Coming.

A. K. Hawkes, the famous Atlanta optician, direct from the home office of this great Optical House, or one of his practical opticians, will remain at the store of his agent, C. A. Milford for three days only, beginning August 24. This will give the citizens of Abbeville and vicinity a rare opportunity of Have their eyesight tested FREE by one of the most renowned as well as reliable Opticians in the United States.

Mr. Hawkes has all the modern appliances for the scientific adjustment of Spectacles and Eye-Glasses to the eye. There is no optician in the United Sates who enjoys the confidence of the people more than Mr. Hawkes. His name is a familiar word throughout a section of the country inhabited by over twenty-five millions of people. Mr. Hawkes has probably fitted glasses to the eyes of more people of national and international fame than wny other optician living. His wonderful success is due to his superior grade of glasses, and to the confidence the people have in his ability as a practical optician. The firm was established in 1870, nearly thirty years ago.

Call early as he will positively remain but

To persuade one soul to lead a better life is to leave the world better than you found it.

Our religion should be both our business and our pleasure. There is no business in this world so important as serving the Lord and no pleasure like the joy that He gives to His faithful servants.

Anti-Typhoidal Serum.

Dr. Wright, professor of pathology in the British Army Medical School makes a report on the results of inoculation with anti typhoidal serum, which is sure to attract much attention.

typholdal serum, which is sure to attract much attention.

When he was besieged in Ladysmith General White had 12,000 troops and the garrison had to drink very impure water. The result was a great deal of typhold fever. Of the 12,281 men in General White's command only 1,705 allowed themselves to be inoculated with the auti-typhodiol serum, the other 10,529 preferring to take their chances without such treatment.

The comparison of results among the inoculated and the non-inoculated soldiers make a fine showing for the efficiency of the serum treatment. Among the 19,529 non-inoculated soldiers in Ladysmith there occurred 1,489 cases of typholdal lever; among the 1,705 inoculated soldiers, and one case to every 48,7 inoculated soldiers, and one case to every 48,7 inoculated soldiers. In other words, for every one inoculated soldier who took enteric fever, there was almost seven non-inoculated soldiers who took it; and this is a disparity in number sufficiently striking to make people stop and think.

The value of the serum was demdostrated in the comparative fatality as well as in the number of attacks.

In the comparative latality as well as in the number of attacks.

The number of deaths among the non-in-oculated was 329, and among the inoculated S. This, therefore, there was one death among every 32 non-inoculated men, whereas there was only one death among every 213 men!
Typhoid fever is one of the most frequent
and most fatal diseases in this section and
Dr. Wright's report deserves consideration.
