GREAT IMPROVEMENT IN SEWING MACHINES

Empire Sewing Machine!

Salesroom, 536 Broadway, N. Y.

250 Washington St., Boston,
921 Chestnut St., Philadelphia
Patented Feb. 11, 1860

THIS MACHINE is constructed on entirely new principles of mechanism, possessing many rare and valuable improvements, having been examined by the most profound experts, and pronounced to be

Simplicity and Perfection Combined,

It has a straight needle, perpendicular motion, makes the LOCK or SHUTTLE STITCH which will neither RIP nor RAVEL, and is alike on both sides; performs perfect sewing on every description of material, from leather to the finest Nainsook, with cotton, linen or silk thread, from the coarsest to the finest number. Having neither CAM or COG WHEEL in all the four possible motions, it runs as easy as a Rocking Chair, and is

Emphatically a Noiseless machine.

It requires FIFTY PER CENT less power to propel it than any other machine in the market. A child twelve years of age can operate it steadily without calling a servant to help it.

Its strength and wonderful simplicity of construction renders it almost impossible to get out of order, and is GUARANTEED to perform more work, in a better manner, and with less fatigue to the operator than any other machine in use. We especially invite all those who are in search of a machine that will do their work well, to call and examine this EMPIRE SEWING MACHINE.
