THE FIRST BABY.

Its Coming Is Looked Forward to With Both Joy and Fear and its Safe Arrival is Hailed With Pride and Delight by All.

The arrival of the first baby in the household is the happiest and most important event of married life. The young wife who is to become a mother delights to think of the happiness in store for her when the little one shall nestle upon her breast and later she shall hear it lisping the sweet and holy name, "Mother." But her happy anticipation quickly vanishes when she realizes the terrible pain and suffering through which she must pass while bringing the little one into the world. And the terrible fear of the danger attendant upon the ordeal soon dissipates her joyfulness.

Thousands of women have learned by experience that there is absolutely no necessity for the sufferings which attend child-birth; they know that by the use of "Mother's Friend"—a scientific liniment—for a few weeks before the trying hour, expectant mothers can prepare themselves for the final hour that the pain and suffering of the dreaded event are entirely obviated and it is safely passed through with comparatively little discomfort. All women are interested, and especially expectant mothers who for the first time have to undergo this trial, in such a remedy; for they know the pain and suffering, to say nothing of the danger, which is in store for them. "Mother's Friend" is woman's greatest blessing, for it takes her safely through the severest ordeal of her life. Every woman who reads the little book "Before Baby is Born," which contains information of great value to all. It will be sent free to any one who sends their address to The Bradfield Regulator Co., Atlanta, Ga.

—Mr. J. Frank Fooshe publishes the following little fact in his Teachers' Journal, and it speaks well for both the pupils and teachers of the school, that the school property is kept in such good condition. Mr. Fooshe says: "Accidents around school buildings are not altogether unknown. Especially is this true of window panes. But Principal W. H. Withrow, of Winnsboro, has hit it to his credit of having had only two such accidents at Mount Zion during his principality of fourteen years. Can any teacher in the State beat this?"

THE CENSUS.

On Friday the census enumerators all over the country began their work. Each enumerator has his work mapped out for him by the supervisor of his district and it depends upon the people upon whom he calls whether his task will be pleasant or otherwise. No unnecessary questions are asked by the enumerator, and everybody should try to give clear and correct answers to the numerous questions asked. Since the last census, which was taken ten years ago, our town has increased considerably in population, owing to the building of the cotton mill, and by the time another census is taken, in ten years' time, possibly the new railroad will have added largely to our population.

Departure of the Astronomers.
The crowd of visitors that we have had with us during the past few days has gradually dispersed, and the old town, after the unusual excitement of the past week, has settled down to her usual quiet. The New Jersey astronomers, Professors Prentiss and Dodge, left on Monday evening, as did the Winthrop delegation. The Virginia astronomers having numerous apparatus to pack and ship and some work to do lingered rather longer than the others, and the last one of them leaves today. Professor Stone left for Georgia on Tuesday, Mr. Lyons and Mr. Everett left the same day, and Mr. Mayo leaves to-day.

During their stay in Winnsboro these gentlemen made many friends, and all who were thrown with them were charmed with the visitors, and every one regrets their departure.

The Eminent Kidney and Bladder Specialist.

The Discoverer of Swamp-Root at Work in His Laboratory.

There is a disease prevailing in this country most dangerous and so deceptive. Many sudden deaths are caused by it—heart disease, pneumonia, heart failure or apoplexy are often the result of kidney disease. If kidney trouble is allowed to advance the kidney-poisoned blood will attack the vital organs, and the kidneys themselves break down and waste away cell by cell. Then the richness of the blood—the albumen—leaks out and the sufferer has Bright's Disease, the worst form of kidney trouble. Dr. Kilmer's Swamp-Root the new discovery is the true specific for kidney, bladder and urinary troubles. It has cured thousands of apparently hopeless cases, after all other efforts failed. At druggists in fifty-cent and dollar sizes. A sample bottle sent free by mail, also a book telling about Swamp-Root and its wonderful cures. Address Dr. Kilmer & Co., Binghamton, N. Y., and mention this paper.

