Think of the six women closest to you. Now guess which one will be raped this year.

One out of six college women will be sexually assaulted this year. But you can change the odds of it happening. Simply by trying to avoid situations that leave you or your friends vulnerable. For starters, follow security measures. Don't prop residence hall doors open. Walk with a friend after dark. And be aware that date rape is a major problem on college campuses. With many of these rapes involving drinking. Then share these facts with six of your friend. And maybe none of them will become another statistic.
