

THE BAKER'S BILL

of Greatly Increased Appetite
affords me great pleasure to tell not only
condition of my present health but also
that of my whole family. A friend who
knew of my poor health advised me to
use Hood's Sarsaparilla. After two bottles
a great change in my health was noticed.
I do not have that tired feeling, no pain in the
stomach, especially after eating, and in
fact I feel like a new person and hold some
pleasure in life. Every member of my family
is using Hood's Sarsaparilla and with beneficial
results. If I may my baker's bill each week. Hood's

Cures
Biliousness, 25 cents

Keep On Their Pins.

There are some horses that have
been seen to lie down in the
stable as a horse fancier. "Some
that continue to work for
always sleep standing, but their
is not complete, and their joints
stiffen. Young horses
the country are liable to refuse
down when first placed in a
in town, and the habit may be
confirmed unless special pains
taken to prevent it. Sick horses
apt to refuse to lie down.
seem to have an instinctive fear
they lie down they never will
to get on their feet again. I
made a horse seventy miles in a
day. I put the animal in as
comfortable a stable as could be made
he stood up all night, going to
with his breast against the
rider."—New York Dispatch.

August, 1894, there were 5785
flags lying the British flag, 810
German, 510 the Norwegian, 503
French, 462 the Swedish, 430 the
American, 359 the Spanish, 213 the
Danish, and 1382 the flags of other
nations.

Our Great Grandfather's Time.

big bulky pills were in
general use. Like the
"blunderbuss" of
that decade they
were big and clumsy,
but ineffective. In this
century of enlightenment,
however, we have
Dr. Pierce's
Pleasant Pellets,
which cure all liver,
stomach and bowel
derangements in the
most effective way.

Now and then, with a gentle,
laxative, thereby removing
matter from the stomach and
acting on and invigorating the
digestive system, thereby
quicken the cause of a
of distressing diseases, such as
indigestion, or dyspepsia,
rashes, blotches, eruptions,
constipation, piles, fistulas and
as too numerous to mention.
people would pay more attention to
regulating the action of their
they would have less fre-
quency to call for their doctor's
to subdue attacks of dangerous
diseases.

of all known agents to accom-
plish this purpose, Dr. Pierce's Pleasant
Pellets, is proven by the
fact that once used, they are always
their secondary effect is to keep
bowels open and regular, not to fur-
tunate, as is the case with other
laxatives. Hence, their great popularity,
derived from habitual constipation,
indigestion.

New Palace of the German Imperial Parliament.

The new Imperial Parliament House
in Berlin, which has cost upward of
\$7,000,000, is one of the most striking
of the public buildings in Europe. It
was planned to be an appropriate out-
ward expression of the legislative
majesty of the German Nation.
When the foundation stone was laid
in 1884 by Emperor William I, Bis-
marck, as one of the main founders of
the Empire, struck the stone with the
builder's hammer. As he did so, he
said:
"Be this house forever a symbol of
those indissoluble bonds which in the
days of glory and enthusiasm united
lands and sections in the German Em-
pire."

The palace stands on the east side
of the broad Koenigsplatz, in the
centre of which rises to a height of
200 feet the monument of Victory,
commemorating the three campaigns

(1864, 1866 and 1870) which made
Germany one. It may be said that
the building, which seems to be a mix-
ture of many styles, is not altogether
in harmony with the general architec-
ture of the German capital or with
German architecture generally, but
what it may lack in harmony it makes
up in hugeness and in those florid
details which seem to dominate latter-
day Teutonic art.

The central dome of glass is sur-
mounted by a gorgeously gilded cup-
ola. The interior has been done
with great elaboration, the carved
woodwork of the assembly hall and
committee rooms being exceedingly
rich. The entrance hall is adorned
with a large stained glass window, em-
blazoned with the arms of all the Fed-
eral States and free cities, and the
light falls on a rich mass of variegated
colors on the marble floor.

An Ancient Kettle.

Among the riches of mineral wealth
and the products of the metallurgical
arts in the mining building at the
World's Columbian Exposition, in
Chicago, there was not anything
which attracted more serious interest
on the part of those acquainted with
the founding of metals than a modest
glass case in the gallery of the build-

FIRST AMERICAN CASTING.

ing, containing a tiny iron kettle, of
about one quart capacity, swinging
on a miniature crane. The cause of
this attraction was not due to any pec-
uliarity of design or material or skill
in workmanship, but to the fact that
the kettle was well authenticated as
the first casting made in America and
the precursor of the vast iron industry
of the country.

