

Indians Seldom Need Dentists.

"An Indian came to my office and had a tooth filled and another extracted," said a Waterville (Me.) dentist. This dentist went on to say that he had been practicing dentistry for over thirty years, and this is the first time in all his experience he has ever done any work for an Indian, or had ever known of an Indian having anything done to his teeth.—Boston Herald.

Every man who has great faith, has great power for good.

Dobbin's Flamingo-Borax Soap is the only floating soap that contains Borax. For toilet or laundry use it is incomparable. A perfect soap for all uses. Try it once. You'll use it always. Order of your grocer. Red wrapper.

Bluff City, Tenn., boasts of a pumpkin sixty-five inches in diameter which is still growing on a vine belonging to Mrs. William Beech.

Just try a 10c box of Cascarets, the finest liver and bowel regulator ever made.

Deafness Cannot be Cured
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflammation of the mucous membrane of the Eustachian tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to normal condition hearing will be destroyed forever. Nine cases out of ten are caused by catarrh, which is nothing but an inflammation of the mucous membrane. We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

That Joyful Feeling

With the exhilarating sense of renewed health and strength and internal cleanliness, which follows the use of Syrup of Figs, is unknown to the few who have not progressed beyond the old-time medicines and the cheap substitutes sometimes offered but never accepted by the well-informed.

Are You Satisfied With What You Know
Or would you gladly improve your stock of knowledge? You may have a 50 or 60 page book for a 10-volume encyclopedia, but you can afford to pay fifty cents for a Hand Book of General Information. You won't want to pay even this unless you are desirous of improving your mind and believe that a five-hundred-page book, filled with a condensed mass of valuable knowledge, will be read by you. This valuable encyclopedia will be sent you for fifty cents in stamps by the Book Publishing House, 131 Leonard St., N. Y. City. Every person who has not a large encyclopedia should take advantage of this great offer at once and store his mind with the valuable facts collected in this book.

I am entirely cured of hemorrhage of lungs by Pisco's Cure for Consumption.—LOUISA LINDMAN, Bethany, Mo., January 8, 1894.

When bilious or constipated, eat a Cascaret, candy cathartic, cure guaranteed, 10c, 25c.

St. Vitus' Dance. One bottle Dr. Fenners' Specific cures. Circular, Fredonia, N. Y.

Inflicted with sore eyes use Dr. Isaac Thompson's Eye-water. Brought out at 25c per bottle.

Take

Care of your health at this season. See that your blood is pure, appetite good and all the organs in a healthy condition. Hood's Sarsaparilla is the great building-up and blood purifying medicine and therefore it is the best medicine to take in the fall, when the atmosphere is laden with disease germs from decaying vegetation. Hood's Sarsaparilla prevents colds, pneumonia, bronchitis, fever.

Is the best—In fact the One True Blood Purifier
Hood's Pills the best family cathartic
Hood's Pills and liver stimulant, 25c.

A Labor Saving Postal.

A novel and time saving device in the nature of a postal card has originated in Germany. If half that is said of American haste is true, remarks Youth's Companion, the device should become popular if introduced into this country. One side of the card bears the postage stamp and the address. On the other side are printed words, followed by blank spaces, for replies to the questions suggested. An example, with the replies made in one instance by the person who sent the card, is subjoined:
Arrived, June 10. Society, fine. Health, good. Scenery, beautiful. Fun, immense. Lodgings, fair to middling. Weather, clear. Money, growing less. General remarks, would like to live here.

Twenty-seven foreign ships carry guns having a range of ten miles each.

BRAVE SPIRITS BROKEN.

How often women wake up in the morning cheerful and happy, determined to do so much before the day ends, and yet—

Before the morning is very old, the dreadful BACK-ACHE appears, the brave spirit sinks back in frightful no matter how hard she struggles, the "clutch" is upon her, she falls upon the couch, crying—"Why should I suffer so? What can I do?"
Lycia E. Pinkham's "Vegetable Compound" will stop the torture and restore courage.
All such pains come from a deranged uterus. Trouble in the womb blots out the light of the sun at midday to a vast number of women.
Be advised—do as many others have done and are doing—procure Lydia E. Pinkham's Vegetable Compound at once, and commence without delay to realize the relief it is sure to bring you.

