Two killed in plane crash near Columbia

Associated Press

SPRINGDALE — Both people aboard a twin-engine airplane on a flight from Georgia were killed Wednesday when it crashed into a heavily wooded area short of a runway at Columbia Metropolitan Airport.

Those killed were believed to be a flight instructor and a student from the Southeastern School of Aeronautics at Herbert Smart Airport in Macon, Ga., Columbia airport spokeswoman Lynne Douglas said.

Todd Caughman, deputy Lexington County coroner, said school records

and evidence at the scene indicate the dead are Kimmo Puuspinen, 23, of Joutseno, Finland and Mattheus Dalheim, 26, of Szhordorf, Germany.

But formal identification won't come until autopsies are performed Thursday, Caughman said.

The weather was foggy at about 2 a.m., when the plane crashed, but it wasn't clear if that was a factor. There was no immediate indication of a cause for the crash, airport director Robert Waddle said.

The wreckage of the Piper Seminole was spotted about three hours

later by a helicopter with heat-seeking equipment. Wreckage was scattered over an area about 300 feet long, and there were several small fires in the wooded area less than a half mile from the runway, Waddle said.

The plane was registered to Gulf Leasing Inc. in Naples, Fla., said Mary Ann Cassano, regional spokeswoman for the Federal Aviation Administration. The victims were on a "proficiency flight" practicing instrument flight at night, she said.

Air traffic controllers lost contact with the plane when it was about a

half mile from the north end of the runway at an altitude of 700 feet, Waddle said. The pilot mentioned nothing unusual before the crash, he said.

The FAA and the National Transportation Safety Board were called to investigate.

In June, a plane from Southeastern crashed into a Georgia lake. School officials said the pilot made an emergency landing, but the NTSB found that the pilot buzzed the lake and let a wing hit the water.

Both the pilot and a passenger survived the crash.

SNOOZE

You slept through morning classes. And now you're gonna blow off the afternoon. The sad thing is, your parents have no clue. They think you're working hard. They're convinced you're busting your butt. They're so damn proud. If only they could see you now. Lying there like a lump. Suddenly guilt sets in. You feel so low. Quickly, you reach for the phone and surprise the folks with a call. Ahhh, now you can sleep in peace.

LAB continued from page 1

Students use the new lab to do logic homework for their philosophy classes. The lab is in the Humanities building.

mand on the present Logicworks facility in the Gambrell Computer Lab.

The lab will also allow students to get away from the active Gambrell lab to concentrate on their studies, according to Mike Costa, an associate professor in the philosophy department.

"My staff worked hard to get the lab going and I think the students will benefit from it," Cowen said.

According to Baird, another concern that delayed the opening of the lab was the availability of funds to provide a sys-

tem that would allow a computer screen to be displayed on an overhead projector screen. There is now a temporary system in place.

Costa, who has taught with and without the benefit of the Logicworks program, said the program is a better alternative to simply returning graded homework.

"Logicworks is by far the best way to teach logic...it gives students the practice they really need to master logic," Costa said.
