

### The German Army Now Uses an Automobile Bakery

One of the things which cause no end of trouble in getting an army corps into the field is the commissariat. On paper and in times of peace everything is in apple pie order and the

### The Protesting Sioux

Cyrus E. Dallin, the well-known sculptor, who for the past three years has had his home and studio at Arlington Heights, says the Boston Globe, has just completed his figure representing the protest of the Sioux Indians at the taking of the great Louisiana territory, which was formerly owned by the Sioux and Cherokee Indians. The statue is for the St. Louis Exposition, where it will be set up on one of the main boulevards in the central portion of the grounds.

### The True El Dorado

A Lake in the Andes Thought to Contain Much Treasure : :  
Away up in the heights of the Andes, just north of the equator, some 9000 feet above the sea, lies in the plateau of Bogota the Lake Guatavita. This plateau is supposed to be the birthplace of the potato, which to this day is the principal crop. This lake is being drained by a joint stock company.

### William Penn's Compass

Inkeeper Showed Instrument Which Belonged to Colonizer.  
Some time ago, while botanizing along the Osage River, in central Missouri, the writer stopped over night at Gladstone, a small town in the southern part of Morgan County. The loquacious landlord of the Little Inn, in his anxious endeavors to make the time pass agreeably, recited many war reminiscences, and incidentally dropped the information that an old surveyor's compass, with an interesting history, was a greatly prized relic of a family of that vicinity. Interest in the story was intensified when he further stated that the compass was once the property of William Penn, and that there was much tradition and some recorded evidence to prove that it was the identical instrument with which the nucleus of the present city of Philadelphia was first surveyed.

## Household Matters

**Staining Woodwork.**  
Before using varnish stain on boards or any wood article, brush over with a strong solution of permanganate of potash. This is not only a disinfectant, but makes a dark foundation for the varnish stain, of which one coat will then be found sufficient.

**Silk Underwear.**  
Soap should never be rubbed directly upon silk underwear. Strong soap made of warm water and a white soap will be found best. Squeeze the garment in this water, and then, if the garment is very much soiled, pass it through another warm suds. Press between the hands to get out the water, shake well, press on the wrong side with a moderately hot iron. Silk treated in this way will keep the color so long as it holds together.

**Uses of Waste Paper.**  
Few housewives know of the numerous uses that waste paper can be put to. After a stove has been blackened, it can be kept in a very good condition by rubbing it every day with coffee paper. The teakettle, teapot and coffee pot can also be kept bright and clean in the same way. Knives and tinware can be polished till they shine like silver. Paper is better than a dry cloth for improving the appearance of mirrors, lamp chimneys, etc. Preserves and pickles keep much better if brown paper, instead of cloth, is tied over the jar. Paper is as good as wadding for putting under carpets, and two thicknesses placed under a spread make a covering as warm as a blanket.—Jessie Fordyce, in American Queen.

**To Preserve Brushes.**  
Good hairbrushes are costly items, and a way to keep the bristles stiff and clean for years is worth knowing. A Russian coiffeur gives this recipe: Have ready two basins; put a lump of soda the size of a walnut in one and three parts fill it with boiling water; the other basin should be three parts filled with water as cold as you can get it, to which you have added sufficient lemon juice or good white vinegar to give it a noticeably acid taste. Shake the bristles of the brush well up and down in the boiling water till they are clean, then at once rinse them thoroughly in the cold water and stand them up to dry in the air or in a warm place, but not too near the fire. Of course, the back of the brushes must not be wetted.

**Rules For the Mistress.**  
Do not interfere with the girl's amusements after her work is done. Besides regular afternoons and evenings off, give a maid an occasional day off.  
Don't expect more from a servant than you could do yourself.  
Meals shall be prepared at regular hours and the girl's work must not be delayed by tardiness.  
Increase wages in proportion as services become valuable.  
Remember that your servant is a human being not a beast of burden.  
Place some room other than the kitchen at her disposal to receive company.  
If criticism is to be made, do it in a cool, dispassionate manner.  
Follow the Golden Rule.  
Do not interfere with any of her superstitions or religious beliefs.  
Do not interfere with her love affairs unless she asks for advice.

**A Cozy and Aristocratic Sitting-Room.**  
To the lover of harmony in furnishings as well as in sound, the more artistic a room the more comfortable it will be. Many rooms are furnished in good taste with a regard for color and arrangement, yet they lack something—call it "artistic confusion."  
Order is of course a desirable thing, but when every article of furniture and every book is in its proper place, the room looks more like a show room than a living room. A magazine lying carelessly on the window sill or on a chair looks as if it were being read.  
Too much order gives a stiff appearance to the most beautiful room, and destroys the artistic careless effect that few rooms possess.  
Of course, there is the other extreme. The artist whose friends have to make their way as best they can through a chaotic studio or sitting room—when she does not affect the disorder—considers with the rather fallacious saying that "Genius knows no order."  
Mrs. B. Baldwin, in American Queen.

