This is the package that brings to your table the best and freshest of all Biscuit and Crackers.

This is the trade mark of identification which appears in red and white on each end of the package.

NATIONAL BISCUIT COMPANY

This is the name of the Company that stands behind both the trade mark and the package—a name synonymous with all that's best in baking.

OYSTERETTES—A different kind of an oyster cracker, with an appetizing flavor—serve with oysters, soup and salad.

SOCIAL TEA BISCUIT—A light, crisp little biscuit, baked to an appetizing brown and slightly flavored with vanilla.

A Tragic Finish.

A watchman's neglect permitted a leak in the great North Sea dyke, which a child's finger could have stopped, to become a ruinous break, devastating an entire province of Holland. In like manner, Kenneth McIver, of Vanceboro, Me., permitted a little cold to go on unnoticed until a tragic finish was only averted by Dr. King's New Discovery. He writes: "Three doctors gave me up to die of lung inflamation, caused by a neglected cold; but Dr. King's New Discovery saved my life." Guaranteed best cough and cold cure at all drug stores. 50c and $1.00 Trial bottle free.

Only 82 Years Years Old.

"I am only 82 years old and don't expect when I get to be real old to feel that way as long as I can get Electric Bitters," says Mrs. E. H. Brunson, of Dublin, Ga. Surely; there's nothing else keeps the old as young and makes the weak as strong as this grand tonic medicine. Dyspepsia, torpid liver, inflamed kidneys or chronic constipation are unknown after taking Electric Bitters a seasonable time. Guaranteed by all druggists. Price 50c.

PARKER'S HAIR BALSAM
Cleanses and beautifies the hair. Promotes a luxuriant growth. Never Fails to Restore Gray Hair to its Youthful Color. Cures scalp diseases & hair falling. 50c, and $1.00 at Druggists

CULTIVATING THE CHILD.

How Any Trait May Be Fixed In a Normal Human Being.

There is not a single desirable attribute which, lacking in a plant, may not be bred into it. Choose what improvement you wish in a flower, a fruit or a tree, and by crossing, selection, cultivation and persistence you can fix this desirable trait irrevocably. Pick out any trait you want in your child, granted that he is a normal child, be it honesty, fairness, purity, lovableness, industry, thrift, what not. By surrounding this child with sunshine from the sky and your own heart, by giving the closest communion with nature, by feeding him well balanced, nutritious food, by giving him all that is implied in healthful environmental influences and by doing all in love you can thus cultivate in this child and fix there for all his life all of these traits—naturally not always to the full in all cases at the beginning of the work, for heredity will make itself felt first, and, as in the plant under improvement, there will be certain strong tendencies to reversion to former ancestral traits, but in the main with the normal child you can give him all these traits by patiently, persistently guiding him in these early formative years.

And, on the other side, give him foul air to breathe, keep him in a dusty factory or an unwholesome schoolroom or a crowded tenement up under the hot roof; keep him away from the sunshine, take away from him music and laughter and happy faces, cram his little brains with so called knowledge, all the more deceptive and dangerous because made so apparently adaptable to his young mind; let him have associates in his hours out of school, and at the age of ten you have fixed in him the opposite traits. He is on his way to the gallows. You have perhaps seen a prairie fire sweep through the tall grass across a plain. Nothing can stand before it; it must burn itself out. That is what happens when you let the weeds grow up in a child's life and then set fire to them by wrong environment.—Luther Burbank in Century.

THE GOLDFINCH.

Changes In Plumage That Are Puzzling to the Novice.

Most every one in America is acquainted with the goldfinch, but many people know the bird by the name of lettuce bird on account of its bright yellow color. Goldfinch is a very appropriate name, as the bright yellow of the male when in breeding plumage is like burnished gold. The female goldfinch is more modestly dressed than her mate. The changes in plumage of the male are very interesting and to the novice somewhat puzzling. Until the student becomes acquainted with the bird he may wonder why he [illegible] supposed females during the winter. The [illegible] of both sexes, the male bird having assumed in the previous fall, usually by the end of October, a plumage closely resembling that of the female and young bird of the year. The male retains this inconspicuous dress until late in February, when one can notice a gradual change taking place in some of the birds. This renewal of feathers is actively continued through March and April, and by the first of May our resplendent bird is with us again. The song period with the male goldfinch continues as long as he wears his gold and black livery, for it commences as early as the middle of March and ends late in August. Goldfinches are very cleanly in their habits and bathe frequently. Their nests are exquisite pieces of bird architecture, the inside being lined with the softest plant down. The mother bird is the builder, her handsome consort during the nest building time devoting most of his efforts to singing to cheer his industrious mate.—Philadelphia Press.
