

THE EDICTS OF FASHION.

become as essential to the wardrobe of the grown-up as to that of the

child. Innumerable blouses require them, and, with their aid, it is possible to make the same bodice high or decoillete as required. The excellent May Manton model shown is perfectly adapted to its purpose, and at the same time can be made the foundation for any one of the fashionable waists that close at the back. As shown, yoke and sleeves are of batista lace, the body portion of nanisock; but any suitable material can be substituted when a guimpe is desired, and various combinations might be suggested for entire waists. Plisse chiffon, with guipure applique simulating a yoke, is charming. A yoke of tucking with lower portion of batiste, and lace applique between, is exceedingly handsome, and similar suggestions might be made by the score.

The guimpe is cut with front and back only, the fitting being accomplished by means of shoulder and under-arm seams. The yoking material is faced in, to square or round depth, as preferred, and the foundation is drawn down in gathers at the waist line. When a transparent effect is desired the material beneath the yoke consequent underlying anxiety. The

New York City.-Guimpes of lace, | file. It so happens that the brim is tucking and similar materials have raised in front toward the left side. So over the left temple a bunch of primroses nestles under the brim. The hat is faced all around with tulle arranged in tucks. The tucking is graduated so it looks very well. A wide band of black velvet ribbon is passed about the crown and tied with a few loops and ends, wired to serve as an upright at the left, where it meets the upturned brim.

A Pretty Idea. A pretty idea is shown in a narrow vest of pale-colored cloth. It is pierced with three eyelets on either side as big as a nickel and heavily wrought in Through these openings inchwide ribbon is laced, which holds the front together. The ends are tied and fall over the skirt. Liberty gauze or chiffon scarfs are fastened at one side or caught at the waistnne and float on the skirt.

The "L'Aiglon" Hairpin. "L'Aiglon" pins for the hair, which come in different designs, have the pin part double like a hairpin. It is pressed together before being slipped into the catch at the end, and, springing out, the pressure holds it secure.

Beautiful French Petticoats. Pretty French petticoats in white have big embroidered flowers splashed upon the flounce, the centres of both flowers and leaves with incrustations of lace, the solid embroidery outlining

Black and White Effects. Black and white effects are quite as dominant as ever in the season's fashions, and certainly nothing can be much more 'iseful or appropriate for a greater variety of purposes.

Princess Golf or Walking Skirt Every golf player realizes the difficulty in attaining perfect neatness that lies in the waist and separate skirt. Button, hook or fasten them together as we will, the exercise that grows out of "putting," "driving" and the like, means danger of parting and can be cut away. The sleeves are of princess skirt illustrated was designed

Dr. Sorby, the well-known scientist,

had a wonderful sapphire, by means

of which he discovered the nature of

the liquid that is sometimes found

in the cavity of a crystal. The sapphire

had a tube-shaped cavity about a quar-

ter of an inch in length and an eigh-

teenth of an inch in diameter, partly

filled with liquid. Its form suggested

that it might be used as a natural ther-

mometer, and the doctor found that,

at fifty degrees Fahrenheit, the liquid

half-filled the cavity, and completely

filled it at eighty degrees. A study of

the rate of expansion led him to the

conclusion that the liquid must be car-

'A new antiseptic substance of con-

siderable promise was recently de-

scribed at the French Academy. It

has the rather formidable name of

mercury-diphenoldisulphonate of sodi-

um. It is a white amorphous powder,

very soluble in water and containing

about forty per cent. of mercury. It

has no irritating action on the skin

and does not coagulate albumen, but

seems nevertheless to retain all of the

antiseptic qualities of its constituents. Solutions of 1-1000 strength (one part in 1000 parts of water) are strongly

antiseptic, and when the strength is

only 1-10,000 bacterial growth is mark-

edly retarded. Solutions of 1-2000

strength prevent putrefaction in blood

or bouillon solutions. The fact that

it does notcoagulate almuminous substances is an important quality, as it

is thus possible to use the solution by-

Many discoveries of interest were

made during the survey of the bed of

the Pacific by the Nero, a vessel be-

longing to the United States Navy. The

object of the survey was to locate a

route for a cable, and a map was made

of the ocean bed from California to

Japan. The discovery that will attract

the most attention, perhaps, is the

greatest known ocean depth-fifty-two

hundred and sixty-nine fathoms, near-

ly six miles. This was found a short

distance east of the island of Guam.

All the way from Hawaii to the Midway Islands the soundings showed

that the bottom is a level plain of soft

mud, at an average depth of twenty-

seven hundred fathoms. Between the Midway Islands and Guam is another

level plain, broken here and there by

low mountain ranges, and between

Guam and Yokohama is a great peak

Spaniards Are Not Strenuous.

If the register of Spanish voters is true nobody stands a better chance of living 100 years or more than the inhabitants of Asturias, writes a Madrid correspondent. The last list of electors shows that the districts of Langreo, Morein, Grado, Villaviclosa and Carreno each counts upon a centenarian voter; the districts of Siero and Oviedo count on two apiece, and the district of Salas counts on three of 103 and 104 years old. Another district, called Cangas de Fineo, contains several Methuselahs varying between 102 and 107. The province of Asturias, which contains 600,000 inhabitants, possesses twenty-eight persons of 100 or more years. This demonstrates clearly its excellent climate and the careful life lived by its inhabitants.

Ruskin's Tomb.

The design of Mr. Ruskin's tomb is a cross of the early English type hewn out of a block of green slate, and lettering is replaced by symbols. On the face the candlestick of the tabernacle represents the "Seven Lamps," the "Lion of St. Mark's," the "Stones of Venice:" in the centre, an artist near a pine forest and before the rising sun suggests "Modern Painters," while below is a figure with a lyre. On the back are St. George and the Dragon, the Crown of Wild Olive, Fors Clavigera, Sesame and Lillies, and at the foot "Unto This Last" is represented by the payment of the workers in the vineyard.-London Travel.

A Doctor's Ingenious Idea.

A well-known Gotham physician, who was recently enabled, by means of a current obtained from the storage. battery of his electromobile, to imgical operation performed at the patient's house, has had made a regular outfit for use in this direction. It consists of about thirty feet of electric wire and half a dozen lamps. The doctor carries the apparatus with him constantly in his rounds, and it can be attached in half a minute.

The Spanish navy is now among the smallest of the sea powers of the world. At one time, more than a century ago, it was among the greatest.

No Warrant For Pessimism. We know that it is the habit of not

a few in comparing the present with the past to magnify the past and to minimize the present. But everybody and everything in the present can, in the broad view of the progress of the race, be regarded as better than their prior approximate analogues, for the world is better and humanity is better now than ever before, since knowledge is more, unselfishness is more, altruism is more, courtesy !. more and vanity, vapidity, vapor, violence and venality are far less.-Brooklyn Eagle.

In his attitude toward the daily press Lord Kelvin presents a curious contrast to Bishop Creighton, whose ignorance of journalism has been referred to in this column. To an interviewer who asked him whether he read a great deal Lord Kelvin a little while ago made the rather startling reply that he had not read a book for thirty years. "I read nothing but the daily papers. Well, perhaps that is an overstatement; it may not be thirty years, but it is a long time. Of course, I am continually referring to books, but I have not the time for steady reading; except the daily papers, and I feel especially bound in crises of our history to study the course of events." Compare this with Mr. Balfour's statement: "I never read the papers!" -London Chronicle. In Frankfort, Germany, official tests
