The management and employees of Clinton Mills are pleased that you are visiting us today. During your tour, you will see the various manufacturing processes from raw fibers to woven greige goods which will be shipped to a wide range of household, industrial, and apparel customers.

We are indeed proud of our employees and the products they produce. Our company is a recognized leader in the textile industry.

In addition to touring our plants, we'd like also for you to see our modern Training Center which is located on Academy Street. It is our wish that your tour will be both enjoyable and informative.

Again, thank you for taking time to learn more about Clinton Mills.
