CHAPTER II. Continued.

first," she said; "but slippers are to mother the dear boy. I quote vernot comfortable for walking, and cabs | batim from Nancy. are not really improper. When you you were to champion luckless damwaiter I understood the whole thing. Poor fellow! He looked so surprised. We must go back some day and make are so foolish.'

Sheer surprise kept me silent, and as she pushed back the lap-robe I day. got out and stood at the door of the brougham, trying to think of something effective to say that would not convey too much to the listening Perkins. As I stood there, the door of the next house opened and the steps | added: were flooded with light. Three men emerged, with the complacently prosperous air of those who have dined slowly and well, and I felt as thought | der-I were dreaming as I recognized Starr and Ferguesson, with Casey bringing up the rear. Also, I was unhappily conscious that they saw and knew me, although they passed us without a pause or glance.

'Do you live next to Mrs. Schuyler-Smythe," I managed to inquire, "and do you know Miss Mildred Schuyler- It is so easy to imagine things. Smythe and her cousin Miss-'

I paused, for Miss Nancy Welles' nose was pointed skyward and she stepped haughtily from her brougham | When he told me he had read and as she replied:

"Oh, those impossible people! them, but of course we don't know them.'

They were all waiting for me would be, and I met the fire of ques-Randy were in high spirits, but I versation languished. thought Casey looked depressed, and once or twice he smothered a yawn.

"Well," said Randy, as we reached our rooms, "it's been a great night developments. for all of us, eh, Casey?"

'Speak for yourself." he returned... "Maybe you enjoyed it; I didn't. I know what Mr. Schuyler - Smythe died of and how long he was sick; I have not a picayune just now." know he never could take green turtle soup without indigestion and always would order it, and that he never liked caviare. I know that Mildred had chicken-pox when she was five and measles when she was six, and that she inherits her father's delicate digestion. Sometimes she has trouble with her liver-"

"Shut up!" interrupted Starr, but Ferguesson took up the thread of discourse.

"Old Casey was great," he said. "You should have seen him making | Harriet?" himself solid with mother. Honestly, I didn't think he had it in him to be all." so diplomatic."

Casey grinned in rather a sickly manner.

"Good Lord!" he said. "Somebody had to talk to the old lady. You fel-

lows hadn't time." "She invited him to dinner Thursday," said Starr. "I think myself the

thing is as good as settled already ' I felt much relieved to hear it, but as I was going to bed Casey came into my room and lingered there, talking

about nothing in particular. "Billy," he said finally, "I got a look at your friend of the fire as we passed the carriage to-night. She looked all right. Take me around to call, will you? You've done nothing for me so far, and you are in honor bound to help, you know."

I said nothing. At that moment disliked Casey intensely. "You know?" he repeated sharp-

ly, with a rising inflection "Yes," I said; "I know. It's silly business."

"Not at all," said Casey; "simply business."

I said something about wishing to

be left in peace to sleep when I was sleepy. "I expect you to do your part,

said Casey. "I'm willing to make the sacrifice, but it's up to you to help when you can. Remember your career."

"Confound my career!" "Certainly," said Casey. "Good

night." CHAPTER III.

I got a card to Mrs. Joseph Robinson's "At Home," and said nothing about it. One minute I decided to go, and the next I bitterly reflected that it would be better for me to keep out of the way of temptation. I had not yet, however, discovered the color of Miss Nancy Welles' eyes and felt I could not be satisfied until I had done so. This point settled, I should consider the incident closed. So I went and it was indeed the

beginning of the end. Just about that time Casey developed an insistent personality that proved most annoying. He became | marry?" curious as to my engagements and demanded detailed accounts of my Starr, "and it is a most suitable movements every day. Then, too, thing. But Aunt Harriet may interhe suddenly conceived an interest in fere, and it's up to us to do what we my career and a desire for my society which might be flattering but | don't you?" were very inconvenient. Casey Bought new clothes, and whenever I purchased a cravat he borrowed it before I had a chance to wear it. He do I, and Julie is very suitable. But

wore a carnation in his buttonhole and the smile - that - won't - come-off | Harriet comes. Somehow I've taken upon his lips. I had weakly consented to take him to call, and after that he went to Mrs. Joseph Robinson's whenever I did, as well as sometimes when I didn't.

