

him know she had seen enough of him. Or . . . "What's the matter?" he managed to ask.

"I couldn't afford to keep her with hay forty-five dollars a ton," Dede partment after department, a score of answered. "My brother's expenses have been higher, as well, and I was driven to the conclusion that since I could not afford both, I'd better let the mare go and keep the brother." "Who bought her?" he asked.

Dede's eyes flashed in the way long since familiar to him when she was angry.

"Don't you dare buy her back for me," she cried. "And don't deny that that was what you had in mind."

"I wish you would reconsider, Miss Mason," he said softly. "Not alone for the mare's sake, but for my sake. Money don't cut any ice in this. For me to buy that mare wouldn't mean as much as it does to most men to send a bouquet of flowers or a box of candy to a young lady. There's nobody I feel chummy with except you, and you know how little we've chummed-once a week, if it didn't rain. on Sunday. I've grown kind of to depend on you. If you'd just let me buy

her back-" "No, no; I tell you no." Dede arose impatiently, but her eyes were moist with the momery of her pet. "Please don't mention her to me again. If you think it was easy to part with her, you are mistaken. But I've seen the last of her, and I want to forget her." Daylight made no answer, and the

when he engaged Wilkinson, almost doubling his big salary, and brought door closed behind her. get her. Then you deliver her to that address up in Sonoma County. The man's the caretaker on a little ranch I have there. Tell him he's to take

whacking good care of her. And after that forget all about it. Don't tell me the name of the man you buy her from. Don't tell me anything about it except that you've got her and delivered her. Savvee?"

But the week had not passed, when Daylight noted the flash in Dede's eyes that boded trouble.

"Something's gone wrong-what is it?" he said boldly. "Mab," she said. "The man who

bought her has sold her already. If I thought you had anything to do with it-"

"I don't even know who you sold her to," was Daylight's answer. "And what's more, I'm not bothering my head about her. She was your mare. and it's none of my business what you did with her. You haven't got her, that's sure, and worse luck. And now, while we're on touchy subjects, I'm going to open another one with you. And you needn't get touchy about it, for it's not really your business at all. It's ... Jout that brother of yours. He roeds more than you can do for him. Selling that mare of

yours won't send him to Germany. And that's what his own doctors say he needs-that crack German specialist who rips a man's bones and muscles into pulp and then moulds them all over again. Well, I want to send him to Germany and give that crack a flutter, that's all."

"If it were only possible!" she said, half breathlessly, and wholly without anger. "Only it isn't, and you know it isn't. I can't accept money from vou-'

"Now look here, Miss Mason. You've got to get some foolish notions out of your head. This money notion is one of the funniest things I've seen. Suppose you was falling over a cliff, wouldn't it be all right for me to reach out and catch you by the arm? Sure it would. You're standing in your brother's way. No matter what notions you've got in your head, you've got to get out of the way and give him a chance. Will you let me go and see him and talk it over with him? I'll make it a hard and fast business proposition. I'll stake him to get well, and that's all, and charge him interest."

She visibly hesitated. "And just remember one thing, Miss Mason: it's his leg, not yours." Still she refrained from giving her answer, and Daylight went on strengthening his position.

"And remember, I go over to see him alone. He's a man, and I can deal with him better without womenfolks around. I'll go over tomorrow afternoon."

## CHAPTER XVII.

Collected From Many Towns and Counties of the State.

Lexington .- Col. E. J. Watson, commissioner of agriculture of South Carolina, and J. Whitner Reid, secretary of the State Farmers' union, spoke at two points in this county-at Union school house and at Oak Grove school house. The attendance was not very large, but there was much interest manifested by those present.

Columbia .- The state of South Carolina, through its agents, Commissioner Watson of the department of agriculture and A. F. Conradi, director of the department of entomology at Clemson college, will wage a fight on the "sapsucker" or the "yellow breasted woodpecker," because of the attacks by the bird on the spruce pine trees on the state house grounds.

SYNOPSIS.

14

"You see, I give the value to the land by building the roads. Then I sell the land and get that value back, and after that, there's the roads, all carrying folks back and forth and earning big money. Can't lose. And there's all sorts of millions in it. I'm going to get my hands on some of that water front and the tide-lands. Take between where I'm going to build my pier and the old pier. It's shallow water. I can fill and dredge and put in a system of docks that will handle hundreds of ships. San Francisco's water, front is congested. No more room for ships. With hundreds of ships loading and unloading on this side right into the freight cars of three big railroads, factories will start up over here instead of crossing to San Francisco. That means factory sites. That means me buying in the factory sites before anybody guesses the cat is going to jump, much less, which way. Factories mean tens of thousands of workingmen and their families. That means more houses and more land, and that means me, for I'll be there to sell them the land. Then there's the water. I'll come pretty close to owning the watershed. Why not the waterworks too? There's two water companies in Oakland fighting like cats and dogs and both about broke. What a metropolis needs is a good water system. They can't give it. They're stick-in-the-muds. I'll gobble them up and deliver the right article to the city. There's money there, too-money everywhere. Everything works in with everything else. Each improvement makes the value of everything else jump up. It's people that are behind the value. The bigger the crowd that herds in one place. the more valuable is the real estate. And this is the very place for a crowd to herd. Look at it. Just look at it! You could never find a finer site for a great city. All it needs is the herd, and I'll stampede a couple of hundred thousand people in here inside two years. And what's more, it won't be one of these wildcat land booms. It will be legitimate. Twenty years from now there'll be a million people on this side the bay. Another thing is hotels. There isn't a decent one in the town. I'll build a couple of up-todate ones that'll make them sit up and him out from Chicago to take charge the other holdings. And, oh, yes, I'm pile-drivers hammered the big piles going to plant eucalyptus, millions of them, on these hills."

