Solutions

HOROSCOPES

ARIES You should be able to sit back and watch as others forward your agenda. Nothing wrong with that. It shows that you've learned to delegate. Good work.
TAURUS The money should be rolling in now, and you've earned every cent. Experience, persistence and patience pay off. If not, sign up for a new gig.
GEMINI What is it you're after? Fame? Fortune? A publisher for your novel? Reach out now and grab it! A door that was closed before suddenly opens.
CANCER You might be nervous about making a big purchase. If it's something you need for your home, it should work out. Do the homework and get the best deal you can.
LEO Your friends gladly

provide information, but are you convinced it's true? Be careful not to get involved in a battle you can't win.
VIRGO Look sharp and be respectful. Keep thoughts of insurrection to yourself. You can bring up all those topics later, after you get your next raise.
LIBRA Travel, work on your enterprise, sign contracts, and push through whatever you've been contemplating. Just one warning: It's a better time to finish old business than to start anew.
SCORPIO Pretend you're a mouse under cover while negotiations continue. You'll gain an advantage by hearing them out. They'll discover too late that you're a hawk.
SAGITTARIUS You tend to be a

loner and avoid annoying dependents. The relationship you're most likely to get into now looks like it'll be more fun than that.
CAPRICORN You could feel compelled to do just one more thing, continuing way after dark. Go ahead. It's a slightly stressful condition, but you get a lot of things done.
AQUARIUS Conditions are great for travel and romance, as you may already know. Don't be restricted by your old boundaries. Get out there and try something new.
PISCES You don't have to tell everyone everything. It might not even be possible. With all the talking that's going on, there's nobody listening to you. Don't stress. This should work out just fine.
