

Customer Support Technicians

Shelf Life.

When you think of high quality personal computing products with staying power, you think of Microsoft. We wrote the book on operating systems with MS-DOS. Now, Microsoft Windows graphical environment version 3.0 is fast becoming the interface of choice throughout the world.

Products like Microsoft Word, Excel and Works, to name a few, have stood the test of time...and we're working on revolutionary ideas right now that will become tomorrow's software classics.

Our best-selling products don't stay on the shelves for very long. They're the pride of our top-line team of software professionals.

As a Customer Support Technician, you'll welcome the chance to use both your communication and technical skills to their fullest.

You'll support Microsoft applications by answering telephone calls from end users, helping them troubleshoot problems. These can range from

the very basic to the highly technical. In the course of your work you'll broaden your skills in a variety of software applications and programming languages. Most important, you'll help set new standards of quality customer service for Microsoft's outstanding software products.

If you are about to graduate with a Bachelor's degree in Computer Science, Electrical Engineering (with Computer Science emphasis), Math, Physics, Management Information Systems or a related discipline, are familiar with PC-based technology and are eager to learn a variety of applications, languages and tools, we provide solid technical training to get you started. If you can listen to technical questions, solve complex problems, and effectively communicate solutions, we want to talk with you at our On-campus Interviews.

We are an equal opportunity employer and are working toward a more culturally diverse workplace.