### RECIPES

**Egg Fondue**—Beat four eggs until light; add to them a little salt and pepper for seasoning, two tablespoonsful of Parmesan cheese and two tablespoonsful of milk; put one tablespoonful of butter in a frying pan; when hot, turn in the eggs; stir until thickened; serve on toast.

**Omelet With Peppers**—Beat separately the whites and yolks of five eggs. Put them together, season with salt, flavor with a teaspoonful of onion juice, and add half a cupful of green peppers which have been chopped and fried in a little butter. Cook in a hot buttered omelet pan.

**Pineapple Cobbler**—Four slices of pineapple cut in dice, one lemon and one orange sliced very thin, eight tablespoonfuls of sugar, one pint of cold water and one cup of shaved ice. Place the fruit in a bowl, strew with the sugar and a little ice, and in ten minutes add the cold water. Stir well and pour into glasses half full of shaved ice, decorate with ripe berries.

**Egg Vermicelli**—Boil four eggs twenty minutes; make a white sauce with two level tablespoonfuls of butter and two level tablespoonfuls of flour; when the butter has melted add the flour and stir together until smooth; add gradually one cupful of cold milk; stir this over the fire until thickened and boiling; add one-fourth teaspoonful of salt and a little pepper; toast six slices of bread; remove the shell from the eggs, cut them in halves, separate the yolks from the whites; part in small pieces of rings; mix them with the same; pour the sauce over the toast and rub the yolks over the top through a sieve.

THE AUTOMOBILE BAKERY.

commissary department simply perfect; but the moment the drums beat for battle the bottom seems to fall out of all the arrangements and heartburnings and complaints come without end. There are few wars without commissary scandals.

The Emperor William fully recognizes that good food and abundance of it is as necessary to the success of an army in the field as good weapons and good powder, and that empty stomachs are poor supporters of enthusiasm, which means first class work. In no army, perhaps, is there so much attention paid to the commissary arrangements as in the German army, and the Kaiser himself takes a supervising interest in everything done.

Since bread is the staple of life, the baking of it is one of the absolute necessities of the commissary department, and now Emperor William has had rigged up a perfectly up-to-date bakehouse on wheels. It is an automobile bakery that will not have to depend on either horses or mules to keep up with the regiment, cavalry, artillery or infantry to which it is attached. We present a picture of this latest novelty.

The statue represents a full-blooded Sioux mounted on one of the famous Indian ponies of that tribe. The steed is drawn back on his haunches and the Indian's hand is raised in protest at the seizure of his lands. The Sioux is finely modeled, the expression of the face and the raised hand giving un-

THE PROTEST BY THE SIOUX.

### William H. Taft, Who Will Succeed Elihu Root as Secretary of War

William Howard Taft was born in Cincinnati, Ohio, September 15, 1857, and was a son of Alphonso Taft, jurist, former Secretary of War and Attorney-General of the United States. He was educated at Yale, whence he was graduated in 1878, ranking second in his class. In 1880 he was admitted to the bar in Cincinnati, having been graduated from the law school of that city the same year. As the law reporter of the Cincinnati Commercial he gained journalistic experience. In succession served as assistant prosecutor of Hamilton County, collector of internal revenue of the First Ohio District, judge of the Superior Court of Ohio, Solicitor-General of the United States. In 1892 he was appointed United

mistakable emphasis to the sculptor's idea. The statue is to eighteen feet high.

**An Ancient Giant.**  
The complete skeleton of a human giant has been found at Holbeach, England, a little Lincolnshire fen town between Lynn and Spalding, during excavations for the foundations of two new houses. Every bone was in perfect condition and not a tooth was missing. The skeleton measured seven feet two inches in length. A curious key, five inches long, with triangular handle, was found near the bones. Stukeley, the famous antiquary, who was born at Holbeach, records that at the spot where the discovery has just

with the consent of the Government of Colombia, and the purpose of its draining, sordid in itself, rests on a basis of quaint romance. It is a very strange tale which Mr. Benjamin Taylor tells in the English Illustrated, under the title of "A Quest for Sunken Treasure."

"This lake," says Dr. Zerba, "is the celebrated 'El Dorado.' Here, it is said, the Cacique of Guatavita was covered with a sticky substance, over which gold dust was strewn, which golden covering constituted his vestment when making the sacrifices. The term 'El Dorado,' it should be explained, means the Golden One, or the Golden Man, not the Golden City, as is commonly supposed."

