HOROSCOPES

- Aries** (March 21-April 19) As the day continues you'll feel stronger. A difficult situation is starting to fade. Win or lose, the tough part's over. Get together with friends to celebrate your victory.
- Taurus** (April 20-May 20) You're about to enter a phase when you can advance in your career, but there will be a test. Hopefully, you've done some studying in the last few weeks. Your luck improves if you are prepared.
- Gemini** (May 21-June 21) Finish the worst of a tough project. Somebody you think is attractive is also ready to relax. Why not go somewhere interesting this weekend? If nobody asks, you do the asking. You're great at that.
- Cancer** (June 22-July 22) The work routine changes, and it's directing attention to you. If you requested a new tool to make the job easier, it will. Things will go slower during the learning phase, however.
- Leo** (July 23-Aug. 22) Your sweetheart could throw you a curve, and it's something you secretly hoped would happen. It's a good time to make a commitment. If the other person doesn't speak up first, get the game going yourself.
- Virgo** (Aug. 23-Sept. 22) Are you trying to change things at home? Are you moving? It's a great time to recycle. Get rid of all the stuff you don't want anymore, which does not necessarily mean your roommate — but it could.
- Libra** (Sept. 23-Oct 22) All the work you've done around your home is starting to pay off. This weekend you'll be ready for rest, relaxation, and romance. Schedule a private conversation, and make a long-term commitment.
- Scorpio** (Oct. 23-Nov. 21) By now you should know what you want, especially in household furnishings. It's a good weekend for a makeover at your place, starting tonight.
- Sagittarius** (Nov. 22-Dec. 21) The facts should be clear by now, so let people know what you really think. Nicely, of course.
- Capricorn** (Dec. 22-Jan. 19) Gather your resources, then figure out how to allocate them. A scheme that's hanging around in the back of your mind is starting to take shape. Don't rush it, let it develop naturally.
- Aquarius** (Jan. 20-Feb. 18) You're getting stronger, and your team is getting more creative. Get together with those who share your goals, to see what you can come up with. It ought to be awesome.
- Pisces** (Feb. 19-March 20) If you've been thinking about asking for a promotion, do it. You might take an older person by surprise, but that's OK. Your boss may have a few surprises for you, too.