The Serenader's Horrifying Discovery—Weighing Her Merits—Ready for the Emergency—Takes Time, Etc., Etc.

Beneath my sweetheart's window
I play my soft guitar,
And sing loud, while the toment
Is my echo from afar.
But hush! an echo softer
From her window creeps—
A low-drawn sound that tells me
She sleeps—my lady sleeps.
—Up-to-Date.

AFTER DUE PREPARATION.

Bloomfield—"Mrs. Homewood can make some cutting remarks."
Bellevue—"Especially after she has ground her teeth in anger."
Pittsburg Chronicle-Telegraph.

FOLLOWING INSTRUCTIONS.

"Why, Jimmie," said the gracious hostess, "you have taken half a pie on your plate."
"Yes, mamma," said I must have but one piece when I was visitin'."

WEIGHING HER MERITS.

First Boarder—"Is she going away? Too bad—she's a nice girl."
Second Boarder—"Yes, she's attractive and agreeable. On the other hand, she plays the piano."
—Town Topics.

NO REST.

Brown—"I felt very tired when I woke up this morning."
Jones—"Went to bed late."
Brown—"When to bed early and dreamt I made a century run."
—Puck.

TAKES TIME.

Jess—"This paper tells of a lawyer who took an hour and twelve minutes to ask a question."
Dess—"That's nothing; Jake started six weeks ago to pop one to me."
—Puck.

THEY GO TO EXTREMES.

"Women are foolish about their clothing. I don't see how they keep warm in winter."
"That is simple. They put on all the clothes they leave off in the summer."
—Truth.

READY FOR THE EMERGENCY.

Sexton (from the vestry-room)—
"Dr. Blank—Dr. Blank—the church is on fire."
Dr. Blank (from the pulpit)—
"Very well, William; I will retire. Perhaps you'd better wake up the congregation."
—Harper's Bazar.

ART FOR ART'S SAKE.

"Guilty."
Upon the word the counterfeiter's head fell upon his breast and hot tears coursed rapidly down his face.
"That," he wailed, "is what I get for trying to be an artist rather than a mere copyist."
—Detroit Tribune.

DISQUALIFIED.

Judge—"What excuse have you to offer for not desiring to serve upon the panel?"
Telesman—"Your Honor, I think—"
Judge—"Your excuse is satisfactory. You can go."
—Boston Transcript.

MENTAL TRAINING LACKING.

"The college you have been attending has quite an extensive curriculum I am told."
"Yes, indeed! It is fitted with all the modern apparatus; trapeze, horizontal bars, punching bags, and all, and has an elegant plunge bath."
—Puck.

NEED FOR ACTION.

Mrs. Brown—"We ought to try to have the minister's salary increased. Why, it isn't enough to supply his large family with the necessities of life!"
"No, indeed! I don't see how they manage to keep their wheels in repair."
—Puck.

NOT FLATTERING.

Bigson—"I once possessed a splendid dog who could always distinguish between a vagabond and a respectable person."
Jigson—"Well, what became of him?"
Bigson—"Oh, I was obliged to give him away. He bit me."
—Tit-Bits.

HOUSE SENSE.

"Can you warrant the horse to be perfectly gentle?"
"Gentle? He wouldn't bat his eye if he met a procession of bloomer girls in red."
"He wouldn't? Then I don't want him. I like to see even a horse have some sense!"
—Chicago Tribune.

CHARLIE WAS EXCUSABLE.

Blanche—"Charlie told me last evening that he never before loved any girl as he loved me."
Edith—"Yes, but it was only three months ago that he told me he never could love another as he loved me."
Blanche—"But that was before he had seen me."
—Boston Transcript.

NO EXCUSE.

