

The Canadian Pacific Company is building five miles of snow sheds in the Rocky mountains, at an estimated cost of \$1,500,000, a fact which suggests one item of the expense of operating railways over the snowy ranges of the great continental divide.

The Rev. Dr. A. H. Lewis writes in the *Popular Science Monthly* on the origin and results of Sunday legislation. His contention is that the day was first instituted by pagan sun-worshippers, and that it has only been possible to maintain its status in Christian nations by the constant exercise of the authority of the State.

By a curious coincidence, two persons with bullet wounds in the head were received at the London hospital on the same day recently. More remarkable is the fact that, though in each case the bullet was driven into the brain too deeply for extraction, both patients have been discharged convalescent. These marvelous recoveries from what, a few years ago, would have meant certain death, illustrate the effects of superior surgical skill and the modern antiseptic method of treating wounds.

Few persons on visiting a museum consider that such objects as skeletons require a certain fitting for exhibition. Yet the preparation of skeletons for the market constitutes a distinct industry, to which a large manufactory in the suburbs of Paris is devoted. Corpses are supplied from dissecting-rooms and hospitals. On its delivery the raw material is boiled for days in a cauldron, and the grease which rises to the surface is skimmed off and sold. The bones are carefully assorted and converted into artificial skeletons. The preparation of frogs, lizards and various reptiles occupies a separate department.

A man who has studied the various phases of the matrimonial market has come to the conclusion that every woman has some chance to marry; it may be one to fifty or it may be one to one. Representing a woman's entire chance at 100, he has made out the following table to show the chance at certain points of time.

Between 15 and 20 years...	14 1/2 per cent
Between 20 and 25 years...	18 per cent
Between 25 and 30 years...	18 per cent
Between 30 and 35 years...	13 1/2 per cent
Between 35 and 40 years...	3 1/2 per cent
Between 40 and 45 years...	2 1/2 per cent
Between 45 and 50 years...	1 1/2 per cent
Between 50 and 55 years...	1 1/2 per cent
After 55 it is one-tenth of one per cent, or one chance in 1,000.	

The final estimates for the gigantic iron tower which is to be a feature of the French exhibition of 1889 are now ready. The state will contribute 1,500,000 francs, and the remaining sum of 6,000,000 francs will be furnished by the contractors, who will acquire possession of the tower for twenty years. There is still some dispute about its height. The difficulty will shortly be solved in this way: A captive balloon will be let up to the proper height, and four cables, reaching down to the ground, will represent to the eye the four edges of the tower. At intervals flags will be hung to mark out the positions of the several stories.

Charles L. Webster, senior member of the firm that is publishing Gen. Grant's book, said recently that he had just handed to Mrs. Grant the firm's check for \$150,000, the second installment due her under the General's contract. Her seventy per cent. of the profits on the sale of the book will continue during the twenty-eight years of copyright protection secured to the work, so that she will doubtless receive anywhere from \$600,000 to \$700,000. Mr. Webster also said that his firm contemplated publishing an edition de luxe of the book, each copy containing portions of Gen. Grant's original manuscript. The edition will probably be limited to 500 or 1,000 copies, and will be sold for \$100 each.

An association of Alabama, Georgia, Virginia, New York and Philadelphia capitalists, called the North Birmingham Land Company, has been formed at Birmingham, Ala., with a capital of \$700,000. The coal-belt coal mining property, with a daily output of 500 tons, is included in the purchase made by the company from the Richmond & Danville extension. Its mining capacity will be increased and a large iron furnace with numerous coke ovens will be erected at once. The site of the plant is on Village Creek, not quite two miles north of Birmingham. The company owns 12,500 acres of coal and farm lands, and proposes building a suburban town and engaging in extensive manufacturing.

After nearly three years of study and deliberation, the manner of lighting the Bartholdi statue of "Liberty Enlightening the World" has been definitely decided upon. The plan adopted is one which is in conformity with the general design of the statue itself, and which adds to its beauty in a marked degree. The torch of the statue contains eight lamps of 6,000 candle power, the light from which is thrown directly up into the clouds. This powerful beam, together with the cloud illumination, constitutes a beacon visible probably a hundred miles out to sea, and is, thus, afar off, symbolic of the light and liberty to be enjoyed by the visitor to our shores. At the foot of the statue four or eight lights of 6,000 candle power each are distributed. Their light is reflected upon the statue and illuminates it brightly. All these are lamps are invisible themselves, so that the objections raised by the river pilots against the blinding effects of the light are entirely removed. Besides the are lights all around the statue, the diadem upon the head of the figure of Liberty contains incandescent lamps, to give the effect of jewels. The whole plan is undoubtedly an excellent one, and cannot fail to make the statue even more imposing at night than in the day-time.