The kettle was cast at the Saugus
Iron Works at Lynn, Mass., in 1642,
probably in the autumn, and was given
to Thomas Hudson, as the consid-
eration for sixty acres of land, com-
prising a portion of the iron works
property. This Thomas Hudson
was, undoubtedly, the younger brother
of that name, of Henry (Hendrik)
Hudson, the eminent English naviga-
tor. The kettle was kept as an heir-
loom in the direct descent from
Thomas Hudson, for over a century,
when it passed into the female line,
and thence back into the possession
of John E. Hudson, Esq., of Boston,
a direct descendant, who pre-
sented it to the city of Lynn a few
years ago. A number of the citizens
caused it to be placed in a suitable
case, with a table, and it is now kept
in the city hall.—Cassier's Magazine.

The Devastating London Fog.

Epping Forest, one of the few re-
maining stretches of primeval wood-
land in the vicinity of London, is not
alone sustaining destruction by the in-
vasion of rows of jaunty modern villas,
but even the trees that remain are be-
coming sophisticated and cockney.
The hickens and cryptograms once so
common in the beautiful forest have
almost entirely disappeared, and the
vanishment is attributed to the en-
croachment of London fog and smoke.
This is not a far-fetched idea, as it is
stated that the famous hop gardens of
the County Kent, in the vicinity of
Maidstone, thirty miles away from the
metropolis, sometimes show the effect
of the London fog. One can readily
understand why the recent story by a
sensational novelist of the sudden as-
phyxiation of the whole 4,000,000 of
the people of the great city, by means
of a sudden and dense fog, should have
bred a deep alarm, and have started a
discussion that will not down, as to
possible remedies.—Atlanta Journal.

The Colorado Aspens.

I asked the timber expert at the
Agricultural Department, writes W.
E. Curtis, from Washington, why it
was that aspen or poplar trees almost
always sprung up on the mountains of
Colorado when the pines were cut
down, like the scrub oak in Wisconsin
and the black alder and maple in
Oregon and Washington. He said it
was the unexceptional rule that the
second growth of timber in the West-
ern forests differed from the first. It
was usually of some soft variety of
wood which grew from hardy seeds
that were blown in by the wind and
lodged under the leaves and moss,
where they germinated and retained
their life under the shadow of the
virgin forest until it was cut down
and the sunlight was allowed to reach
them. Then they always sprung up
with great rapidity and dense growth
—Chicago Record.

A Feast for the Monkeys.

A feast was given recently at Fyza-
bad to 1000 monkeys, 500 Bairagis,
and 100 Brahmins. A man who
has been successful in a commercial
enterprise gave the feast in fulfillment
of a vow made to the monkey god,
Hannuman. Mounds of sweetsmeats
were brought in for the entertainment,
but the monkeys were first fed on
soaked grain, in order that the con-
sumption of sweetsmeats by them might
be less.—New York Dispatch.

The population of Spandau, the
Prussian fortress town, has increased
within the last eight years from 30,
000 to 60,000.

Head of the House of Vanderbilt.

Cornelius Vanderbilt, the head of
the house and the principal heir
to the fortune founded by the
famous old Commodore, is a
modest and hardworking gentleman,
in violent contrast with many other
flamboyant trifiers who move in his
ultra exclusive social set. He seems
to have a horror of publicity, and his
many acts of philanthropy have been
done without ostentation. Hereto-

fore he has devoted his attention to
his private affairs, the direction of his
vast railroad interests and church
work, but recently he has given indi-
cations of his intention to take a more
active part in public matters. When
the Committee of Seventy was formed
in New York City to institute reforms
in the municipal government he en-
rolled his name, and this is cited as
his formal entrance into politics.

HOUSEHOLD MATTERS.

BOILED TOMATOES.

Cut the slices lengthwise and rather
thick. Lay them on a gridiron over a
rather slow fire. Spread some melted
butter over the slices with a brush.
As soon as the under side is broiled
turn each slice over and spread with
butter. When done, dish, salt and
serve hot. A little butter may be
added when dished, according to taste.
—Boston Cultivator.

