PROHIBITION WOULD HELP WASHINGTON.

Congressman Aiken Will Introduce Bill.

congressman Wyatt Aiken, who is a member of the house committee on the District of Columbia, said today that the opening of the next session of congress he will introduce a bill providing for prohibition for the district.
Mr. Aiken's position on the district committee will give the bill unusual weight and significance.
When asked about his intention today by a representative of The Daily Mail Mr. Aiken said : "I am on the committee on the District of Columbia but have not tak en any very active interest in the affairs of the district.
But I have been watching the affairs of the district.

"But I have been watching the effect of prohibition in the south, and I have seen that wherever it has been tried it has been beneficial to to the people. Perhaps it has not in every case entirely prevented the sale and use of intoxicants, but it has in sale and use or intoxicands, but it has in all cases been a great deterrent, and I be-lieve that if prohibition is good for certain sections of the country it should be good for Washington, and it is my intention to introduce a prohibition bill for the District

of Columbia and do my best to have it en-acted into law. "If prohibition can be enforced any-where it should be successfully enforced at the seat of the greatest government on earth. I believe if I can succeed in get-ting a favorable report from the commit-scribing her collegiate courses, marriage to Major Boyken at one time the feature through the senate all right. President Taft should not balk at a good prohibition measure if he can so easily digest the last tariff steal."

Hon. Wyatt Aiken, of Abbeville, is in Walhalla today shaking hands with friends wainana today snaking hands with intends here and from the country. He is the same genial, whole-souled fellow he has ever been, but carries with him now a pe-culiarly bright smile. The latest addition tion to his interesting family is a charm-ing little lass, and the Third's big Con-mersume is only as a other businetic over the gressman is quite as enthusiastic over the little Miss during his vacation as he is diligent and painstaking with his duties dur-ing the sessions of our National Congress. His many friends here are always pleased to meet him.

Congressman Wyatt Aiken was over last Thursday and Friday. Of course eve body here, visitors and all, were glad to see him, and he came about as near knowing every man, woman and child in the walking directory of the Third Congres-sional district-Greenwood Index.

The names of the consignees were in the two lines of ship news, and simply by looking in the directory I found their office without the slightest trouble. There I learned where the cargo was tied up. It was at a wharf in Hoboken or Weehawken, I don't remember which, and I made for that. When I turned from the street down the wharf, there she was, lied up alongside, her name on the wheelhouse. She was about half unloaded, and men in war so friendly in times of peace. Importance of Regular Living.

A question has lately arisen as to the, increase or the reverse in nervous diseases, some arguing that the cause of the supposed increase in such nervous diseases lies

in the increased demand made by the conditions of modern life upon the brain. It is quite true that the conditions of life are very different nowadays from what they were a few years ago. We now live in a high that A shall do the bidding and the retion, when greater effort is needed in every branch of life to attain a successful position, when the brain is always working and there is constant tension. Such conditions, it will be perfectly obvious to all, are not favorable to a diminution of nervous diseases, but rather the reverse. At the same time, it cannot be denied that the comforts of life have increased. We have better sanitation, cleaner houses and fresher air. So much for the first stage in the plot. There can be no question that men of The sale being concluded, A, B, C and D regular habits are healthier, happier, live forgather at some obscure public house, longer and do more than those who obey caprice and impulse. The man who knows no system in the details of his life, who exhausts pature at the instance of a passing whim, who drinks and smokes to excess, who wastes the talents bestowed upon him, is the one who must sooner or later fall a vietim to disease. Regularity and moderation in all things should be the motto of life, and it should be remembered that regularity does not necessarily precise the enjoyment of variety. A certain amount of variety prevents man from becoming a mere machine, but variety should not in-terfere with those regular habits of life which are necessary to the maintenance of What imagination will do I can show health .- New York Ledger. from my own experience. Why He Gave Nothing.

