In America the beauty of many of our women is hidden because of the weakness and sickness peculiar to the sex. DEPOT AND COTTON BURNED.

A few minutes after 3 o'clock on Tuesday morning cotton on the freight depot platform was discovered in a blaze. Those who first saw the fire say that a few bales in the southeast corner of the depot was seen burning. The roof of the depot projected some little distance over the platform. When the fire was first discovered the wind was blowing from a southeasterly direction, and the projecting roof was soon caught, and shortly the wind changed almost east and the fire rushed across the bales of cotton on the platform. Repeated efforts were made to turn in an alarm of fire over the telephone line, but without success. It was at an hour when everybody sleeps soundly and people seemed slow in reaching the fire. The depot was burned with a large quantity of goods and a large number of bales of cotton. The amount of property destroyed will appear in our next issue.
