SHALL WE GO FORWARD?
There are periods in the life of every individual, every business and every town when this question must be faced. It seems that such a time has arrived for Chesterfield.

This town has apparently reached a stage in its development when it must take a step forward or must stagnate, which shall it be?

First and most important of all, we need a live board of trade. This we must have and now is the time to put such an organization on foot.

We suggest that a mass meeting be called in the near future and a board of trade be organized and set to work. It is doubtful if any town can accomplish anything noteworthy for itself without a board of trade.

Second: We are ideally situated for the installation of water works at a minimum cost. No body needs to be told that we need it. There are sickening stenches wafted on every breeze; there are myriads of flies laden with filth that ought to be carried off by sewers. Undoubtedly the present conditions are fraught with danger to the health of our entire population.

Then there is the terrible fire risk. A big fire started on Main street, and the business section of Chesterfield will be quickly in ashes.

This town has no bonded debt. It has money in the treasury and taxes are light. Water works would be self-sustaining through water rents. The reduction in fire insurance rates would be considerable.

We cannot afford to be longer without water works and sewers!

PAYING TRIBUTE
The good State of South Carolina pays an annual tribute to other states in the union of \$13,900,000 for the privilege of eating their inferior canned goods. So far as this State is concerned here is a clean waste of \$13,900,000.

It is a safe assertion that every penny of this vast sum could be kept within our borders—if we only cared for the money.

The shelves of every grocery store in South Carolina are loaded with this inferior foreign, factory-canned stuff when they ought to be loaded with our own products, clean and wholesome, canned by 1,000 canning clubs throughout the State.

Let the girls of Chesterfield County see that they get their share of this pile of money.

THE BALANCE OF TRADE
Here is something for the calamity howlers to put in their pipes and smoke—that is, if they can stop howling long enough. The month of March was the greatest month for foreign trade that the United States has ever seen, not only as to value of export but imports. For the fiscal year ending April 1st there was an increase of imports of 24 per cent over last year and exports were 50 per cent increase in same period. And the New York Independent asks: "Are there to be any limits to our prosperity?"

The Independent, established in 1848, has swallowed Harpers Weekly, established in 1857. The Independent has been a great and useful weekly. Now that it has absorbed "The Journal of Civilization," as Harper's was won't to call itself, its usefulness will be much enlarged by the addition of so many new readers.

It is said that Villa, who is very much alive, has changed his name. Now if he would only change his nature Mexico would fare better.

Mrs. Goode, a Kentucky lady who swallowed a needle twenty years ago, had it removed from her side. Mrs. Goode is now better.

The ladder of success in politics has many rounds of applause.—The State.

Beg pardon, but can those rounds be broken by silence?

THE JOKER IN POLITICS
The practical joker is usually a man of good intentions who often has cause to lament the harm done by his apparently innocent prank.

There is a joke going the rounds in Chesterfield county and being fostered from a sense of fun that may possibly result in great harm to this county and the Fifth Congressional District.

The Hon. W. F. Stevenson is Chesterfield's logical candidate for Congress from this district. To all appearances he has an excellent opportunity of winning. But his chances ought not to be jeopardized in the slightest degree by the entrance into the race of an other Chesterfield county man.

It is reported to this office that in a spirit of levity many citizens have encouraged one of Chesterfield county's perennial candidates to enter the race against Mr. Stevenson. If this county had nothing at stake the joke might be allowed to pass unchallenged but for all we know, this race may possibly be a close one and a very few votes sacrificed to fun may deprive Chesterfield county of a representative in Washington.

HELPING THE FARMERS
When the bill to increase the efficiency of the military establishments of the United States—the proposition for the government to manufacture nitrates for fertilizers. It is almost inconceivable that a Democrat, and a Southern Democrat at that, would oppose the government aiding the farmers by making fertilizers. Senator Hardwick of Georgia. His opposition was based upon the fact that the plants when not manufacturing nitrates for the army could be used for making nitrates for fertilizers. It is almost inconceivable that a Democrat, and a Southern Democrat at that, would oppose the government aiding the farmers by making fertilizers. Senator Hardwick's opposition to Senator Smith's amendment was that it was a Socialistic measure—that the government should not engage in manufacturing nitrates for fertilizers for that reason. Senator Owen replied that the measure had the very spirit of Democracy: "Democracy means the rule of the people for the people—for all the people—for their happiness, health and efficiency."