The Cacique of Guatavita, who had an army of 30,000 men, used to rule there over 1,000,000 people.

This lake, between 9000 and 10,000 feet above the level of the sea, on the summit of a conical mountain, they regarded as the residence of their pro-

WILLIAM PENN'S COMPASS.

the McNeal home visited and the Penn compass, with its attending paraphernalia, carefully inspected.

The instrument consists of a block of walnut wood, about three and a half inches broad and nine inches long, hollowed into a box. The box is neatly lined with some white substance, and

LAKE GUATAVITA. (Showing the tunnel made by the Spaniards in their attempts to drain the lake.)

teeting deity, to whom they thought it necessary to make offerings twice a year. In consequence all the Cacique's subjects assembled at the stated times, with their gold offerings, and, forming in grand procession, advanced with music to the lake. Arrived there, the Cacique and the principal chiefs embarked on the lake in large canoes, by steps formed in the bank, and the people at the same time spread themselves all around the lake. On arriving at the centre of the lake the chiefs anointed the Cacique and powdered him over with a profusion of gold dust, hence the name of El Dorado—the Golden One.

the degrees are printed across one end. A heavy steel needle is accurately balanced, and a glass top set in cement covers the compass. The movement of the needle is quite limited, as can be seen in the accompanying memory picture, the swing being through an arc of only about forty degrees. The compass, with the instruments with it, such as rulers, dividers, etc., bears the unmistakable marks of age.

The family in possession of this curious relic has resided in Missouri for many years. Among its numbers have been some of the pioneer Methodist ministers of the State, and also General John McNeal, a Federal commander.

### A Bottle-Washing Machine.

A new bottle-washing machine has just been put upon the German market. The device has many advantages, it is claimed, over similar machines known thus far. The bottles are first dipped into warm water, get filled, turned around several times, and then reach a system of brushes, by which they are scrupulously washed and cleaned inside and out. As soon as the bottles have gone through this process the machine provides for a thorough warm and cold douche, and

GERMAN BOTTLE-WASHING MACHINE.

all the operator of the machine has to do is to remove the cleaned bottles and replace them with others. One thousand bottles can easily be washed and thoroughly cleaned in less than an hour's time.

Golden eagles are increasing in the Scottish Highlands, owing to the efforts made by large land owners for their preservation.

Fully 2500 persons commit suicide in Russia every year.

WILLIAM H. TAFT.

States Circuit Judge of the Sixth District. In 1896 he became dean and professor in the law department of the University of Cincinnati. In 1900 he became Chairman of the Philippine Commission.

### Lesson to Bumptious Newspapers.

There is really no necessity for the New York papers to poke fun at the personal columns of their country contemporaries. It is quite as interesting for the readers of the Pineville Paper to learn through the columns of that valuable news medium that Peter Green is painting his henhouse green as it is for the patrons of the New York daily newspapers to be informed that Mrs. Vanderbilt has a new gown or that Mr. Astor is putting a new front on his Newport villa. The plutocracy of Pineville is just as important to Pineville—as is the millionocracy of New York.

The Scandinavians now have an enormous fleet of big steel tramp ships in serious rivalry with the British.

Food for thought sometimes results in mental indigestion.

## THE GREAT DESTROYER

Automobile masquerade runs are the latest.

A brick house is more enduring than one of stone. A well constructed brick house will outlast one built of granite.

During the last three years twenty-two millionaires have died in England. Their average age was seventy-five years.

The average man will die for want of air in five minutes; for want of water in a week; for want of sleep in ten days.

Two or three hives of bees on a Kent (England) farm have declared war on the poultry, and several fowls have been stung to death.

In the Sandwich Islands there are twice as many Japanese as natives, and the Chinese outnumber the natives by a small excess.

the ground that letters patent have no intrinsic value a woman was acquitted of theft on her trial at Vienna for stealing such a document.

Seventy Polish schoolboys at a German gymnasium have been sentenced to terms of imprisonment from six weeks downward for belonging to a secret society.

The great violin neighborhood is Markneukirchen, Saxony. In that town and vicinity there are about 15,000 people engaged exclusively in the manufacture of violins.

In accordance with a superstitious custom, a Hungarian girl was entering a chapel in Staranovore to toll the bell during a thunderstorm to ward off lightning when the chapel was struck and the girl killed.

In New York, at the lowest possible average, 500,000 people live in rooms which ought to be considered absolutely uninhabitable, dark and without any window or ventilation.

Tight lacing caused the death of Della Ackerman in the Cook County Hospital, Chicago. Constriction of the vital organs resulted from constant compression, and septic poisoning ensued.

A feature of Iowa's dairy exhibit at the St. Louis World's Fair will be a statue in butter of John Stewart. It will be life size and will be kept frozen in a glass case throughout the Exposition.