"I've encountered many an excuse for 'sidestepping' the collection basket in church," remarked a Jersey commuter, "but the prize excuse came to me last Sun-day out in our town. Next to me in church sat an acquaintance who had taken out a dollar bill; but when he saw the collector was a substitute for the regular brother, he put the money back in his pocket. I taxed him with it good naturedly on the way out

and he was very frank. "You needn't publish it,' said he, but 1 know that man pretty well. Now, I happed to owe him \$5, and he's been dunning me to owe him \$5, and he soeen dumning me unnecessarily for it. I know him so well that I know if I put that dollar bill in the basket he'd find a way to abstract it and pocket it as part of what I owe him. And he'd really feel he was justified, too. That's the way he's built don't you see?"

A Scolding Husband Cured.

A woman, whom her husband used fre-quently to scold, went to a cunning man to inquire how she might cure him of his bar-barity. The sagacious soothsayer heard her complaint; and after pronouncing some hard words, and using various ges-ticulations while he filled a phial with colticulations while he filled a phial with col-ored liquid, desired her, whenever her husband was in a passion, to take a mouth-ful of the liquid and keep it in her mouth for five minutes. The woman quite over-joyed at so simple a remedy, strictly followed the counsel given her, and by her silence escaped the usual annoyance. The contents of the bottle being at last expend-ed she returned to the cunning man and ed she returned to the cunning man and ed and returned to the cuming man and anxiously begged another possessed of the same virtue. "Daughter," said the man, "there was nothing in the bottle but brown sugar and water. When your husband is in a passion, hold your tongue, and my life on it, he will not scold you in the future."

STONE, Executor. heard what was the matter with me and explained to me the corrosive nature of the gastric fluid and assured me that noth-ing living and of the nature of a leech could resist it. "My dear boy," said he, "from personal observation of your pro-

ceedings at mealtime I am convinced you could digest a pair of boots, and no leeches could stand a moment against the force of your gastric fluid." I believed him and R. F. STONE, Executor.

No Remedy.

A Puzzled Author.

in the Pyrenees, I once drank from a spring and saw, to my horror, when I had The San Francisco - Argonaut tells an already swallowed a mouthful, that the amusing story about Alphanse Daulet. When he brought out "Sappho," an Amerwater was alive with small leeches. I had a bad time of it for two or three days. ican publishing house that issues religious I firmly believed I had leeches alive and books, not knowing its character, offered sucking my blood inside me. I felt them. I became languid. I believed they would M. Daudet a large sum for advance sheets of the work. He accepted the offer, and drain my blood away. Happily my father the advance sheets were sent. When the publishers received them, they decided that they could not issue the book, and they cabled to the author, "Sappho' will not do.' This dispatch puzzled Daudet. He consulted with numbers of friends, and this was the conclusion at which they eventually arrived: "Sappho" in French is spelled with one "p"--"Sapho," after the Greek fashion. In English it is spelled with two. An unusually acute friend pointed this out to Daudet, which much relieved the novelist, and he cabled back to the publishers, "Spell it with two p's." It is needless to state that the publishers were more astonished at Daudet's reply than he had been at their cable dispatch.

Japanese Journalism

"Japanese journalism," says a mission ary's wife, "is a singular profession in many of its features. There is practically no such thing as freedom of the press in Japan. Whenever a newspaper publishes something unfriendly to the government it is suppressed and the editor is sent to prison. The real editor is never imprisplied the deacon, "but we folks here want to hev wat's goin on in them city churches, oned, though. Every newspaper has what the Japanese call a 'dummy editor,' and is is his sole duty to go to jail every time the paper is suppressed for offending the mikado. Then the real editor changes the name of the paper and keeps on publishing

it. Dummy editors spend most of their time in prison."

Big Eggs.

In the British museum, London, the museum of the Academy of Science at Paris, the National museum at Vienna and in the several institutions for the advance-

ment of science there may be seen speci-mens of birds' eggs which are almost as large as a two gallon jug. These eggs were laid by the epiornis, an extinct and gigantic bird of Madagascar.
