

### North Carolinian Murdered at Church Door.

Raleigh, Feb. 19.—A special from Williamston to-night says:

While Bi-hop Strange, who is holding a mission here this week, was delivering an eloquent discourse on "Salvation" in the Episcopal church last night, three pistol shots were heard and the ushers of the church rushed out to the gate and found Mr. E. A. McGlawhorne, who had been shot in the chest and seriously wounded by some unknown person.

Mr. McGlawhorne was conscious and said to his son, who was among those who rushed out, that some one arose in the darkness and with the words "You are the man I have been looking for," shot him down.

Mr. McGlawhorne was carried to his house, where every effort was made to save his life, but he died this morning.

### Plain Talks on Fertilizers

How to Get the Greatest Possible Yield per Acre

It is a well-known scientific fact that in order to produce the very greatest possible yield from any soil it must contain an *actual excess* over and above all demands that can possibly be made on it by the plants.

sold to Southern farmers last year; and every year the demand becomes greater.

The best results in producing corn, the good old stand-by crop of the South, follow the application of 200 to 300 pounds of the right

Many farmers will feed their stock as much nourishing food as they can possibly assimilate, yet will starve their crops on the mistaken notion that they are "economizing" on fertilizer. The experiences of farmers, government experts,

and agriculturists everywhere confirm the fact that plants, like animals, need the fullest possible amount of nourishment that they can obtain if they are to be developed to the utmost.

The economy in fertilizers is not in the amount used but in the ratio of quality to cost. Virginia-Carolina Fertilizers are the best in the world for the least money. More than one million tons were

fertilizer. Virginia-Carolina Fertilizers will greatly "increase your yields per acre" of corn or any other crop, even on poor land—and the most wonderful results are produced through its use on good land.