awfully quaint and attractive, with to me. his old-school gallantry. He was so different from the present-day young kidnaping, and of all those things, ways too nasty to tell.

men that Aunt Josephine delighted in him and had urged him to drop in informally whenever he felt inclined. "I knew it was all right from the In fact, Aunt Josephine quite yearned

ordered chocolate I realized how safe about Casey, old-school or otherwise, nor should I have described him as sels; but when you did not tip the quaint. Moreover, my own status with Mrs. Robinson was so formal as to be almost frosty, and she showed no desire to enter into any relation-It up to him. Only you ought to ship with me, however remote. In have told me at first, and we could fact, Aunt Josephine's manner was have talked it over comfortably. Men distinctly inimical, and I raged hotly but impotently.

I mentioned the case to Starr one

'You're talking perfect rot," he said. "Casey is forever tagging after me: I can't lost him."

Ferguesson corroborated this statement with certain amendments, and "He is tame cat about the house

at Mrs. Schuyler-Smythe's. She's perfectly daffy about him. I won-

Starr and I wondered also, and we all became thoughtful. "I consider," remarked Randy, at last, 'that Casey is as good as en-

gaged.' "So do I," agreed Starr.

I felt immensely relieved, and thought I must have misjudged him.

Starr walked down-town with me that he was uneasy in his mind. suspected he wanted me to do some- go forward and respond politely, and believe I've heard my aunt mention thing for him, but when he added that I had not been paid enough I and looked at me. As she looked was sure of it.

I made a few tentative remarks rearound the corner, as I knew they garding the political situation and other topics of general interest, but tions as well as I could. Starr and they were not well received and con-

'Billy," he began at last, "you're a good old sort, after all."

I thanked him and waited further "The fact is," he continued, 'I'm

in no end of a mess." I immediately became apologetic.

"I'm awfully sorry, Starr, but I "Oh, it isn't money; it's Aunt Har-

"Who?"

riet."

"Aunt Harriet. I wish she had my other numerous relations. In fact. I'm not at all sure they ever were born, and that's the trouble. I'm simply badgered to death about them. I began to have a glimmering of

light, and laughed unkindly. "Well, Bertie, what about Aunt

"When?"

"Next week. I'm to dine with them the night she arrives, as surprise. She'll be surprised all right, won't she?'

"Oh, what a tangled web we weave When first we practice to deceive,"

INSERT MIN I quoted maliciously, and then suggested to owning up to a case of mistaken identity.

"Mrs. Schuyler - Smythe would never receive an impostor," objected Starr, "and she's got to keep on receiving me. She thinks I'm somebody else, so I've got to be somebody before dinner. It will be easiest else. Goodness knows I'wish I were then." somebody else. Besides, you forget Casey."

I had forgotten momentarily, but I realized at once the difference it might make in his future. It seemed law at Paragould, Ark., where it is a pity that so eminently suitable a now a fineable offense to be in the girl as Mildred should be withdrawn streets after midnight, reminds us from Casey's radius of action. It that though its penalties have long narrowed competition, and that often since vanished the curfew bell may produces disastrous results. There-Harriet and a sympathy for Starr.

me out, Billy?" I rashly pledged myself to do any-

thing under the sun, and then hazarded a question: "You really think Casey will win

out?"

"Not a doubt of it."

It was delightful to hear the sincere conviction in Starr's voice, and I quite glowed with satisfaction.

'Well," I remarked, "old Casey is all right. Miss Mildred Schuyler-Smythe might live longer and do worse. And I hope they'll both be happy.'