Senator Underwood of Alabama, discussing the conference report said: "One of the things we are driving at is to make fertilizers. I think that is a most important thing, a thing that is close to my heart and close to my people—a thing I want to see accomplished. The primary purpose of this bill now and in the future, is to supply the nitrates to protect the government in time of war."

But as shown by Senator Smith, Senator Underwood and others the plant when not making nitrates for the army, could cheapen the prices of fertilizers. If that be treason make the best of it. It is good Democratic doctrine to help the the people when and where they need help.

We suppose half the enmities in this old vale of tears are born of mutual misunderstanding, and the reason that fellow thinks you are a pinheaded little ass is because he suspects you think him a pinheaded little ass. And the chances are that you are both right.—The State.

This appears to be one of those half truths we used to hear about

Balanced Diet Stops Disease
"Our unanimous opinion is that there is no pellagra at the Epworth orphanage at the present time," said Joseph Goldberger, M. D., surgeon, United States public health service, who has been in charge of the dieting of the 225 children in the orphanage since the government took charge last September. The statement was made in the presence of C. H. Lavinder, M. D., surgeon, and R. M. Grimm, M. D., past assistant surgeon, United States public health service, who were sent to Columbia by the surgeon general to inspect the conditions at the orphanage.

When Dr. Goldberger and W. F. Lanner, M. D., surgeon, began their supervision of food given the children there were more than 80 cases of pellagra at the orphanage, some advanced and others incipient.

"It is not," said Dr. Goldberger, "that the children do not get enough to eat or that the food is not wholesome; it is merely that the diet was not balanced. There is no medication, whatever. We have fed them principally on milk, lean meat and cowpeas, and given them less starchy, cereal and sweet foods."

"It should be clearly understood that the children are not cured for the rest of their lives, for an unbalanced diet will bring the pellagra back."—The State.

American Meat Dangerous to Allies
Rome—Orders have been issued to Italian soldiers not to eat any American frozen beef or canned meat unless it is shredded. Recent consignments to Italy from Chicago were said to contain small hooks and prongs which, it is suspected, were purposely hidden in the frozen and potted meats with the object of disabling the soldiers, causing an ulceration of the intestines. An investigation has been ordered with a view to ascertaining the responsibility of the packers, who, it is feared, have Austrian and German workmen in their employ.

An Honorable Desertion
Rome—An Alpine soldier named Finimondo, who in the Tripoli war single handed killed seven Arabs, using the bayonet, was sent to the Italian front shortly after the outbreak of war. Recently growing disgusted and tired of trench warfare, he had deserted. Since apparent proof of his desertion was available he was court-martialed in his absence and condemned to die as a traitor. Finimondo has now unexpectedly returned, wearing the uniform of an Austrian officer. He reported that he purposely deserted with the object of securing valuable information from the enemy and thus earn another medal similar to that which he was awarded in the Tripoli war. The "deserter" explained that he used stones to kill Austrians guarding him, including an officer, whose uniform he was now wearing. He then collected such valuable information with regard to the Austrian positions, strength, location and their guns that the sentence of death was revoked. It is expected that Finimondo will be decorated instead of punished.

Why
Not give your boy and girl an opportunity to make their home study easy and effective? Give them the same chances to win promotion and success as the lad having the advantage of

THE SMALL ACCOUNT
Many people hesitate about opening a Bank Account, because they have not much money with which to make the start. They seem to think a small sum is too trivial. They overlook the fact that the greatest fortunes in the world began with small sums—are composed of single dollars—made up of single dollars. This Bank has never put a limit upon the amount with which you can open an account with us. We welcome the small thrifty depositor. Some day such a depositor is BOUND to become a big depositor. May we welcome you here—never mind how small an amount you may bring?

A Merciless Judge
One Who Shows No Favor.
A merciless judge is Father Time. Before him the weak and the waiting go to the wall. Only the truth can stand. For years the following statement from a Lancaster resident has withstood the sternest of all tests.

L. P. Clyburn, French St., Lancaster, S. C., says: "My kidneys were inactive and I had backaches. I used Doan's Kidney Pills with results." (Statement given March 25th, 1911.)

