

USC faculty members get more responsibility

By TIGE WATTS

USC faculty will have larger roles in searching for a new provost and serving on the new USC Research Foundation.

USC President John Palms said last week he expects to name faculty members to a provost search committee soon.

During the summer break, Palms stalled naming a committee until faculty members came back.

"I want to get their representation in this crucial search," Palms said.

Former provost Arthur Smith was named president of the University of Utah over the summer and left USC Aug. 23. Deputy provost George Reeves is currently filling the vacancy.

"I'm going to look at who served on the committee that brought Art here and try to use a lot of those people as well. We should have representation from the administration, faculty, and students on this committee," Palms said.

Palms is also expected to name his fifth USC Development Foundation Board member by Friday.

That member will be a faculty member, he said.

The new foundation was created after the Carolina Research and Development Foundation voted to disband and separate into two entities. All of the board of directors for the foundation also decided to resign shortly afterwards.

"I want to get fair representation from the faculty on this committee, as well," Palms said.

Palms also said the board of trustees will also announce their appointments to the foundation. Palms appointed four members two weeks ago at the last full board of trustees meeting.

Meanwhile, Palms' reorganization plan may be close to an end after Vice President for Business and Finance Pete Denton confirmed he may leave USC.

Denton said last Friday he talked with members of a committee searching for a new chief financial officer at the University of Houston.

Palms has reorganized his entire organization except for the Business and Finance section. Palms also separated Denton's duties, as chief financial officer and univer-

Palms

sity treasurer, into two different jobs in the plan.

Palms previously hinted he might not make any changes to the current make-up of the Business and Finance section. He also said problems at Coastal and Spartanburg have distracted him from finishing his reorganization.

Denton's job pays \$112,506 per year.

Man exposes himself in library

Third indecent exposure this year at Thomas Cooper

For the third time this year, a man exposed himself to a female student on the lower levels of Thomas Cooper Library Thursday.

About 6:20 p.m., a 23-year-old graduate student was studying on Level 2 of Thomas Cooper when she noticed a man masturbating. When he realized that she had seen him, he quickly left the area.

The victim said she asked another man in the library to come with her to help identify the suspect but he refused.

"He was not a library staffer," she said. "The library staff was very supportive (after the incident). He was an older gentleman who wouldn't help. This made me almost as mad as I was when the guy did that to me."

The suspect was described as a black male with a

short goatee in his twenties who was 6-feet-2-inches tall and weighed approximately 200 pounds. On Thursday, he was wearing a red and blue rugby shirt, dark blue shorts and a white baseball cap.

Police stopped an individual who fit this description; however, the complainant could not identify him as the suspect.

The victim says that the library could not do anything to stop an incident like this.

"This is not the type of thing that they could prevent easily," she said. "It's not like he was carrying a gun or anything."

The victim said that she will continue to go to the library after this incident.

"I still feel uncomfortable (when I go in there), but not like my safety is threatened."

On Mar. 21, a 26-year-old geology major was accosted by a male who brushed up against her and who started masturbating on Level 2 of the library.

On Apr. 11, a 20-year-old student was approached by a man who had just finished ejaculating on Level 1 of the library.

Police are still investigating this latest incident.