Mrs. Hoon—"I understand that young Clarence Scoots has run away to keep from paying his debts."
Old Hoon—"I never could understand what made that boy turn out so badly; the mothers of both his parents died before he was born, and he never had a grandmother to spoil him."
—Puck.

NEW ALL ABOUT IT.

"Your mistake," said the man in the machinist's shop, "the college campus had a clump of trees in the northwest corner and a—"
"You can't tell me anything about it," interrupted the man who had his feet on the table. "I'm an alma mater of that college myself."
—Chicago Tribune.

NOT AT HOME.

Caller—"Is your father at home?"
Little Daughter—"What is your name, please?"
Caller—"Just tell him it is his old friend Bill."
Little Daughter—"Then I guess he ain't at home. I heard him tell mamma if any bill came he wasn't at home."
—Washington Times.

A STUDY IN HUMAN NATURE.

"That man who just went out," remarked the observant man, "is a butcher."

"He is," replied the storekeeper. "You know him, probably."

"Never set eyes on him before."

"Then how did you know that he was a butcher?" asked the storekeeper.

"Simply by the way he carries his money."

"I noticed that when he paid for his purchases he took a crumpled wad of bank notes out of his trousers pocket. Butchers always carry their money that way. So do bakers and grocers, but I knew he was neither of them, and therefore concluded that he was a butcher."

The assembled citizens who sat around on boxes and barrels looked admiringly at the observant stranger, and asked for more information on the way different people carried their money.

"Bankers carry their money in a new bill, laid out at full length in a morocco pocketbook," he went on.

"Brokers always fold their bills twice. Young merchants carry their money in their vest pocket, while sports carry theirs in their trousers pocket. Farmers and drovers carry their cash in their inside pockets."

"And where," asked one of the men who sat on the store boxes—"where does an average man like me, who does not belong to any of the classes named, carry his money?"

"In his wife's pocket," replied the observant man.—Harper's Bazar.

When the Kaiser Travels.

On the day before the Kaiser sets out on a railway journey extraordinary precautions are taken less any mishap should befall the imperial traveler. Every bridge is minutely examined, and in particular tunnels, bridges, etc., as well as the state of rails. The engineer is made responsible for their being in a fit condition. On the day of the journey itself, and shortly before the court train starts, a pilot train or locomotive with an engineer is sent on ahead for a short distance and the line of route again gone over and examined. If there are sleepers, loose rails or stones lying in the vicinity of a building place they are watched during darkness by people specially deputed for that purpose. On the approach of the train the number of men set to watch the line of route is increased, while others are placed before and in the tunnels, at level crossings and on the larger bridges. Several officials, who are made answerable for everything being in perfect order, as well as for any delays, accompany the train. In case any defects in the locomotive of the court train should become manifest engines are ready to be substituted. The traveling and non-traveling public is kept at a distance from the train at stations where stoppages are made for any purpose whatsoever. Signals at night are avoided so as not to disturb the repose of the monarch. The railway officials are in a state of feverish anxiety; telegrams fly to and fro, and the least delay is announced. In short, every conceivable measure is taken to cause the journey of the exalted traveler to pass off as easily and as pleasantly as possible.—London Telegraph.

Curious Competitions.

The Belgian artisan spends his leisure in a very novel manner. He breeds a special cock for crowing, and that which can outcrow its fellows has reached the highest pinnacle of perfection. The modus operandi is to place the cages containing the roosters in long rows, for it appears that propinquity creates the spirit of emulation without which the proceedings would fall flat. A marker appointed by the organizers of the show is told off for each bird, his duty being to note carefully the number of crows for which it is responsible in the same fashion as the laps are recorded in a bicycle race. The customary duration of the match is one hour, the winner being the cock which scores the highest number of points in the allotted time. A great number of these competitions have recently taken place in the Liege district, and in some cases heavy bets have been made on the result.—Tit-Bits.

Statistics About the Buffalo.

