Subsequently Gen. Bratton, Judge Has kell and Superintendent Rice were appointed a committee to ascertain if any steps can be taken to retain the sorvices of President McBryde. The reports of the President and professors as the work of the College were received and considered. The recommendations contained in the President's report were adopted. They consisted of recommendations of changes in the curriculum; as to the requirements for the admission of students, and as to the granting of degrees.

The Board next considered the admission of beneficiaries, a matter committed to it by the recent Act of Assembly. A resolution was adopted in substance stating that no student shall be admitted free without a certificate, signed by himself and parents ness with a capital of \$50,000. ## New Servitude in Russia.

According to the St. Petersburg correspondent of the London Daily News, the project which Count Tolstoi some days ago presented in the council of the empire, and aiming at re-establishing a new kind of servitude for the Russian peasants, has produced a deplorable impression. He is pleased at playing this part, and declared in April 1882, a short time before he was appointed minister of the interior, "My name will be sufficient to strike the revolutionary element with terror."