CALF'S HEAD DRESSED AS TERRAPIN.

Have the head split open and
thoroughly cleaned. Put into a stew
pan with just water enough to cover
it, and six or eight small onions. Let
it cook until quite tender. Take up
the head and cut it into pieces as you
would a terrapin. Put one-fourth of
a pound of butter in a frying pan and
stir until it is browned, then add three
onions chopped fine, cayenne and
black pepper, salt, a little sweet mar-
joram and a little of the water in
which the head was boiled. Into this
gravy put the pieces of meat. Boil
six or eight eggs hard, chop them fine
and mix all through the gravy. Gar-
nish with forcemeat balls, made of
veal or cold turkey, and a little of the
brains mixed. Season as usual. Roll
into balls, fry in boiling fat and drain.
Make the rest of the brains into brain
cakes, seasoning with salt and pep-
per.—Boston Cultivator.

HOUSEHOLD HINTS.

If salt is mixed with the flour be-
fore stirring in the gravy it will pre-
vent lumps.

Oyster or clam shells put against the
bricks of a furnace or range are a
remedy for drinkers.

The hair should be brushed often
and combed little. The brush is a
great beautifier of the hair.

A mustard plaster when mixed with
the white of an egg instead of water
will draw, but will not blister.

Tumblers that have contained milk
should never be washed in hot water,
as it clouds the glass permanently.

In making cakes if four eggs are
called for two will be sufficient if two
tablespoonsful of corn starch are used.

By mixing a tablespoonful of lemon
extract and about a third of a tea-
spoonful of vanilla, you will have a
new flavor.

After you have given the baby his
bath, thoroughly wash the sponge and
all other little accessories of his toilet
and dry in the sun.

Manicure your nails thoroughly
each day, but remember that the use
of powders and pastes to increase their
brilliance is in bad taste.

When anything has been accident-
ally made too salt it can be counter-
acted by adding a teaspoonful of vine-
gar and a teaspoonful of sugar.

Chop half a cup of dates and mix
with the warm breakfast cereal that
is taken with milk, not cream, and you
have one of the most wholesome of
breakfast dishes.

Rub the hands with a stick of celery
after peeling onions, and the odor will
be entirely removed. Onions may be
peeled under water without offence to
the eyes or hands.

Surplus soups and gravies should
not be allowed to remain in the pot in
which they are cooked. Pour into
covered earthen bowls and set in a
cool place until needed.

The annoyance of a rough griddle
when baking cakes may be overcome
by rubbing it with a slice of raw
turnip. Those who have used it say
that it makes the griddle smooth as
glass, and cake baking, therefore, an
easy operation.

To clean gold lace trimming and
fringe, soak the articles in benzoline,
take out wet and scrub lightly with a
small brush, using a little plaster of
Paris dry on the brush. After brush-
ing, rinse in some clean benzoline and
dry in clean rags.

Heart disease—that is, the fatal
variety—is most common in England,
and is almost unknown in Mexico.

Quaint But Full of Meaning.
"A crick"—"a stitch"—"a twist"—"a
jam"—"a halt"—"a raw spot"—"a blue
spot"—"dead aches," etc., are queer names
well known among the fads of flesh, bone,
muscle, nerves and joints, and are better un-
derstood as being so easily and surely cured
by St. Jacobs Oil. The names are pointers
to what it has done and always will do read-
ily. None too readily, either, for many of the
infirmities indicated by these queer
nomenclatures, if neglected, often lead to
very serious results, which the great remedy
for pain stands ready to resist and prevent.
None the less useful is it to have on hand al-
ways ready, for the sudden pain is very often
the fatal one.

The enormous supply of Florida oranges
will make them cheap.

Laboratory Birmingham, N. Y.

Illinois farm lands contain 32,500,000
acres, worth \$1,010,000,000.

