise from it, push away your chairs, still holding your hands near, though it is not necessary to touch it, and it will turn around from end to end, and even proceed rapidly about the room, without any visible agent, on which excursions the persons must bear it company, or the current is broken and the movement stops. This simple experiment may easily be tried; it requires no faith and no outlay of physical or moral strength; and the result, with a table that is not too heavy, is pretty sure to follow."

THE U. S. MINT.—The Philadelphia Evening Bulletin understands that the receipts of gold dust at the United States Mint in that city, during the month of November, have been about \$7,250,000. This is the largest amount ever deposited there during a similar period. The exports of specie to Europe, during the month, have been less than nine hundred thousand dollars. There need be no fear now of a scarcity of gold coin for some time.