The vital statistics about the buffalo, as gathered at Washington, are melancholy. W. T. Hornaday, Superintendent of the National Zoological Park, gives it as his opinion that the whole number of buffaloes, running wild and in captivity, in North America, was about 1000 in 1889. Of these, twenty-five were in the Pan Handle of Texas, twenty were in Colorado, twenty-six were in Southern Wyoming, ten were in the Musselshell County of Montana, and four lone beasts were wandering in Western Dakota. In the Athabasca Territory of the British possessions it was estimated that there were 550. Between 250 and 300 are accounted for in captivity in the United States. A herd has also been located in the Barren Grounds of Hudson Bay Territory, and is said to number 150.—New York Times.

House of Commons Manners.

It is striking to what an extent the manners of the House of Commons have changed within the lifetime of Mr. Gladstone and Mr. Villiers. When Mr. Ferrand, the member for Knarborough, was making a furious attack on Cobden, according to the latter's description, "Colonel Sibthorp plied the fellow with oranges to suck, in an affectionate way that resembled a monkey fondling a bear." Fancy Mr. Ashmead-Bartlett with oranges during one of the latter's fiery attacks on Mr. Chamberlain! In Burke's day honorable members used to lie full length along the benches in riding-boots, and amuse themselves, not only by sucking oranges, but by cracking nuts.—London Saturday Review.

A Vesuvius Spectacle.

Vesuvius is an interesting sight just now. One stream of lava flowing down from the center is a 100 feet wide and from seven to fourteen feet deep, while a hundred other smaller streams are running down the cave and a big column of black smoke rises into the sky.—Boston Budget.

LICE ON LATE CABBAGE.

Kerosene emulsion will quickly dispose of these pests, and if the fight is begun early no harm will result to the cabbage head. Some growers use one pound of quassia chips boiled a few minutes in one gallon of water, and then dissolve one pound of whale oil soap in one gallon of hot water; mix the two and add cold water to make fourteen gallons in all. Apply this to the plants with a spray or with a brush dipped in the solution, aiming to throw the dose into the center of the plant.—American Agriculturist.

BURNING STUBBLE BEFORE PLOWING.

The long stubble which is usually turned under the furrow in plowing for winter wheat is only an injury to the crop. The stubble has almost no manurial value, and the little it has is potash, which is saved by burning it on the ground. This also disposes of many of the small weeds which are so chafed that their further growth is stopped. The effect of dry stubble plowed under after midsummer is to keep the soil too light all winter. Of course it fills with water, and the grain sown in the fall has a pretty good chance to be winter killed. Besides, such stubble plowed under makes the soil too dry all the fall for the grain to make the right kind of growth. The ash of the straw on the contrary, attracts moisture, and if the land is plowed after burning stubble it will be moister than if there had been no stubble to burn. There is no advantage in burning straw on land that is not to be plowed. The straw helps to hold snow evenly over the grass and clover seeding, and it is usually beaten down to the ground before spring, so that it rots and is out of the way before clover or grass cutting time.—Boston Cultivator.

POULTRY HOUSE FLOOR.

There is considerable difference of opinion concerning the matter of floor for a poultry house. Some contend that the floor should be of wood, and others that the best floor is the natural earth. I am a firm believer in the earthen floor, when it is properly made. The land on which the poultry house stands should be thoroughly drained if it is at all liable to become water soaked, no matter what kind of floor is used; and where there is no danger from water soaking the earthen floor has many advantages over one of wood. The top soil should be taken out and clay or sand filled in until the surface is six inches above the surrounding level, and this should be firmly packed by beating it down with a heavy weight.

Such a floor is better for the fowls because more natural for them. When it becomes foul it can be easily renewed by taking off the top of it and putting in more clay or sand. Lice cannot find a refuge in an earthen floor, as the dust is fatal to them; while, if the floor is of wood, the cracks make an excellent hiding place for them.

If the cost were the same I would choose a well made earthen floor for any other that I have ever seen. The houses in one of the most extensive poultry establishments in the West are all of them made of solid clay. Disease is hardly known about that place, and the foul odors that are so often present where wooden floors are used are entirely absent, because the earth acts as a deodorizer and disinfectant.—Farm and Fireside.

A HAND GARDEN ROLLER.

