Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

Greenville, March 22.—th ree million dollars is the stated amount which the Southern Railway will expend in the double-tracking of its main line between Spartanburg and Central, and this appropriation is to include the cost of the erection of a thousand-foot steel trestle over Saluda River, which will be second in size to the largest Southern trestle in Kentucky. Three million pounds of steel will be used in its construction.

AUTOMOBILE NEWS.

The extraordinary winter demand for automobiles when considered with the wide spread freight car shortage, has brought about a condition without precedent in the automobile industry. It is no novel thing for dealers, located near an automobile factory, to have cars delivered to them at the factory in good weather and to drive them home over the roads.

It is decidedly novel however to see more than a hundred dealers and their employees, some coming from points 200 miles distant—in the midst of a terrible snowstorm, driving home over roads well nigh impassable in places to get cars to deliver to waiting customers who are unwilling to take chances on demoralized freight deliveries.

This was the condition at the big Willys-Overland plant last Monday when 132 cars were delivered to dealers coming from all parts of Ohio, Michigan and Indiana.

The demand for cars, particularly the new light popular-priced Model 75 has opened up an unusual volume of early buying. This, combined with a freight car shortage, the most serious ever experienced by the industry, has created a condition that has required every ingenuity to meet.

Many carloads have been shipped in gondola and flat cars protected by tarpaulins. A train load of more than one hundred Overlands were shipped to Boston last week, requiring a special guard of three men in addition to the regular crew to see that they were undisturbed during the journey.

Overland dealers at distant points while envious of those located close enough to take factory deliveries, are quite alive to the fact that the factory is doing everything possible to supply them adequately.

More than 800 cars a day are now being produced by the Willys-Overland Company and even this huge quantity seems inadequate for the demand.—Wytheville, (Va.) Enterprise.

HOW TO GET RID OF CUTWORMS IN THE GARDEN

Mrs. S. J. asks what she can do for cutworms and slugs in her garden. I expect that the answer to this question has been given many times elsewhere in the Progressive Farmer, but because it is so frequently asked I am giving it here.

Take 16 pounds coarse bran, 1-4 pound Paris green, 1-4 pound sugar, 2 teaspoonful lemon extract. Bran is much the best, but if you cannot get it substitute corn meal. White get it substitute corn meal. White get it substitute corn meal. White get it substitute corn meal.

The dry ingredients should be thoroughly mixed, then the water, to which the lemon or orange has been added, mixed with it. Do not get the material sloppy; it should be just wet enough to fall apart readily after pressing together. The objection to corn meal is that it does not break into sufficiently small flakes. Scatter in the evening as the worms feed best at night. Sow the material broadcast over the infested area, getting close to each plant. This amount is sufficient for one acre of land. Keep chickens away—birds also as they kill many slugs and other insects later.

In setting out tomato, cabbage or other plants, roll a little collar of white paper around the plant, extending about an inch below and an inch above the surface of the soil.—The Progressive Farmer.

MEXICANS FIRE TOWN.

Columbus, N. M., March 24.—Janos, about forty miles northwest of Casas Grandes, and on the route taken by the American expeditionary force, was set on fire early today, presumably by a band of Mexican bandits. Four large fires were reported by Americans passing near the town.
