

The Wrong Thing To Do

Joseph Osborne, of Clinton Mills Spinning Department, is shown picking up bottle caps from off the floor. Caps on the floor create a very dangerous slipping hazard as well as a poor housekeeping condition. Often bottle caps cause boxes or trucks to swerve causing injury to person or damage to equipment.

Note also the bottle on the bench. Always return bottles to provided racks and never leave bottles or permit bottle caps on the floor.

We take it for granted that we can hit the road any time of the day or night, travel in any direction, and know that we can find comfortable, reasonably-priced accommodations enroute. Motels have multiplied our mobility.

Here are some good tips on selecting a good motel:

Make sure it is located in a quiet spot. Try to find one