"Look here," said Starr, "you don't know what you're talking about. A girl like Mildred wouldn't look at Casey."

"Wouldn't she?" "Certainly not. Sometimes you

gence. "Then" - I was slightly bewildered -"then whom is Casey going to

"Her cousin Julie, of course," said can. You want Casey safely married,

I said I did, provided he got the right girl.

"Yes." said Starr "that's it. So we've got to get busy before Aunt a dislike to her.'

"It is your guilty conscience." I suggested, but Starr was lost in use of grounds for playing the game. thought and did not respond at once. Finally he spoke, as though simply And Nancy liked him. She said she following out his own train of found him charmingly original and thought and out with any reference

'Then, Bertie, are you and Mildred

cousins? You see, it is a rather com "No. plicated business. Mildred's mother married twice; and the first one was named Schuyler. When she married Mr. Smythe she clung to the Schuyler also, as being more aristocratic, and joined them with a hyphen after No. 2 died-many years ago."

"Is the sister of Mrs. Schuyler-Smythe's first husband and no real relation to Mildred, bue she is 'Br

"Then Aunt Harriet---?"

tie's' mother's sister. See?" "Don't," I begged. "It is alto gether too complicated for me. Who is 'Julie?' "

"Why, she is Julie Schuyler-niece of No. 1 and also niece of Aunt Har-I had never noticed any gallantry riet. She lives with the Schuyler-Smythes, and I wish she'd marry Casey.'

Just then we both looked at our watches and simultaneously remembered important engagements. So we parted, but a little later, as I breathlessly ascended Mrs. Joseph Robinson's brownstone steps, I sighted Starr coming around the corner. Even as I entered one house, he touched the electric button next door, a curtain moved slightly, and I saw a glint of golden hair at Mrs. Schuyler-Smythe's window.

I found Nancy at the tea table, as I had expected, with Casey beside her, which I had not expected. I had left him luxuriously sprawled on the couch in our living-room.

Casey was fluently agreeable, and Nancy was responsive. I intended to be dignified and distantly disapproving, but fear I was merely sullen. I knew I sat and glowered like an angry boy, and the little imps of mischief that laughed at me through Nancy's eyes mocked unmercifully.

I shall always feel grateful to Aunt Josephine, although I am quite sure nothing was further from her thoughts than obliging me. Nevertheless, when she sailed impressively that afternoon, and it was evident into the room, greeting Casey cordially and bestowing a slight nod on me, she did me an inestimable admired my last magazine article I service. For Casey was obliged to while he was dong it Nancy turned the laughter faded from her eyes. and I saw the dawning of another light. It was something greatly longed for, yet not really expected, and I watched it incredulous, tremulous, excited, and doubting if it could indeed be true.

"Nancy," I whispered. "Nancy." She said nothing, and I bent closer, oblivious to everything.

"I thought you didn't care." Red lips curved suddenly and dimples were in evidence.

"Men are so foolish," said Nancy Welles.

I will not dwell upon the days that followed-days when I was entirely too self-engrossed to remember Casey and his matrimonial prospects, or never been born, together with all anything else. The world contained two people, and I was one of them-that was quite enough for me.

There were stolen interviews, long walks in the winter twilight, anxious consultations as to ways and means, and finally a decision. We spoke of it in whispers even to each other It was a pity, for Nancy had always wanted twelve bridesmaids and a "She is coming on for a visit; that's white satin train three yards long, but there seemed no other way to circumvent Aunt Josephine. It was to be the Little Church Around the

Corner. I admit to a creepy sensation about my spine when I allowed myself to think calmly. I had heard that love alone was not enough for the average woman, and how else was I to support a wife? But then I was not going to marry the average woman; was going to marry Nancy, and that made all the difference in the world.

"At dusk," said Nancy, "because Aunt Josephine always takes a nap

To be Continued.

Curfew Law.

