HOROSCOPES

Aries (March 21-April 19) Take it slow and easy again. No need to hurry or attract much attention to yourself. That'll happen soon enough. What you need to do now is prepare. You already have a Plan A. Now, work up a Plan B, a Plan C, and so on. You may need six or seven alternatives.

Taurus (April 20-May 20) Your work should be satisfying, and there's enough pay. You can even put some into savings. But are you happy? Are you singing? Is your talent benefiting those who have less? If not, get going! That's what'll light your fire.

Gemini (May 21-June 21) You're on a fact-finding mission. You have a lot of new information, but what does it mean? Your research isn't ready for publication until you put it into the right context. Consult experts in fields other than your own.

Cancer (June 22-July 22) You're fighting a battle between your dreams and your old limitations. Don't be inhibited by what happened before. That was a past life! Learn from it while still moving forward.

Leo (July 23-Aug. 22) Careful calculations are needed to ensure that you get the best deal. This is not your strong suit. You're better at buying quality, regardless of the cost. That's not a great plan if you're spending someone else's money. If you do choose to handle it that way, you better have good reasons.

Virgo (Aug. 23-Sept. 22) Are you thinking about quitting your job and moving to a radically different environment? Getting a house in the country, or a high-rise condo in the heart of the city? Whatever you're NOT doing looks like the answer. Better not dump your mate, however. You'll need the extra income.

Libra (Sept. 23-Oct 22) Your theory may not work out quite as well as you'd hoped when you try to put it into practice. There's pesky old gravity again, getting in the way of your beautiful visions. Don't worry: You'll think of a way.

Scorpio (Oct. 23-Nov. 21) Provide a shoulder to cry on, or whatever else is needed, to a gentle but sad loved one. This person thinks you're great, and this will really cinch it. You will have no peer in this person's eyes.

Sagittarius (Nov. 22-Dec. 21) Your energy level is even lower than it was yesterday. This is perfectly natural. Your brain is actually working, even though you may be having trouble remembering your name. You'll get by.

Capricorn (Dec. 22-Jan. 19) A new discovery changes everything. You're either doing something the hard way, or doing something that doesn't need to be done at all. If you haven't discovered this yet, keep watching, listening and reading. It'll come to you.

Aquarius (Jan. 20-Feb. 18) Continue to concentrate on practical matters. You'll do well once you focus your attention. Don't put this off until tomorrow. You'll have much more exciting and entertaining things to do then.

Pisces (Feb. 19-March 20) You have a way of being firm when you want to, and everyone admires you for it. They may not agree, but they know you're being true to your principles. Remember that it's love you're teaching, and relax — even if you have to be strict. You are safe.