THE PRESIDENT'S VISIT.

Attending the Virginia State Fair at Richmond.

Making a Speech to the People at the Fair Grounds.

President Cleveland some time ago accepted an invitation to be present at the opening of the Virginia State Fair in Richmond on the 21st. A Richmond dispatch gives the following account of his visit: The President arrived here upon a special train at 10:30 a. m. today. He was accompanied by the Secretaries of State and War, the Postmaster-General, the Commissioner of Agriculture and Colonel A. S. Buford met the party at the station in Washington and escorted them higher. The train consisted of a new Pullman palace car, a Pullman dining car, a Pullman baggage car, and one passenger coach. Breakfast was served on the train immediately after leaving Washington. At Fredericksburg, where the train arrived at 1:30 p. m., a large number of the townspeople cheered the Presidential party. A stop of five minutes was made during which the President appeared on the platform of the car, and being introduced to the crowd by General Wickham, shook hands with many of the people as could be seen from the train. The train then proceeded to the fair grounds, where it was met by a large number of the townspeople. The President was introduced to the fair grounds by the Commissioner of Agriculture, and was received by the fair board.

When President Cleveland alighted and was recognized he was greeted with cheers, and quickly as possible he was escorted to a carriage drawn by four white horses. The remaining members of the Presidential party were placed in other carriages. The President was then escorted to the fair grounds, where he was met by the fair board. The President was then introduced to the fair grounds by the Commissioner of Agriculture, and was received by the fair board. The President was then introduced to the fair grounds by the Commissioner of Agriculture, and was received by the fair board.

The President was then introduced to the fair grounds by the Commissioner of Agriculture, and was received by the fair board. The President was then introduced to the fair grounds by the Commissioner of Agriculture, and was received by the fair board. The President was then introduced to the fair grounds by the Commissioner of Agriculture, and was received by the fair board.

The President was then introduced to the fair grounds by the Commissioner of Agriculture, and was received by the fair board. The President was then introduced to the fair grounds by the Commissioner of Agriculture, and was received by the fair board. The President was then introduced to the fair grounds by the Commissioner of Agriculture, and was received by the fair board.

NEWS SUMMARY.

Eastern and Middle States.
The New York City Republicans have nominated Theodore Roosevelt for Mayor. Some people who believe they are heirs to a large slice of land in the upper part of New York City worth \$30,000,000 are about to bring suit to get it.

The South Boston Iron Works, where many of the Government cannon are made, has shut down through inability to pay the workmen.

Snow storms are reported from the Catskills and the White Mountains.

The Pennsylvania Supreme Court has just rendered a decision affirming the decree of a lower court that the Pennsylvania Railroad be debarred from purchasing or controlling the South Pennsylvania Railroad Company, organized to build a parallel and competing line.

The bondsman of ex-Alderman Sayles, who recently fled from New York to Canada rather than stand trial for bribery in connection with the Broadway horse-car charter, has paid the city the \$25,000 forfeited bond.

Mr. BLAINE has been addressing large Republican meetings in Pennsylvania.

A negro escaped from his quarters in a Boston museum, sattered the spectators, and was only (aged after a lively fight with four men) taken into custody.

FOUR of the railroad magazines charged with bringing the New York Aldermen of 1881 to grant the Broadway horse-car charter were hauled into court on the 19th, as follows: James Sharp, John A. Ryan, John James W. Fosbury and Thomas B. Kerr. They were each required to give \$50,000 bail.

SENATOR EDMUNDS has been elected to the United States Senate by the Vermont Legislature.

SAYLES, ex-Minister to Turkey, was nominated to Congress by the Democrats in a New York City district shortly after his return from Constantinople.