The practical revival of the currew still be heard in England, and even in fore I felt a budding interest in Aunt | London. At Lincoln's Inn 9 o'clock each evening hears the ringing of the "You'll do what you can to help curfew from a bell which is said to have been brought from Cadiz at the time of its capture by Essex and Effingham in 1596. A list compiled in 1897 mentions the preservation of the custom in many towns, ranging from Carnarvon to Newport, Isle of Wight, and from Durham to Buckingham, where the bell is rung every day between September 29 and March 25. And Canterbury still rings the curfew from the cathedral, as Oxford rings it from Christ Church at 9 o'clock .-- London Chronicle.

The Christmas Infidel.

Miss Carey Thomas, the head of Bryn Mawr College, said at a dinner in Philadelphia that college girls chose better and also wealthier husbands than other girls.

Miss Carey Thomas, after instancseem positively lacking in intelli- ing a number of Bryn Mawr girls whose marriages had been in every way ideal, told a story of the son of one of these Bryn Mawr girls.

"He came home a few days before Christmas," she said, "from a visit to his cousin. " 'Mother,' he cried. 'do you know

that Fweddy is an infidel?' "His mother laughed. "'An infidel? How an infidel, my son?' she asked. "'He doesn't believe in Santa

Claus,' was the shocked reply."-Washington Star.

Cork oak is to have a thorough trial in the National forests. The bureau of plant industry of the United States Department of Agriculture has assigned two thousand one-year seedlings of cork oak, now at a nursery at Chico, Cal., to be used by the forest service for experimental plant-

An English inventor has devised a new speed meter for automobiles. Placed in front of the vehicle, the exact speed may be ascertained at any time either from the vehicle or from the road. An excess of speed limit is announced by a gong, which continues to sound until speed is reduced. For night driving excess speed is also indicated by the figures on the face of the instrument being illuminated.

Theodore Imback, of the State experiment station, has found a new use for abandoned mines. He has produced in them mushrooms of the best grade, his experiment showing the abandoned mine to be an ideal place for mushroom culture. He is producing mushrooms of the best quality in an abandoned mine near the State farm here, having plants that yield from one mine from \$8 to \$10 worth of mushrooms a day .--Baltimore Sun.

G. A. Campbell recently conducted some experiments to investigate the subject of telephone intelligibility. In his experiments, usually only detached syllables were employed, so as to give the listener no clue from the context. The syllables easy to interchange are right in about half the cases. Thus, while it is obvious that the telephone seriously distorts speech waves, nevertheless, even those consonants which nearly resemble each other are not sufficiently distorted to be indistinguishable .-Scientific American.

Ostriches lay the largest eggs of all birds now extant, according to a writer in the Scientific American, but the ostrich's egg would have appeared small beside that extinct Madagascar bird, the epyornis, which measured more than thirty inches in its smallest circumference. The smallest birds' eggs are those of the minute species of humming birds, which are smaller than the eggs of certain kinds of tropical beetles. But the cuckoo lays the relatively smallest egg. That is to say, while the jackdaw and the cuckoo are about equal in size, the former's egg is five or six times larger of coal-bearing lands. Mr. Brooks' than the latter's. The fact that the cuckoo is wont to deposit its eggs in the nests of birds which are usually much smaller than itself doubtless accounts for this. The relatively largest egg is laid by the kiwi, a strange, wingless New Zealand bird. The egg is no less than five inches long, although the extreme length of the bird itself is only twenty-seven inches.

ONE MINUTE WIRELESS.

Uncle Sam's Trained Men Can Put Up Portable Station in That Time.

"There is no other country with a trained squad of men possessed of apparatus which can be taken from a wagon, set up and put in operation capable of sending a wireless message twenty-five miles and occupying one minute and eight seconds only from the time of command 'Halt, open station!' to the first buzz of the wireless wave producing spark," says Popular Mechanics.

"There is more to opening a wireless station than hauling the apparatus from the wagon. It means erecting a mast forty feet high, spreading for 150 feet each four stranded wires which perform the double purpose of holding up the mast and of serving another smaller set of insulated wire at the base of the mast for a 'ground' and connecting the instruments and the source of power.

