Daily Horoscopes

Aries (March 21-April 19) You may feel your power waning as the sun begins to go from your sign into Taurus, but that's OK. By now, you should have acquired pretty much everything you need. You've got new status, new responsibilities, and perhaps quite a bit of new wisdom. Use it to keep yourself from wasting lots of time and energy on an unnecessary trip across town.

Taurus (April 20-May 20) Your money may be in jeopardy today, so keep a close eye on it. Looks like there could be a leak that you don't even know about. It might be something like a fee, or a tax, that's higher than you expected. There may be a way around this next year. Looks like it's a little too late now. The good news is that you may qualify for a raise in pay. Ask a person who would know about that.

Gemini (May 21-June 21) The sun is in Aries. The moon's in your sign today, enhancing all your natural charm. Not the least of these is your fabulous attitude. Even when you're down, you can manage to cheer other people, and they definitely appreciate it. Offer encouragement to a person who's stuck. You might also point out a way around the problem.

Cancer (June 22-July 22) A friend seems to be having problems, but you can help. If you get inside information, however, remember to keep it in confidence. It's important that this secret not get spread around, so what

friend know you're going to do that, too. That will open up the space for the other person to confide in you, which will be very healing.

Leo (July 23-Aug. 22) You're looking good, but don't rest on your laurels. Your window of opportunity may slam shut pretty soon, and you'll find you have to work a lot harder to get the same results. Today, for example, a long-distance contact could be fruitful. You'll get what you need with little more than a phone call. But if you wait until tomorrow, it won't be anywhere near that easy.

Virgo (Aug. 23-Sept. 22) The pressure you've been under is starting to ease. You've had more than enough stress to last you for quite a while. Now, the sun's getting ready to go into Taurus, and that will make your whole life easier. It might even make it possible for you to take a vacation. Your travel conditions get better, starting tomorrow.

Libra (Sept. 23-Oct. 23) Looks like all sorts of fun, and you're right in the middle of it. You get to organize the party, or set up the rendezvous, or somehow bring them all together. Without you, the different factions can't really figure out how to proceed. You're great at this, but take care. You might make yourself indispensable.

Scorpio (Oct. 24-Nov. 21) It looks like there could be information leaks today. This is good, because you can collect data that was previously unavailable. If you've got any tough questions, ask them again. It could also be bad, however. If you're not careful you may say more than you meant to. You're usually pretty good at keeping a secret, but today it'll be tough, even for you!

Sagittarius (Nov. 22-Dec. 21) Odds are you'll get into a debate today, possibly with one you love. You don't want to argue, but obviously this person needs a little straightening out. The feeling is mutual. Instead of telling your side of it again, listen. You may be surprised to find that the other person already knows what you were going to say. To reach accord, toss out the script and come up with something new.

Capricorn (Dec. 22-Jan. 19) Focus on your paperwork. Don't try to avoid it. It'll be a lot more fun if you just get it done. Besides, it looks like you'll be nicely rewarded. Looks like there may be a rebate or a coupon lurking

pile up. Think of this chore not as drudgery, but as a treasure hunt. No telling what you might find in there!

Aquarius (Jan. 20-Feb. 18) Someone in a position of authority could be rather hard to deal with. That person wants all your attention. Don't let personal matters interfere. No private calls on company time, OK? Romance may flourish today, but if it does, it's because you've scheduled it for the right time and place.

Pisces (Feb. 19-March 20) There's been a bit of a conflict between your work and your family responsibilities. You'd probably just as soon go with the family and let the work take care of itself. But wait, don't quit your job! New technology might provide an option that didn't exist before. In other words, perhaps you can have it all. Do a little studying and see what you can come up with.