\$100 Reward. \$100.
The reader of this paper will be pleased to
learn that there is at least one dreaded disease
that science has been able to cure in all its
stages, and that is Catarrh. Hall's Catarrh
Cure is the only positive cure known to the
medical fraternity. Catarrh being a constitu-
tional disease, requires a constitutional treat-
ment. Hall's Catarrh Cure is taken internally,
acting directly on the blood and mucous
surfaces of the system, thereby destroying the
foundation of the disease, and giving the pa-
tient strength by building up the constitution
and assisting nature in doing its work. The
proprietors have so much faith in its curative
powers, that they offer One Hundred Dollars
for any case that it fails to cure. Send for list
of testimonials. Address

son's Eye-water. Druggists sell at 25c per bottle.

A Savings Bank's Guarded Treasure.

The Old Norwich Savings Society,
the second richest bank of Southern
New England, has about completed its
magnificent building at Main street
and Broadway, Norwich, Conn.; it is
three stories high, of cream-colored,
unfired stone.

The Norwich Savings Society has
deposits of over \$9,000,000, and next
after the Pratt Street Savings Bank,
of Hartford, is the richest savings
bank in Connecticut. The building
will cost about \$100,000. Its style is
Romanesque. The inner walls are of
fire-proof, hollow brick, iron-faced.
The interior fittings are in marbles
and polished woods. It is absolutely
fire-proof.

The most remarkable feature of the
building, perhaps, is its wonderful
great vault, which embodies the latest
ideas for the construction of burglar-
defying devices. The new vault is
fourteen feet six inches long, ten feet
four inches wide, and eleven feet high.
Its walls are five inches thick, being
composed of alternate plates of iron
and steel. Its exterior is of bronze
plating. The massive and immense
outer door has an automatic locking de-
vice, being equipped with triple time-
locks. Fifty seconds after the door
has been closed, twenty great bolts
noiselessly slip into their places, and
they stay there until the clockwork
relieves them. The massive inner
door is also equipped with a double
combination lock and a triple time-
lock. And inside this door is a day-
gate of brass and wicket, which is
closed by gravity, and cannot be
opened without a key. The interior
of the vault is divided into two com-
partments. In one are three com-
bination safes, and there are shelves
for papers. The other compartment
is reached through a metal door five
inches thick, which has two combina-
tion locks and a triple time-lock. In
this chamber are iron shelves pro-
tected by gates, and on these shelves,
so securely guarded by doors and
gates, that a man must turn sixteen
locks in order to enter there, are
stored the securities of the bank, rep-
resenting millions of dollars.—New
York Tribune.

The New Diphtheria Cure.

The officials of the Marine Hospital
Service, Washington, have been noti-
fied that a firm of manufacturing
chemists at Detroit, Mich., is making
preparations for the manufacture
of anti-toxin, the new remedy for
diphtheria which has created such
widespread interest in Europe. This
is believed to be the first house of its
character in the United States to be-
gin experiments. It is reported that
this firm has established a bacteri-
ological department where the experi-
ments will be carried on under the di-
rection of competent scientists.
Healthy young horses have already
been inoculated with the toxin, but it
is expected that it will be three or four
months yet before the results of the
experiments can be announced, as the
processes are not only delicate, but
tedious. The strength of the toxin
obtained from the cultures of diph-
theria bacilli, and the strength of the
anti-toxin, is ascertained by experi-
ments upon mice and guinea-pigs.—
New York Post.

Breaches reaching to the midcalf
are mentioned as parts of the Roman
uniform B. C. 67.

BEECHAM'S PILLS

(Vegetable)

What They Are For

- | | | |
|------------------|------------------------|-----------------------|
| Biliousness | indigestion | sallow skin |
| dyspepsia | bad taste in the mouth | pimples |
| sick headache | bad breath | torpid liver |
| bilious headache | loss of appetite | depression of spirits |

when these conditions are caused by constipation; and con-
stipation is the most frequent cause of all of them.

One of the most important things for everybody to
learn is that constipation causes more than half the sick-
ness in the world; and it can all be prevented. Go by
the book.

Write to B. F. Allen Company, 365 Canal street, New
York, for the little book on CONSTIPATION (its causes con-
sequences and correction); sent free. If you are not within
reach of a druggist, the pills will be sent by mail, 25 cents.

YOUNG MEN AND WOMEN GOING TO SCHOOL \$100

Should know that one hundred dol-
lars pays entire expense of tuition,
books, stationery, board, room rent,
fuel and lights at the most celebrated practical school in the U. S.
EASTMAN BUSINESS COLLEGE offers courses of instruction in Bookkeeping, Banking, Correspond-
ence, Com'l Law, Com'l Arithmetic, Penmanship, Stenography and Typewriting. The Academic Branch

Scott & Bowne, N. Y. All Druggists. 50 cents and \$1.