The best protection against cold is the skin of the reindeer. Any one clothed in such a dress, with the addition of a blanket of the same material, may bear the lowest temperature of an Arctic winter's night.

Scotland has an area of 19,002,482 acres, of which 4,894,406 acres are under cultivation; 112 persons own one-half of the total area and eighteen persons own one-fourth of it. One-fourth of the tenants hold five acres or less and nearly one-third hold between five and twenty acres.

Animals have a language made up of signs or inarticulate sounds expressing impressions, sensations, passions, but never ideas. So this language excludes conversation and is limited to interjections or signs or movements expressing joy, grief, fear, anger, all the passions of the senses, but never more.

Tobacco is both cultivated and consumed on a large scale in Japan. The plant was introduced by the Portuguese in the seventeenth century, and the trade in it is a Government monopoly. Tobacco is almost universally used in a small pipe. While cigarettes are manufactured in large quantities, they are nearly all exported.

The Lutheran Church ranks first among Protestant denominations in the United States, having 1200 congregations and a membership of 1,800,000, forty-eight theological seminaries, forty-three colleges, fifty academies, ten young ladies' seminaries, twenty-two hospitals, fifty-two orphan asylums, twenty homes for the aged and eight deaconess houses.

### Best Apples Sold in Boxes.

In the fruit trade it is no longer the thing to order a barrel of apples, if you wish to get the best. Only inferior apples are packed and shipped in barrels, either for home or export trade. Fruit growers have discovered that they can get from \$3 to \$4 a box for apples that will bring only \$5 if sold in a barrel; and a barrel will hold three times as many apples as a box. From August to October apples overshadow all other fruits in the New York export trade. The commission houses handle 500,000 boxes and 900,000 barrels every week. The demand for American apples in England increases every year. More than one-half the apples brought to New York City are exported. Kings, Baldwins, Greenings and Ben Davis apples are the surest sellers. The best of them come from Lockport. The New York Central pier, North River, which does not cut any figure in the general fruit trade, is the centre of the wholesale apple business.—New York Times.

### Efficacy of Turkish Censorship.

Frequent testimony has been borne to the vigilance and intelligence of the Turkish censorship, but it would be difficult, remarks the Westminster Gazette, to match the most recent instance. A German engineer in the Lebanon district placed an order for an electrical engine with a Paris firm. It was to be delivered immediately. The firm telegraphed to inquire how many revolutions a minute. "Fifty hundred revolutions," he telegraphed back. Next day he was arrested on a charge of treasonous correspondence with a firm in Paris. As he was able to assure the local officials of the innocence of his motives no diplomatic incident has followed.

## SOME STARTLING FACTS ABOUT THE VICE OF INTEMPERANCE.

I have lately seen in an English newspaper the announcement that a public house is for sale, and the advertisement contains the following sentence: "These premises are surrounded by numerous manufacturing and employing thousands of well-paid hands, who inhabit numberless dwellings in this dense neighborhood. The trade is large, full priced, and mostly done at the counter, approaching \$3000 (\$400) per month."

This coldblooded announcement smells of the pit. Beezebub himself could not frame a more infernal sentence than this one, in which the dram dealer tells how cunningly he has planted his death trap between those laborers' wages and all their needy wives and children. He has reared his toll gate right in the very track of these well paid hands, so that he may levy on them at the rate of \$2000 per month! For this sum he retails to these operatives disease, poverty, disgrace and endless destruction. We see our fingers instinctively twitching to grip such a scoundrel by the jugular, and getting up until he is as purple in the countenance as any of his victims.

But why spend our righteous indignation upon a foreign liquor seller, when this same conspiracy against the wages and honor and lives of workmen is being carried on in our land? Precisely the crime which that Englishman so shamelessly advertised is being perpetrated here in all our factory towns, in all our cities, and in a great majority of our villages. At this time the labor question is one of the foremost questions of the hour. Discussions about labor, about wages, and about the needs of the laboring classes are engaging the pen and the tongue of the ablest writers of the country. Both patriotism and philanthropy are studying the problem: "How shall the laborer be elevated?" and "How shall the inequalities in a degree be remedied?" After all, the chief problem, to my mind, is to teach the laborer how to save and how to use aright the money which he earns. High wages are not always a blessing. They are often a curse. Master mechanics tell me that in the "inflation times," when they paid their hands high wages, the increased pay was a terrible temptation. With such wages, a month's larger take in the pocket was "done at the counter," when wages are low, and work is scarce, he is tempted to drink, in order to drown worry and sorrow. They are often a curse. Master mechanics tell me that in the "inflation times," when they paid their hands high wages, the increased pay was a terrible temptation.
