HOROSCOPES

**ARIES** You've been tested almost constantly over the past few weeks, but that phase is almost over. Win or lose, you'll soon go on to other things, and most of them will be more fun. **TAURUS** Any way you can get the day off? You may not be quite up to speed yet. It sure would be nice to languish a little longer. Call it preventive medicine. **GEMINI** You're entering an easier phase. You'll be thinking up amazing new solutions to all your problems instead of letting them drag you down. **CANCER** You and your partner ought to discuss your investment strategy. If you don't have a partner, discuss it with somebody who knows about those things.

**LEO** An intelligent partner will be a big help during the upcoming phase. Don't get bogged down in details you don't fully understand. Get expert assistance. **VIRGO** You're entering a technically demanding phase. But if you upgrade your skills and your equipment, your work life will get easier, so don't be out of phase. High tea, lace and doilies; croissants and chocolates; gentle music and fascinating conversations. Better go shopping. **LIBRA** You're liable to run into a nest of forgotten details soon. These are squiggly little nits that can't be left again - they'll only make your life more uncomfortable. Clean them up. **SCORPIO** Fixing up your domestic environment begins to take top priority. Can you

afford to do what you want? As usual, it depends on how much you want it. **SAGITTARIUS** The information you seek is available, and it won't take much digging to find it. Hold onto it, though. Don't spread it around too freely. **CAPRICORN** To take your mind off past troubles, focus on the future. You're entering a phase where great wealth can be yours through imagination and effort. **AQUARIUS** You're getting more confident, and with good reason. An issue that was troubling you has pretty much been resolved. It's time to move on. **PISCES** You can soon share your burden with somebody who shares your goals. It's a lot more fun that way.