The sketch herewith shows a useful implement for forming the ground in the seed bed after the seeds have been planted. It is well known that seeds sprout much quicker and grow more vigorously if the soil is dressed firmly over them. This is usually accomplished in the kitchen garden by pressing the soil in the seed row with a strip of board, but where the garden-

HOMEMADE ROLLER.

ing is done on a large scale this plan would be too laborious. The implement shown is a wooden cylinder two and one-half or three inches in diameter, mounted upon a light handle—an old rake or hoe handle—and held as one would hold a rake. In this way a large amount of seed can be closely imbedded in the soil easily and quickly.—New England Homestead.

VENTILATING BOX STALLS.

Where box stalls are constantly in use there are many days, not only in summer, but in winter as well, when it is a serious problem to keep the inmates comfortable. There may be a ventilating shaft in each stall, and a small window, but even with these exits for overheated air of box stalls during the winter months of air, particularly in winter, when it is not always practicable to open stable windows. Under such conditions the best plan is to open the box stall out into the interior of the stable, by showing such an accompanying illustration. The door to the stall is cut into two parts, while attached to the lower half, but extending to the top of the doorway, is a grating of wire, supported by the framework that is screwed to the lower half of the door. The upper half shuts into place and bolts to the lower half, when the whole

swings as one door.

During the day the upper part of the door can be kept open, and shut at night for warmth. This not only affords good ventilation during the day, but permits the occupants of such stalls to be seen at any time without opening the stall doors. The same arrangement is useful for poultry houses, sheep pens, etc. In the case of small ani-

VENTILATOR FOR STALLS.

FEED THE PLANTS.

So many people make the fatal mistake—fatal to plants—of supposing their favorites can live, thrive and blossom for an entire season without food. As well suppose the locomotive that rushes across the continent to accomplish its labor without the necessary fuel to generate the power, as to expect your floral treasures to put forth leaves and buds abundantly and be beautiful without the fertilizers from which they may collect material, which they alone have the power to change into vegetable matter.

The material that the plant transforms into leaves and blossoms is taken from the soil, and unless the supply is kept up the plant must suffer. It cannot make something out of nothing, but must be supplied with fertilizers at regular intervals to obtain the best results.

Plants that are grown in beds where the roots are free to seek for food are often enriched but once—at planting time. But when restricted to the narrow limits of a pot, a "little too often" is the rule. If we would not check their growth we must provide the food they cannot collect for themselves. This is accomplished in many ways. Pot shrubs and bulbs are much benefited by removing the soil down to the roots and replacing with fresh earth. This method is recommended for all plants that object to being often disturbed.

Geraniums, chrysanthemums and all plants of vigorous growth, may, when potted, be turned from the pot, have part of the ball removed, the pot filled above the drainage to the required depth with rich earth, and the ball returned. This should be done as carefully as possible, so as not to injure the fine roots unnecessarily. Also remove the top, if desired, and refill with rich earth. If properly done, an immediate benefit will be noticed in the renewed growth of the plant.

It is a wise precaution to have a basket of rich soil, prepared especially for this purpose, in the cellar as winter arrives. It will more than repay the trouble of securing it.

Liquid manure is a common way of providing plant food, but like all good things, it must be handled with judgment. It must not be used too strong upon dry soil, or be allowed to touch the foliage. To prepare it, take a pail part full of decayed manure and pour boiling water over it—by using hot water the weed seeds, if any, are destroyed, as also are worms and insect life. After it has cooled and settled, pour off the water, and before using reduce to the color of weak tea. At first, once a week is often enough, but as soon as the plants become accustomed to the stimulant it may be applied two and even three times a week, according to the nature of the plant under treatment. Soot tea is also good for plants, giving them a freshness of foliage and a brilliancy of color that is surprising. It is prepared in the same manner as manure tea, and they may be used together if desired. Soot tea is especially recommended for roses, but it is beneficial to other plants as well.

