Deafness Cannot Be Cured
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.
We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

W. M. GRAYDON,

WHAT HE HOPES.

Since the war begun we hear of many things that are getting scarce and if the war lasts long we will not be able to get at all. All such evils are attributed to the Germans and several days ago when Mrs. James Hill undertook to give her son, Richard, a good dose of castor oil, by way of consolation she told him that if the Germans did not stop fighting soon there would not be any more oil and this would likely be the last dose he would have to take. Richard gave a long sigh and remarked that he "hoped they would fight on forever," thereby wishing good luck on all other little boys of future generations.

THE POST OFFICE FLOWERS.

Last fall the post office at Abbeville was selected as one of six in the United States to try out the new method of decorating the grounds surrounding the building. Landscape gardeners were sent here from Washington and six hundred yuccas were set out around the building and ornamental shrubs in the outlying grounds. These shrubs are of the magnolia family and are beginning to bloom. The yuccas are all living and will form a solid mass of green against the white brick of the building.

The post office at Abbeville was one of the few that got through the holiday rush without extra help.

THE WEATHER.

The weather for the past week has been anything but pleasant, and every variety has been crowded into this space of time. Last Wednesday night the first thunderstorm of the season visited the town. The lightning was as lively and the thunder as loud as in the summer time. A transformer in front of the home of Mrs. Hemphill was struck early in the night and Fort Pickens was in total darkness for the night. Thursday there was rain most of the day and since then a high wind has prevailed with the thermometer most of the time below freezing. On Monday there was a little snow, mixed with sleet and rain. The peach trees and pear trees that are in bloom stand a poor show for fruit this year. Most of the jonquils have been scorched by the high wind and their beauty is a thing of the past.