"When the first portable wireless was made in this country a few years ago a sixty-foot mast was required, demanding a complicated system of guys, a troublesome ground and several hundred feet radius of clear space for the erection of the s'ation. The writer well remembers seeing the first tests of erecting this mast at Fort Myer, Virginia, and thinking that a hostile force would have little trouble finding time to demolish such an outfit during the three-quarters of an hour it took to get it in working

What Shall We Do For Lobsters? Approximately 20,000 people have supper in or near the Tenderloin each night. Next year, when newer Lobster Lairs are built, the number is expected to increase to 30,000. Several thousand pounds of lobster, and several thousand quarts of champagne (besides innumerable other things to eat and drink) are served by several thousand waiters every night. And in the morning there are several thousand empty pocketbooks and several thousand aching heads.

You have doubtless heard Mr. James J. Hill's shrewd epigram to the effect that it is not so much the high cost of living which ails the United States, as the cost of high living.

The cost of eating lobster must increase. The demand grows, but the supply diminishes. Millions of pounds of lobster are caught along our coasts each season, but the Government statistics show that, despite the work of various fish commissions, the available supply has shrunk more than fifty per cent. within the past three years. In short, starvation stares the Tenderloin directly in the double chin!-Everybody's Magazine.

Solving the High-Price Problem. It seems that in the year 1200

eight cents a day was high wages for an expert artisan. We move to have the scale of prices of commodities reduced to the 1300 standard, with present wages left untouched .- Philaaelphia Inquirer.

There are 6300 electric lights on the Mauretania.

Benjamin B. Hampton, editor of Hampton's Magazine, considers the subject of "Who Shall Own Alaska-The Guggenheims or the People?" of so much importance that he himself has prepared an article on the subject for that periodical. A table of statistics shows Alaska's wealth to be anywhere from fifteen billion dollars to a trillion and a half.

"No man can estimate accurately the wealth of Alaska," says Mr. Hampton, "wealth that is to-day the property of the people of the United States, theirs just as surely as if they were stockholders in a corporation. Nearly one quarter of Alaska has not even been explored. An Alaskan said recently that the only two persons who really know anything about 'Alaska are the Almighty and Alfred H. Brooks. The latter is a member of the United States Geological Survey, and we have what he knows about Alaska.

"Mr. Brooks says that only twenty per cent. of Alaska has been surveyed at all. That is, only this much has been passed over even in reconnoissance surveys, which barely divide vast stretches according to their geological character. Survey in detail has covered less than one per cent, of the territory. This affords at least some basis for an estimate. What is known of that one per cent., added to what is known of a patch here and there, suggests the possibilities for the rest.

"There is sound reason to believe there is \$500,000,000 worth of placer gold in Alaska. There may be a hundred or a thousand times that amount.

"As for lode gold mining, there is practically only one deep gold mine being worked in Alaska, the Treadwell-the Rothschilds are said to control that-and it has produced so far \$30,000,000. There may be at least \$625,000,000 lode gold in Alaska.

"As for copper, this one item alone will some day make a big crop of Alaskan millionaires. The Government survey experts say, "it is impossible to estimate the copper reserves." Others say there is another Montana

there, another Arizona. In coal, the official Government figures can be definitely obtained. The coal areas known at this time aggregate 1238 square miles, three times the area of Pennsylvania's coal-bearing fields-and much of Alaska's coal equals or betters Pennsylvania's in quality. In unsurveyed areas there are some fifty thousand square miles lowest estimate of Alaska's coal reaches the stupendous total of 15,-104,500,000 tons; and, he adds, it would be conservative to multiply this figure by ten, or even a hundred.

