**Aries (March 21-April 19)** A partnership venture is still in your thoughts. You're wondering how the other person will perform, and the feeling is mutual. Don't leave it to chance. Outline what responsibilities each of you will take. If you learn to be structured and are willing to stick to the structure, you'll find you can accomplish much more.

**Taurus (April 20-May 20)** You're pushed to do another person's bidding. If this is someone you trust, no problem. If not, make your break quickly. You can tell whether this person is trustworthy by whether you flourish in the relationship. If you're being empowered, you know you're in the right place at the right time.

**Gemini (May 21-June 21)** It's hard to settle down to business. There's somebody you'd rather talk to. Schedule a conversation for tonight, but keep mum while the workday is in progress. It's crucial to focus on your job right now, and do it well. Somebody's watching, and would like to give you more responsibility. Make it look like you can handle it.

**Cancer (June 22-July 22)** You're so much in love lately it's hard to think about anything else. People may notice you're preoccupied, but that's OK. Anyone who knows you, knows you have a good reason. Conditions in effect encourage intimate conversations, so make sure you set the stage. If you have to take the kids to Grandma's for the evening, that's

fine. Whatever works.

**Leo (July 23-Aug. 22)** Something around your place is not quite the way you want it. You don't have enough money to buy new, so you have to build it, or fix it, yourself. This is true with relationship issues as well. Building a new deck may be easier than talking about a problem, but you can learn how to do both.

**Virgo (Aug. 23-Sept. 22)** You've got an incredible ability to assimilate information, and right now you're going into a monster learning phase. Do a little planning, to make the most of it. Make your lists and start checking out the schools that teach what you want to learn. This is your opportunity to jump up to the next level.

**Libra (Sept. 23-Oct. 23)** It's often difficult for you to make a decision. That's because most of life doesn't come in black and white, and you do see lots of shades of gray, and all the other colors, too. Well, the moon in Scorpio makes you more decisive. As more things go into Scorpio, it'll get even easier. Give it a try.

**Scorpio (Oct. 24-Nov. 21)** You're decisive, forthright, bold and darned good looking, but the best is still to come. There are odds and ends to be rearranged, organized or tossed out, and an old fear to lay to rest. You've worried long enough. It's time to make the decision. You'll be amazed to find that the rest of the world falls into place.

**Sagittarius (Nov. 22-Dec. 21)** You may feel like you're in a squeeze play. You can either resist or go along with another person's program. If that program isn't heading you in the right direction, come up with one of your own. One thing is for sure. You won't be able just to sit around and pretend nothing's happening.

**Capricorn (Dec. 22-Jan. 19)** A group you're working with is almost more fun than it ought to be. You could get distracted from the path at hand. So what? You're one of the most conscientious people on Earth. You hardly ever let yourself wander off, especially when there's work to be done. Today, make sure all major deadlines have been met, then go play.

**Aquarius (Jan. 20-Feb. 18)** You're still facing tough scrutiny, but you might as well get used to it. If you can get a partner to help, your life will be a lot easier for the next couple days. You want somebody who is better at public speaking, so you can pass questions on to him or her.

**Pisces (Feb. 19-March 20)** Conditions are favoring travel, especially travel by water. If you can't actually take a cruise, you could go somewhere near the water. How long has it been since you planned a big fishing trip? It's time to start thinking along those lines. You're pretty lucky right now, so you might even get your heart's desire.
