day was a tremendous shock to his lamily as well as to his many friends in and around Abbeville, who learned of the sad news with regret and sorrow, for he was well known here, having many friends and a large family connection. His remains were brought to his old home about 5 miles northeast of Abville and after being funeralized in Beulah church by Rev. McGee were laid to rest in the family burying ground in the presence of a large number of friends and relatives who had gathered to pay their last tribute of esteem and love to his memory.

The deceased was engaged in business in Augusta, Ga., and had by frugality and close attention to business gathered around him a sufficiency of this world's goods to make himself and family comfortable and to enable them to live at ease, and 'its unaccountable why just at this time the tragedy so sad should have bappened, he had no enemies, but was as far as known at peace and love with all mankind. The awful and heart-rending tragedy will perbaps ever remain a mystery until the final summing up of the affairs and deeds of mankind in that great day when all things shall be revealed.

A wife and four children, together with relatives and friends survive him and are now in the depths of their great, sorrow in the butter anguish of which they have the sincere sympathy of many friends.

Mrs. T. W. Morton and children with her stater Mrs. Anoie Moore came by Abbeville where they spent a day and night with their dister Mrs. Robert M. Hill, leaving the next day for their home near Augusta, being accompanied by their kinsman Mr. J. L. Perpin and their friend Mr. G. M. Beasley.

SHE FOILED A PLOT.

How Mme. Alboni Frustrated &

Scheme to Hiss Her. "Once upon a time, when Mme. Alboni informed of the existence of a plot to his were to be found, she donned male attire, to which her short hair and robust figure helped to complete her disguise, and went to the cafe at which the conspirators met. Here she found them in full consultation, and taking a seat at a table she listened to their conversation for a time. After roundings, with glimpses of a smiling awhile she addressed the leader, saying: landscape through every window. "I hear that you intend to play a trick upon some one. I am vory fond of a little practical joke myself and should be glad if you would allow me to join you on this occasion."

this evening.'
"'Indeed! And of what is she guilty?" "'Oh, nothing, except that, being an Italian, she has sung in Munich and Vienna to German audiences, and we think she ought to receive some castigation for

her unpatriotic conduct.' "'I agree with you, and now please tell me what I am to do.' " 'Take this whistle,' said the leader.

At a signal to be given at the conclusion of the air sung by Rosina the noise will begin, and you will have to join in.' "I shall be very glad to do so,' said the singer and put the whistle in her pocket.

"In the evening the house was packed —every seat was occupied—and the audience warmly applauded the opening numbers of the opera. In due course Mme. Alboni appeared, and at the point at which she was about to address her those for the commitment has a second tutor a few of the conspirators began to make a disturbance, not waiting for the

signal. "Without showing any concern, Mme. Alboni walked down to the footlights, and, holding up the whistle, which was hung to her neck by a ribbon, she exclaimed: 'Gentlemen, are you not a little she lacks, and nine women out of ten before your time? I thought we were not in the village have less to spend on to commence whistling until I had sung

"For a moment, a deathly stillness prevailed; then suddenly the house broke into thunders of applause, which was led by the conspirators themselves."

A SEAMLESS TURE.

There Are Three Operations by Which It May Be Made.

Henry Souther said at a recent meeting of the National Association of Mechanical Engineers that the scientific and technical designation of a tube, whether seamed or seamless, depended solely upon the tube itself and not upon the process followed in its manufacture. Referring to the dictionary you will find that the word "seamless" means without seam, which conveys no light upon the subject. Turning to the word "seam," it is found that it is defined as a joint, suture, or line of union and her in the last term we find the key. A tube jointed in any way cannot be seamless. If in the primary stages of its manufacture it be lap, butt or lock jointed, it cannot by any subsequent operation be deprived of the seam and, therefore cannot be con-

by any one of three operations-first, a racing business, arrived in Jersey City billet may be by successive steps punched into the form of a tube with extremely thick sides, and these may then by the ordinary drawing processes be reduced to a tube with thin walls; next, the billet may be bored or the blank may be cast with a hole in it and in either case then drawn to the required dimensions; thirdly, the tube may be made by the cupping process, which consists in taking a disk of the metal, forming it into a cup slmpe, grad ually elongating the cup and reducing it in diameter and finally by this means producing a tube.

