

CHERAW CHRONICLE

JOE LINDSAY, Editor

Should Churches be Neglected.

In the building of His temple, we are told in the Bible that God gave instructions for every minute detail, such as dimensions, material, etc. God required the builders to follow these instructions to the letter and showed plainly that He wanted care exercised so that His Holy Temple should be a beautiful building. A few days ago we had occasion to pass three of our churches and we were struck with the apparent need of repairs on all of them. It doesn't cost a great deal to paint and make a few repairs and we are sure even in these strenuous times our people can arrange the necessary expense, certainly to paint them if nothing more.

We realize that our congregations are expecting to build new churches but as long as we are using the present buildings as God's Houses of Worship they should be kept just as slightly as possible. Think of the impression a stranger must get when he sees our churches sadly in need of paint and repairs.

We feel that God has told us plainly how careful we should be to keep His house beautiful and we hope that Cheraw will not long be remiss in the care of His houses here.

DRAWING ON THE SOUTH.

Dr. K. C. Matheson, a native of Cheraw, S. C., has been president of the Georgia School of Technology, and has been doing so well in producing results at that institution that he has attracted attention abroad. The Drexel Institute at Philadelphia, which has had an eye on him, wanted to get him

Indigestion

Many persons, otherwise vigorous and healthy, are bothered occasionally with indigestion. The effects of a disordered stomach on the system are dangerous, and prompt treatment of indigestion is important. "The only medicine I have needed has been something to aid digestion and clean the liver," writes Mr. Fred Ashby, a McKinney, Texas, farmer. "My medicine is

Theford's

BLACK-DRAUGHT

for indigestion and stomach trouble of any kind. I have never found anything that touches the spot, like Black-Draught. I take it in broken doses after meals. For a long time I tried pills, which gripped and didn't give the good results. Black-Draught liver medicine is easy to take, easy to keep, inexpensive."

Get a package from your druggist today—Ask for and insist upon Theford's—the only genuine.

Get it today.

and to make sure and quick work of the proposition, submitted an offer of \$16,500 a year, which is just double his Georgia pay. And so it goes. As soon as native talent begins making good, it is in demand outside the State for more money than native talent had cause to expect at home. Especially in the educational line has the South contributed to the upbuilding of outside institutions. We rear educators, preachers and teachers on the limited salary basis, and for that reason we are expecting more of this class than any other part of the country. The North draws more largely on Southern talent than the South draws from the North, and when the North begins to buy our raw material and manufactured products on the same scale it imports our preachers and teachers, we will begin to even up the situation. —Charlotte Observer, Editorial, Oct 6

HOW ABOUT YOU?

Have you ever figured out your tangible, negotiable assets and liabilities? If you have not, you will find it will surprise you.

We Americans base a man's financial worth in terms of principal—English and Frenchmen use the proper way, i. e., in terms of income.

In using this method we are not so liable to confuse ourselves. Twenty thousand dollars seems a large sum but when you reduce it to terms of income it looks pretty small when you realize it will hardly yield \$1500.00 a year.

When you were getting \$25.00 a week you were not living what might be called a luxurious existence—you were just getting by, that's all.

Put your wife and family in your place on \$25.00 a week and they will have even a harder time than you when you were single, because there are more mouths to feed and more bodies to clothe.

Life insurance is the answer—at least 60 per cent of all the money you save can be put into life insurance so as to yield nearly 3 per cent if you live and several hundred per cent if you should die prematurely.

Think it over—then let us advise you what to do.