NO KIDNEY TROUBLE SINCE MORE THAN THREE YEARS LATER Mr. Clyburn said: "I have had no further trouble with my kidneys or back since Doan's Kidney Pills so greatly benefited me."

Price 50c, at all dealers. Don't simply ask for kidney remedy—get Doan's Kidney Pills—the same that Mr. Clyburn has twice publicly recommended. Foster-Milburn Co., Props., Buffalo, N. Y.

Oldest Living Thing.
One of the wonders of the ancient world and probably the greatest of them, was the pyramids of Egypt. And yet some of the giant sequoias of California that are now thrifty trees had bark on them a foot thick when Cheops began building the great pyramid that bears his name. Beneath the shadow of the pyramids Napoleon said to his troops: "Forty centuries look down upon you." In the shadow of the big trees of California one might say: "Eighty centuries look down upon you." There are trees in the grove estimated by scientists, among them John Muir, the eminent naturalist, to be 8,000 and even 10,000 years old.

The oldest living things in the world today are these giant trees. Also the species of vegetation to which they belong is the oldest in the world. The sequoia trees, exactly like that of California, flourished several millions of years ago. We know that because we find their fossil remains buried beneath thousands of feet of rock and geologists are able, by reading the leaves of those rocks as an ordinary man would read a book, to tell when the sequoias beneath them lived.

"I've got a job. I'm barber at a soda fountain."
"A barber at a soda fountain?"
"Yes; I shave the ice."—Washington Post.

"Tom when you proposed to her I suppose she said: 'This is so sudden.'"

FOLEY CATHARTIC TABLET
Keeps Stomach Sweet - Liver Active - Bowels Regular

SEVERE PUNISHMENT
Of Mrs. Chappell, of Five Years' Standing, Relieved by Cardui.

Mt. Airy, N. C.—Mrs. Sarah M. Chappell of this town, says: "I suffered for five years with womanly troubles, also stomach troubles, and my punishment was more than any one could tell. I tried most every kind of medicine, but none did me any good. I read one day about Cardui, the woman's tonic, and I decided to try it. I had not taken but about six bottles until I was almost cured. It did me more good than all the other medicines I had tried, put together. My friends began asking me why I looked so well, and I told them about Cardui. Several are now taking it."

Do you, lady reader, suffer from any of the ailments due to womanly troubles, such as headache, backache, sideache, sleeplessness, and that everlastingly tired feeling?

If so, let us urge you to give Cardui a trial. We feel confident it will help you, just as it has a million other women in the past half century.

Begin taking Cardui to-day. You won't regret it. All druggists.

MADE A RECORD RUN.
And at That He Only Made His Team-mates Furious.
Two small college teams played a football game in New York state. The winning team ran up something like 108 points to the other's nothing, yet the most sensational run of the game was made by a member of the defeated team.

Toward the end of the game the ball was fumbled by one of the backs on the winning team. The ball rolled out toward an opposing player, who immediately swooped down upon it, gathered it under his arm and fled down the field like the wind.

At this a howl went up from the spectators, that might be heard for miles. That shout gladdened the heart of the runner, for he realized that he was at last doing what he had always

HE FAIRLY FLEW.
longed to do. He was about to make football history.

He had about a hundred yards to run, and he determined to reach that goal or die. One of his teammates ran toward him and shrieked. The runner put on an extra burst of speed. It was very encouraging to be applauded by players and spectators alike.

Presently he heard feet pounding heavily behind him. But he felt confident he could never be caught. The ground sped by under his feet, and the ten yard marks were passed as though they were but a few inches apart.

Only a few more yards, and then—fame!

But for all the runner's speed the pounding feet behind him drew steadily closer. The man carrying the ball heard them with dismay.

He leaped, he bounded, he fairly flew, he was there!

When both runners were but one yard from the goal posts the pursuer hurled himself forward, clutched the runner viciously about the knees, and both crashed heavily to the ground. Too late, however, for they had fallen over the goal line.

The runner picked himself up, aching in every limb, turned proudly toward the stands to receive the plaudits of the spectators—and looked into the snarling face of a furious teammate.

His own teammate had tackled him, for the runner had run in the wrong direction and had scored two points for the other side!—New York World.