A party from Spartanburg went to Strothers to view the eclipse, and the following from the Carolina Spartan is complimentary to Strothers' people: The Spartanburg people are under great obligations to the agent at Strothers, J. W. Ladd and his wife. They did everything they could to make us comfortable. Their kindness will be long remembered. Mrs. Suber on the Newberry side kindly entertained ten of the visitors. You see Strothers isn't a bad place to visit. Mr. and Mrs. J. W. Lyles came in and joined the party. He gave some information about the place. He said we were on Cannonville. Mr. Lyles said, "I have sold Chamberlain's Cough Remedy for the past five years with complete satisfaction to myself and customers," says Druggist J. Goldsmith, Van Etten, N. Y. "I have always used it in my own family both for ordinary coughs and colds and the coughs of children. It is safe and it is very efficacious." For sale by McMaster Co., druggists.

A Good Cough Medicine.

It speaks well for Chamberlain's Cough Remedy when druggists use it in their own families in preference to any other. "I have sold Chamberlain's Cough Remedy for the past five years with complete satisfaction to myself and customers," says Druggist J. Goldsmith, Van Etten, N. Y. "I have always used it in my own family both for ordinary coughs and colds and the coughs of children. It is safe and it is very efficacious." For sale by McMaster Co., druggists.

QUESTION ANSWERED.

Yes, August Flower still has the largest sale of any medicine in the civilized world. Your mothers and grandmothers never thought of using anything else for indigestion or biliousness. Doctors were scarce, and they seldom heard of Appendicitis, Nervous Prostration or Heart Failure, etc. They used August Flower to clear out the system and stop fermentation of undigested food, regulated the action of the liver, stimulate the nervous and organic action of the system, and that is all they took when feeling dull and bad with headaches and other aches. You only need a few doses of Great August Flower, in liquid form, to make you satisfied there is nothing serious the matter with you. For sale by McMaster Co., druggists.

TOM HILL, THE WIZARD.

A Kind of Jack O' Lantern that Vanishes Upon Approaching Him.
Since the fire on the morning of the 28th of May the town and surrounding community have been very much excited in numerous expeditions for the arrest of Tom Hill. Friday evening it was reported that Tom was on the eastern side of Winnsboro and had broken into one or two houses of colored people, and stolen provisions. One old colored man stated that he had taken a skillet from his house. A party of searchers set out immediately, and pursued a cold trail far into the night. The most tangible evidence found that Tom had really been in the neighborhood was the finding of the skillet. This expedition ended in a failure.

Saturday morning a colored man named Emanuel Small came into town and narrated that he knew Tom Hill well having gone to school with him, and that on that morning while he was working in a field about four miles north of Winnsboro, Tom came into the field and without any ceremony began to fire upon him. Emanuel came to Winnsboro with a gun that from appearances might have been used in the American Revolution, but he immediately purchased a new one. He is a colored man of good reputation, and his manner inspired confidence in his story which was strengthened by his quick purchase of a new gun. Another expedition was organized forthwith, and set out to the scene of Tom's supposed appearance. Messages had been sent to the State penitentiary for bloodhounds, and the dogs came up on a freight about 10 o'clock Saturday morning. When the party of pursuers got a short distance out of town they were informed that Tom had been seen still farther north of the place where the Small man had seen him, and that he had eaten his breakfast at this point. The dogs, therefore, were taken to this point. The crumbs of bread were found, but the dogs failed to strike a trail, whether because the appearance of Tom was a myth or because the trail was too cold is not known. This expedition came to naught.

Sunday night Bob Crosby came to town with a sensational story that he had run upon Tom Hill near White Oak and fired at him three or four times. A number of men rose from their beds and again went out on a chase. The dogs were taken to the place where Bob said that he had seen him. Again the dogs refused to follow a trail. This expedition returned Monday morning about 8.30, and like its predecessors was a fruitless undertaking.

Many people are beginning to doubt whether Tom Hill is a human being or a myth. He is often seen, but vanishes as vapor upon the approach of an armed party of pursuers. Tom Hill is an escaped convict. A reward of fifty dollars has been offered by the town council, twenty dollars by the county, and the Governor has been petitioned to offer one hundred and fifty dollars for his arrest.