In repotting plants a little well-rotted manure may be placed directly above the drainage, lightly covered with soil so the roots may not come in contact with it until established. Fill in around the ball with soil mixed with manure, and when the roots begin to explore the new soil they will find just the food suited to their needs, and will not be slow to profit by your generosity.

For people who find it impossible or inconvenient to prepare the manure tea, so much used as a fertilizer, the prepared plant foods of various brands are found very useful. They seem to perfectly fill a long-felt want. They are pleasant to use, and not bulky to handle; they are sold at a very reasonable rate, with full directions for their use.

For people residing in cities, far from woods and old meadows, from which a good supply of leaf mould and rich, sandy loam are to be obtained, the potting soil sold by many florists is very useful. It contains just the right quantity of each kind of soil and well decayed manure, and is best adapted to the needs of plants and bulbs. This is an opportunity not to be neglected, for the florist understands just what is needed, and has prepared a better mixture than could be formed by an amateur.—Vick's Magazine.

C. E. Dugger, of Deatur County, Georgia, was carried over the Oceana Falls, forty feet in height, while bathing recently. He escaped unhurt.

At Richmond, Mo., a thorn from a hedge he was trimming fell into the eye of a gardener, and the point breaking off in the eyeball, sight was destroyed.

Don't Tobacco Spit and Smoke Your Life Away.

If you want to quit tobacco easily and forever, regain lost manhood, be made well, strong, magnetic, full of new life and vigor, take No-To-Bac, the wonder-worker that makes weak men strong. Many gain ten pounds in ten days. Over 400,000 cures. No-To-Bac from your own druggist. Under absolute guarantee to cure. Book and sample free. Address Sterling Remedy Co., Chicago or New York.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

The Pill that Will.

"The pill that will," implies the pills that won't. Their name is legion. The name of "the pill that will" is Ayer's Cathartic Pill. It is a pill to rely on. Properly used it will cure constipation, biliousness, sick headache, and the other ills that result from torpid liver. Ayer's pills are not designed to spur the liver into a momentary activity, leaving it in yet more incapable condition after the immediate effect is past. They are compounded with the purpose of toning up the entire system, removing the obstructing conditions, and putting the liver into proper relations with the rest of the organs for natural co-operation. The record of Ayer's Pills during the half century they have been in public use establishes their great and permanent value in all liver affections.

Ayer's Cathartic Pills

Paid His Wedding Fee in Hay.

Last week a young called upon Judge C. C. Meiden, in the Valley Chapel neighborhood, and requested His Honor to perform the marriage ceremony for him and his fiancée on the next Sunday. The young man said he had no money, but could pay the fee in hay. Judge Meiden told him to come on with his bride and his hay. Sure enough, last Sunday the happy couple came riding in triumph on a big load of alfalfa. The ceremony was performed quickly, the hay unloaded into the Justice's mow, and then the bride and bridegroom, their faces aglow with joy, seated themselves on the rack and drove off.—Walla Walla (Wash.) Statesman.

The Average Baby's Size.

An average child measures about nineteen and a half inches at birth if a boy and half an inch less if a girl. A child increases more rapidly in length during the first week than at any subsequent period, and should gain an inch during the first month of its life.—Ladies' Home Journal.

New Pullman Service to Texas, Mexico and the Pacific Coast.

Commencing October 1st, the Southern Railway "Piedmont Air Line" will inaugurate a new Pullman Buffet Sleeping Car Line between New York, Birmingham, Atlanta and Washington, and Galveston, Texas. Connecting at New Orleans with the trains of the Southern Pacific R. R. carrying Pullman Buffet Sleeping Cars, New Orleans to San Francisco and City of Mexico. The new sleeping car service will be operated on the "United States Fast Mail" leaving New York 12:15 midnight, and Washington, D. C., 11:15 A. M. The famous Washington and Southwestern Established Limited continues to leave New York daily at 4:30 P. M., carrying Dining Cars and Pullman Drawing-room Sleeping Cars, New York to New Orleans, Memphis, Tampa, and Hot Springs, N. C. For further information call on or address, General Eastern Office, 271 Broadway.