"There are thousands of tons of other minerals: silver, quicksilver, tin, lead, iron. There is also petroleum. There may be vast quantities of oil under large areas. Of silver, 1,817,000 ounces have been taken out. Iron abounds. "One great source of wealth-seal-

The total of this single item reaches the amazing figure of \$125,000,000. The salmon industry produces a value of \$10,000,000 every year. It is estimated that there 000,000,000 feet of saw timber in Alaska; probably there is twice that

ing-has been exhausted already.

After the faction, and, in fact, a piece of pith formal opening Professor Morse and his associates offered to sell the in- as the original sac is, as often as not, vention to the United States Government for \$100,000, but the price was considered too high. The Government had appropriated \$30,000 toward the construction of the Washington-Baltimore line, but after a short period of operation the Postmaster-General, to whom President Polk had referred the matter, wrote: "Although the invention is an agent vastly superior to any other devised by the genius of man, yet the operation between Washington and Baltimore has not satisfied me that under any rate of postage that can be adopted its revenues can be made to cover its expenditures."-Washington Star.

Hard Luck, But-

Two young women went to the matinee. They could not get seats together, but were told at the box office that each could have an end seat, centre aisle, in adjoining rows, and most likely somebody who came along and had a chair next to one of them would obliginly change seats. Near the close of the first act one of the young women timidly whispered to a heavy, middle-aged man at her side, who had been sitting stiffly and looking straight ahead: 'Are you alone, sir?"

The man buried one side of his face in his program and breathed: "Sh! Wife."-Everybody's Magazine.

SPIDERS.

Some Odd Facts About the Web Spinners and Their Habits.

(From the Saturday Review.)

he can construct an exceedingly per

Zilla, a very common dusky colored

spider which frequents stone walls

and fences, has improved somewhat

upon the orb web of the garden

spider, inasmuch as she leaves seg-

ment devoid of the sticky cross

threads to facilitate her passage from

her hiding place to the hub of the

web. Hyptiotes seems, however, to

have reached the highest development

in the orb spinning art. The snare

is reduced to a mere triangle

stretched upon a firm, elastic thread.

and at the apex sits the obscure little

owner with a coil of thread firmly

held in such a manner that the whole

web is drawn forward under consid-

erable tension. No sooner does a fly

attempt to pass than the thread is

released and the web springs forward

like a catapult upon its luckless vic-

Closely allied to the orb spinners

are those spiders which spin saucer-

shaped snares surmounted by a tangle

of threads into which flies blunder,

falling in their confusion into the

sheets of web beneath. In this group

are the smallest known spiders, some

of them measuring less than a milli-

metre in total body length. Many of

them are aeronauts, traveling vast

distances by silken threads emitted

from their spinners. They seem able

to regulate their flight to some extent

by paying out more thread as they de-

sire to rise and rolling it up by means

of their legs when they wish to de-

scend. Often in suitable localities

and under favorable meteorological

conditions immense multitudes of

these tiny creatures simultaneously

embark upon their strange journeys.

Trial threads, false starts and col-

isions are inevitably frequent and the

accumulations of web descend as

delicate flakes of gossamer, to the

considerable surprise of the super-

stitious rustic, who as a rule attrib-

ates the phenomenon to the fairles or

occasionally implicates the Virgin

The water spider, which makes a

silken bell beneath the surface of

ponds, fills it with air and within it

orings up its family, is well known to

all readers of general works on na-

tural history. It may surprise some,

however, to learn that this species

is very closely allied to our common-

est house spiders. The male of the

water spider is larger than his mate,

a most unusual thing among spiders.