Each and all of these processes yield a tube which is absolutely scamless and about which there is and can be no dispute. In all tubes formed with a seam the edges have first been separated, then united, either by lap or butt weld or by some lock joint system, and in these the joint cannot be eliminated by any after The custom houses of the us." processes. The custom houses of the United States recognize the difference be-tween a seam and a seamless tube. A seamless tube is one in which the walls have never been separated from the time the metal was in a molten condition to the time of the completion of the tube.-Iron

Wax Figures.

The best wax figures in the world are nade in New York. One firm here has two to show in its store. Each of these figures cost \$200. They are made entirely of wax and are the exact counterparts of two famous New York models. The first figure was sculptured after a French girl. Almost the only difference between the little French model and the polite, dainty figure in wax is that the girl of flesh and blood has dark hair and the hair of the wax figure is yellow. The second figure is that of an American woman. Her figure and the soft pink flush of the skin seem almost perfect. The woman who stood for the model of this one was said York.—Boston Journal.

CONTRASTS OF SEWING WOMEN.

Advantages of the Factory Girl In the Country Ovec Her Sister In the City. You may see in any one of perhaps a hundred shops in this city colorless, sad was at Trieste," writes Henry C. Lahee in hundred shope in this city coloriess, sad "Famous Singers of Today," "she was syed, dingily clad women bending over sewing machines amid squalid surher off the stege. Having ascertained the roundings, with no outlook save through names of her detractors and where they a window opening upon a sordid street. You may see in at least a score of country villages 50 miles from any great city a crowd of neatly clad, happy looking girls and women busied with like tasks, but amid clean and pleasant sur-

The New York women, released from their toil, hasten home to gloomy tenement lodgings and unwholesome fare. The village girls troop from the factory 'With pleasure,' was the reply. 'We to modest but clean and pleasant homes, intend to hiss an opera singer off the stage where food is fresh and abundant. The New York sewing machine woman is an insignificant unit in a great community. She feels daily the pressure of her fellows that are ready to take her place and her earnings. She hears from embittered men and women talk of the rights of labor and the greed of wealth. She knows that her earnings would not keep some of her rich sisters in cut flowers. Whenever she stirs out of her own dingy quarter, it is to see at every step evidence of the luxury in which some live and of the contrast between her lot and theirs.

The village factory girl has hardly heard that there is a labor problem. Her \$200 or \$250 a year, earned at the sewing machine, clothes her well, procures for her small luxuries and helps to keep the family above want. , She makes little pleasure trips hither and you when work is slack and looks forward with confidence to marriage and a home of her own, clean, sweet and comfortable. She never sees among her fellow townsfolk one who has any essential comfort that dress than she has. She never sees a hungry or ragged person, unless it be an occasional tramp, and she hardly grasps the meaning of what she now and then hears about the lives of the poor in great cities.

The New York slave to the sewing machine lives half an hour from the heart of the western world and may, if she will, on any night see Broadway and its throngs by electric light. The village factory girl believes that she would be happy to give up all her comforts for the other's privilege of seeing at will the splendors of the great city. The New York sewing woman would not, if she could, change places with the village factory girl.-New York Sun.

A Turfman's Tale.

A New Jerseyman told me a good story the other day on one of our foremost turfmen, a man whose name is perhaps printed oftener than that of any other connected with racing in sidered when completed as being seamless. America. A good many years ago this A strictly seamless tube may be made turiman, who was not then deep in the with a trainload of mustangs from the plains of Texas. He knew nothing of the laws of the state nor of the ordinances of the city. He knew that he wanted to sell his mustangs and thought the best way to do it was to sell them at auction. Being somewhat gifted in speech, he determined that he would be his own auctioneer. The sale started out well. Fair prices were realized. Suddenly it was interrupted by policemen, who demanded a view of our friend's license.

"License?" he said amazed. "What license? I haven't any license of any kind.

"Well, you can't sell horses in this city without a license. You'll have te some along. No monkey business with Of course he went along, but he was

lucky enough to find at court a friend (a lawyer), who went bail for him in the sum of \$50. Then the lawyer said: "A license costs \$250. You are under bonds. Go shead and finish your sale, collect your money and skip out. Give me \$50 to settle the forfeited bond, and

you are \$200 ahead of the game." It was done accordingly. The turf. man and his friend met in the St. James hotel lately and laughed over the joke -New York Press.