South and West.
A RELIABLE committee investigating the destruction of Sabine Pass, Texas, by an inundation reported on the 14th that 101 persons were missing, of whom ninety were known to have been drowned. Thirty-five of these victims are white, and fifty-five colored. The total weight of this stupendous disaster was brought by the committee in a steamer to Beaumont, Texas. At Johnson's Bayou, La., thirty-seven bodies were recovered, and sixty-five persons were reported missing. The remaining loss in Plaquemine Parish, La., is put at \$500,000.

ARMOUR, the king of Chicago pork packers, has issued the following ultimatum to his employees, who have struck against a proposed reduction of wages: "Ten hours or nothing."

BILOXI, a summer resort in Mississippi, on the Gulf of Mexico, has been again put under rigid quarantine on account of the reappearance of a case of a malignant type of yellow fever.

A FIRE has swept away nearly the entire business portion of Salisbury, Md., causing an estimated total loss of between \$500,000 and \$1,000,000.

Many suffering prevails among survivors of the late Sabine Pass, Texas, and Johnson's Bayou, La., and appeals for aid have been issued.

The strike of Chicago pork packers ended unexpectedly on the 14th, the men returning to work on the terms of the employers—ten hours a day's work instead of eight, as heretofore.

A SPECIAL train was leaving the Chicago stock yards with 100 discharged Pinkerton detectives, who had been guarding the yards in view of the strike. A crowd of strikers began yelling and throwing stones. A stone-throwing confound, and finally it was returned by a volley from some of the detectives. The strikers were then arrested.

FIVE men were instantly killed and nine more fatally injured by the fall of a construction train over an embankment near Fairfield, Neb.

The Knights of Labor Assembly at Richmond on the 20th. Salaries of officials were increased as follows: Grand Master Workman Powderly from \$1,500 to \$2,000; salaries of Secretary and Treasurer from \$1,000 to \$1,500; and of the Grand Secretary from \$500 to \$1,000. A CONGRESS of the "Association for the Advancement of Women" has been holding its first session in Louisville, Ky. Mrs. Julia Ward Howe presided, and other noted ladies attended.

OAKLAND, ILL., has lost nearly all its business section by a fire; aggregate losses over \$3,000,000.

The greatest fire ever known in the North-west has been raging in the Turtle Mountain region, Dakota. Over 200 square miles of prairie and timber land have been burned, with a large number of houses and barns, great quantities of crops, and all kinds of stock. The losses will aggregate \$1,000,000.

Washington.
SECRETARY MANNING is again at work in the Treasury Department.

PRESIDENT CLEVELAND on the 15th went on a short deer hunting and fishing trip along the Blackwater River in West Virginia.

THE President has appointed Dabney H. Maury to be United States Envoy Extraordinary and Minister Plenipotentiary to the United States of Colombia.

GOVERNOR WEST, of Utah, in his annual report recommends additional legislation for the suppression of polygamy.

THE shipment of ice from Chicago to San Francisco by train ran on a passenger schedule, to prevent loss by melting, is the latest commercial feat.

MR. CHEVREUL, the French chemist who recently passed his one hundredth year, has lived to see in France four Kings, two Emperors and three Republics.

STATUE OF LIBERTY.

Description of the Great Statue in New York Harbor.

The Gift of the French People to the American People.

The unveiling of Bartholdi's great statue of "Liberty Enlightening the World" at Bedloe's Island in New York harbor, October 28, makes the following description of the magnificent gift of the French people to the American people both timely and interesting:

This new wonder of the world, now placed in position on its pedestal, on Bedloe's Island, the site selected in New York harbor by General William T. Sherman, as authorized under the act of Congress, February, 1877, deserves more than a passing comment, because of the nature of the gift, and the world. Some idea of its magnitude may be obtained from the following facts: Looking up 305 feet above tide-water, the height of the statue is 151 feet to the top of the pedestal 91 feet, and the foundation 52 feet, 10 inches.

The statue is constructed of copper sheets 5-16 of an inch thick. The forefinger measures 8 feet in length and 5 feet in circumference at the second joint. The nail measures 14 inches in length by 10 in breadth. The head is 14 feet high. The eye is 23 inches in width. The nose is 3 feet 3 inches long and 4 inches wide. The ear measures 17 inches in length. The weight of the statue is 440,000 pounds, of which 176,000 pounds are copper, the remainder being wrought iron.