in with our quarry, I just kept a-going till I got them all. And there's the ship-building company I ain't got a

name for yet. Seeing as I had to have ferry-boats. I decided to build them myself. They'll be done by the time the pier is ready for them." For months Daylight was buried in work. The outlay was terrific, and there was nothing coming in. Beyond a general rise in land values, Oakland had not acknowledged his irruption

on the financial scene. The city was waiting for him to show what he was going to do, and he lost no time about it. The best skilled brains on the market were hired by him for the different branches of the work. Initial mistakes he had no patience with, and he was determined to start right, as

"But how are you going to do it?" Dede asked. "You haven't enough money for all that you've planned."

"I've thirty million, and if I need more I can borrow on the land and other things. Interest on mortgages | hills, the hay-fields were being surwon't anywhere near eat up the increase in land values, and I'll be selling land right along."

In the weeks that followed, Daylight was a busy man. It meant quick work on a colossal scale, for Oakland and the adjacent country was not slow to feel the tremendous buying. But Daylight had the ready cash and it had always been his policy to strike quickly. Before the others could get the warning of the boom, he quietly accomplished many things. At the same time that his agents were purchasing corner lots and entire blocks in the heart of the business section and the waste lands for factory sites. Daylight was rushing franchises through the city council, capturing the two exhausted water companies and the eight or nine independent street railways, and getting his grip on the Oakland Creek and the bay tide-lands for his dock system The tide-lands had been in litigation for years, and he took the bull by the norns-buying out the private owners and at the same time leasing from the city fathers. By the time that Oakland was aroused by this unprecedented activity in every direction and was questioning excitedly the meaning of it. Davlight secretly bought the chief Republican newspaper and the chief Democratic organ, and moved boldly into his new offices. Of necessity, they were on a large scale, occupying four floors of the only modern office build ing in the town-the only building that wouldn't be torn down later on as Daylight put it. There was de

At the same time that his electric roads were building out through the veyed and broken up into city squares, with here and there, according to best chaser of a certain sorrel mare. modern methods, winding boulevards

and strips of park. Broad streets, asked. well graded, were made, with sewers and water-pipes ready laid, and macadamized from his own quarries. Cement sidewalks were also laid, so that all the purchaser had to do was to select his lot and architect and start building. The quick service of Daylight's new electric roads into Oakland made this big district immediately accessible, and long before the ferry system was in operation hundreds of residences were going up. The profit on this land was enormous. In day, his on-slaught of wealth had turned open farming country into one of Pittsburgh, has some features which of the best residential districts of the city.

But this money that flowed in upon him was immediately poured back into his other investments. The need for electric cars was so great that he installed his own shops for building them. But no matter what pressure was on Daylight, his Sundays he re- the unique method employed of reachserved for his riding in the hills. It ing the upper floor. In the living was not the rainy winter weather, room, which is probably 20x35 feet, h however, that brought these rides with Dede to an end. One Saturday afternoon in the office she told him not to expect to meet her next day, and, when he pressed for an explanaion.-

For six weeks hand-running Day light had seen nothing of Dede except in the office, and there he resolutely refrained from making approaches. But by the seventh Sunday his hunger for her overmastered him. It was a 'stormy day. A heavy southeast gale was blowing, and squall after squall of rain and wind swept over the city. He could not take his mind off of her, and a persistent picture came to him of her sitting by a window and sewing feminine fripperies of some sort. When the time came for his pre-luncheon cocktail to be served to him in his rooms, he did not take Filled with a daring determinait. tion, he glanced at his note-book for Dede's telephone number, and called

for the switch. At first it was the landlady's daughter who was raised, but in a minute he heard the voice he had been hungry to hear.

"I just wanted to tell you that I'm coming out to see you," he said. I didn't want to break in on you with-

out warning, that was all." "Has something happened?" came her voice.

"I'll tell you when I get there." he evaded.

She came herself to the door to receive him and shake hands with him. He hung his mackintosh and hat on the rack in the comfortable hall and turned to her for direction. "They are busy in there," she said, Jones, who affected to be surprised at nothing after his crushing experience, indicating the parlor, from which betrayed no surprise now when the came the boisterous voices of young task was given him to locate the pur people, and through the open door of which he could see several college "How high shall I pay for her?" he youths.