The vagabond spiders include, be-

sides a number of little known

groups, three well marked sections

which we may broadly refer to as the

crab spiders, the wolf spiders and the

jumping spiders. Some of the crab

spiders are exceedingly rapid, but

the more typical species move very

deliberately and trust to cunning

rather than to speed for the capture

of their victims. Often these spiders

are speckled and blotched so as to

resemble exactly the ground upon

which they rest, and one well-known

species, Misumena vatia, which is of

an almost uniform yellow or greenish

white tint, hides in the centre of flow-

ers and seizes insects which approach

to gather honey. Even bees are not

mmune from the attacks of this fero-

clous little creature, their stings

being awkwardly placed for use

The wolf spiders are dark crea-

tures, commonly of some shade of

brown, which run fearlessly upon

the ground in the open. They often

occur in enormous numbers in suit-

able spots, giving one the impression

that they live in "packs." The eggs

when laid are enclosed in a small

spherical or lenticular sac, which is

carried by the female attached to her

spinners. This sac she guards with

the greatest care, manifesting the

greatest concern and searching dili-

gently for it should she be deprived

cut to approximately the same size

A small section of the wolf spiders,

popularly known as the "pirates,"

frequents the herbage upon the sides

of ponds and streams. They chase

their prey upon the surface of the

water, often diving when threatened

by an enemy. An allied species ac-

tually constructs a raft of dead leaves

and other debris, upon which it cir-

cumnavigates ponds of considerable

magnitude, hiding beneath the raft

Probably, however, the most curi-

ous spiders as far as habits are con-

cerned, are the salticids or jumping

spiders. These creatures have been

fairly extensively studied, especially

in the United States, and their life

histories would make a volume teem-

ing with interest. The antics of the

male during the courting period are

most extraordinary, especially when,

as often happens, several suitors as-

pire to the hand of one lady. Dancing

matches and wrestling bouts, in which

the spiders appear carefully to avoid

using their poison apparatus, are the

usual means of deciding the claim,

and, the female having made her

choice, the rejected suitor departs,

little the worse for the encounter.

Should, however, two females come

to blows the result is very different.

Within a few moments the stroke Cf

a poison fang generally leaves one

A Dire Threat. "Caless you take better care of yourself you may go blind."

"Well, I've seen everything, doc."

"But you may also go deaf, and then you can't hear yourself talk."-Louisville Courier-Journal.

Delicacy. "How old are you?".

Journal.

"Twelve." "A girl of twelve should tell her: mother everything." "But my mother is so innocent!

Really, I haven't the heart!"-Puck.

A View to Discipline. "Did you pardon that convict because he was a poet?"

"Yes," replied the governor; "apenitentiary is bad enough, without encouraging temperamental people toake refuge in it."-Washington Star.

Justified.

"Mr. Bliggins says he is awfully, bored." "After talking with him for five

minutes and discovering what he-

thinks about," replied Miss Cayenne, "you can't blame him."-Washington Illness.

"You say you were away from the office yesterday because of illness?" said the stern employer.

"Yes," replied the young man whoknew he was discovered. "Several of the umpire's decisions made me sick." -Washington Star.

Sweet Revenge.

"I suppose you will be too righ totake in summer boarders this year?" "Well," answered Farmer Corntossel. "we'll take 'em jes' the same. Mandy an' the two gals want somebody to show off their good clothesand jewelry to."-Washington Star.

A Distant Prospect.

"And you say you love me?" "Devotedly!"

"With the cost of living as high as "Indeed I do, and when the cost of living is less I will prove my love

by making you my wife."-Houston

Another Convert. "Are you in favor of reforming the calendar?" "I am, by gosh! It would help

mightily with the plowing to take a few weeks off winter and tack it onto early spring."-Louisville Courier-A Household Ordeal. "What makes you grin when every-

body tells you the fruit crop is a failure?" "Because," replied Mr. Crosslots, "it makes me hope that maybe I'll

miss the fuss and worry that happen every time preserving time comes round."-Washington Star.

The Class in Literature.

"Who were the lake poets?"

"A coterie of bards who lived near the English lakes, professor. Their works were somewhat similar." Very good. Now state what you know about the modern breakfastfood school."-Louisville Courier-

All the Details,

Journal.

"I'll bet the census for this locality is complete."

"Told the enumerator all about yourself, eh?"

"Yes; and I also gave him a lot of inside information about the of the combatants dead upon the neighbors."-Louisville Courier-Jour-! nal.