No Substitutes

For Royal Baking Powder. The "Royal"

is shown by all tests, official, scientific, and prac-
tical, stronger, purer, and better in every way
than all other Baking Powders. Its superiority
is privately acknowledged by other manufac-
turers, and well known by all dealers.

If some grocers try to sell another baking
powder in place of the "Royal," it is because of
the greater profit. This of itself is good evidence
of the superiority of the "Royal." To give greater
profit the other must be a lower cost powder, and
to cost less it must be made with cheaper and
inferior materials, and thus, though selling for the
same, give less value to the consumer.

LOOK with suspicion upon every attempt to palm off
upon you any baking powder in place of the
"Royal." There is no substitute for the "Royal."

A Kiss Made His Fortune.

A kiss once played an important
part in the life of the famous Belgian
statesman, Frere-Orban. In his youth
the future Minister was a poor student,
bearing the simple name of Frere.
He had great difficulty in earning
enough money to keep him at the uni-
versity till he was ready to pass his
examination in the department of law.
The young man fell in love with a
Frau Orban, the daughter of a
wealthy and aristocratic family, who
opposed his suit.
"If you pass your examination well
to-morrow," said Frau Orban on the
eve of the trial to her lover,
"come to the theatre and to the box
in which I shall be sitting with my
parents."
"Will they allow me?" asked the
student.
"I shall see to that," was the de-
termined young woman's answer.
Frere was successful and entered
the box in the evening happy but
frightened. The pretty girl, as soon
as he had crossed the threshold, stood
up, rushed toward him before a word
was spoken, and kissed him heartily
on the lips. The astonished parents
were soon informed of the significance
of the kiss by the daughter. As many
other people had seen the young girl's
action, the parents decided to make
the best of it and accepted young
Frere as a son-in-law on condition
that he add Orban to his name. This
he did as a matter of course and made
it famous.—New York Tribune.

With One Mule.

With one mule Mr. V. A. Hoffman,
near Holly Springs, made the follow-
ing crops this season: Three hundred
and thirty bushels of sweet potatoes,
sixty-five bushels of Irish potatoes,
spring crop, and forty bushels fall
crop; three bales of cotton, 100 bush-
els of cotton seed, 2000 bushels of
fodder, twenty bushels of peas, five
bushels of peanuts, three tons of hay,
445 bushels of corn.—Jackson (Miss.)
Clarion-Ledger.

Mississippi's Deep Water.

A complete revolution of the Gov-
ernment's system of river improve-
ment is in prospect. Plans to that
end have already been made, and some
experimental work accomplished
which promises mutual benefit to the
commercial interests of St. Louis and
the entire country. The subject of
dredging the Mississippi River along
its whole navigable length is now re-
ceiving the earnest consideration of
the Mississippi River Commission, the
members of which are at present on
an inspection tour of the big stream
from St. Louis, Mo., to the Gulf. Ex-
perimental work with a dredge spe-
cially constructed promises the success
of extended operations.—New York
Press.

TO SINGERS.

The girls who put up my Medical
Discovery all go to our Warren Street
Methodist Church and two of them sing
with great pleasure to themselves and
others. One of them came to me one
day, saying, "Dr. Kennedy, I must
tell you what good the Discovery is
doing in our church."

"Glad to hear that," said I.
"Well," she went on, "When I was
so hoarse last Spring, you said it
seemed like INWARD HUMOR and ad-
vised me to begin at once with the
Discovery. I did so and in one month
the hoarseness was all gone and my
voice had improved so much several of
our church mentioned it. Of course
I told them you had advised the Dis-
covery and I was taking it. In fact,
one of the girls said, I want to try it
too, and the fact is that the whole
church, I might say, found out that
KENNEDY'S MEDICAL DISCOVERY
would cure their throats and pimples
and many other troubles."

"All due to Inward Humor," said
I, and that's what I explain in my
little book which I send to any one
who asks for it, and my Medical Dis-
covery is sold in your town.

Yours truly,
DONALD KENNEDY, Roxbury, Mass.