About forty persons can find standing room within the head. A six-foot man standing on the level of the lip just reaches the eyebrow. Fifteen people might sit around the flame of the torch, which elevation is 24 feet above the level of the water.

The manner of properly lighting the statue by means of electricity has been carefully studied during the past three years, and some of the most eminent electricians in the world have been consulted. The system adopted embraces a powerful electric light from the torch, the illumination of the face, and the lighting of the statue by the diadem. The means for procuring the necessary plant was voted by Congress.

While discussing our goddess, let us turn for a moment to her history, mythology, and the centuries before the birth of Christ. The elder Pliny informs us, that at the entrance of the Port of the City of Rhodes, there stood the most celebrated statue of antiquity, "The Goddess of the Sun," a statue of Helios, the Sun-God, made of brass, and 107 feet high, costing the sum of 306 talents, or about \$35,000. After being erected it stood only 20 years, being thrown down by an earthquake 24 years before Christ was born. The spot where it fell 900 years, being finally sold to a speculator for old brass.

After the Grecian epoch we pass on to modern times, and to the efforts of the great sculptor Bartholdi, who has devoted eight years of his life and a part of his private fortune to the completion of a task so nobly and generously supported by the French people.

SABINE PASS.

Further Particulars of the Flood—Great Loss of Life.

Further particulars of the great disaster at Sabine Pass have been received. The situation has not been exaggerated in the least. A correspondent telegraphs that the turkey buzzards are soaring over Sabine for miles around on land and water. It is one vast charnel house. There are 137 persons missing and probably dead.

Unbearable suffering, heartrending incidents, and a scene of horror are being witnessed. One house containing fourteen colored people was seen to go down with a crash, and every one of them was lost. Incidents are related of bodies floating in the water, and of people being killed by the falling of the water.

When the Government tugboat *Paros* reached Sabine Pass, the water was found rowing around the delta looking for the bodies of his family. He said: "Myself, wife, and three children were clinging to a piece of drift wood, and were nearly drowned. I was holding the youngest, and soon my wife said, 'Go by, husband, I am going.' I could not reach her. She was a brave woman, and she said, 'I will go.' I held on to the youngest child, named Pearl, some time longer. The child, adding me, said: 'Papa, I don't want to go.' I was nearly drowned. I was holding the youngest, and soon my wife said, 'Go by, husband, I am going.' I could not reach her. She was a brave woman, and she said, 'I will go.' I held on to the youngest child, named Pearl, some time longer. The child, adding me, said: 'Papa, I don't want to go.' I was nearly drowned. I was holding the youngest, and soon my wife said, 'Go by, husband, I am going.' I could not reach her. She was a brave woman, and she said, 'I will go.' I held on to the youngest child, named Pearl, some time longer. The child, adding me, said: 'Papa, I don't want to go.' I was nearly drowned. I was holding the youngest, and soon my wife said, 'Go by, husband, I am going.' I could not reach her. She was a brave woman, and she said, 'I will go.' I held on to the youngest child, named Pearl, some time longer. The child, adding me, said: 'Papa, I don't want to go.' I was nearly drowned. I was holding the youngest, and soon my wife said, 'Go by, husband, I am going.' I could not reach her. She was a brave woman, and she said, 'I will go.' I held on to the youngest child, named Pearl, some time longer. The child, adding me, said: 'Papa, I don't want to go.' I was nearly drowned. I was holding the youngest, and soon my wife said, 'Go by, husband, I am going.' I could not reach her. She was a brave woman, and she said, 'I will go.' I held on to the youngest child, named Pearl, some time longer. The child, adding me, said: 'Papa, I don't want to go.' I was nearly drowned. I was holding the youngest, and soon my wife said, 'Go by, husband, I am going.' I could not reach her. She was a brave woman, and she said, 'I will go.' I held on to the youngest child, named Pearl, some time longer. The child, adding me, said: 'Papa, I don't want to go.' I was nearly drowned. I was holding the youngest, and soon my wife said, 'Go by, husband, I am going.' I could not reach her. She was a brave woman, and she said, 'I will go.' I held on to the youngest child, named Pearl, some time longer. The child, adding me, said: 'Papa, I don't want to go.' I was nearly drowned.
