DONT'S.

Clemson College, S. C., July 8.—Don't neglect to water the work horse five times each day during the present and coming hot days, at equal intervals. The horse suffers as intensely from thirst as the man that plows him, and the needs for his assimilation of food and ex-pulsion of impurities from the system are equally as great. Don't shut him up in a close stable, especially on hot nights, with little or no ventilation. Don't forget to give him one-eighth of his grain ration in the form of cotton seed meal while hard at work if non-legume hays or fodder is fed with corn. This meal gives him strength and endurance, and enables him to use more completely his other foods.

Don't fail to shallow cultivate crops as soon as possible after each rain to conserve moisture for the use of the plants from now until matured. The fruiting season is the time plants use the greatest amount of moisture and plant food.

Don't fail to sow every available acre in cow peas. They are cheaper than they have been for years, and this is a great opportunity to enrich the soil with them for next year's crops. If you have seed for sale, it will be far better to put them in the ground at the rate of two bushels per acre than to sell them at the present prices. Use 200 to 400 lbs. of 16 per cent phosphate per acre if you expect to get the best results. If they are turned, don't forget that the same acid

phosphate may be used again for growing next winter's and next summer's crops.

Don't fail to let all animals have constant, free access to pure water.

Don't fail to keep planted a succession of garden crops for use during the hot months and during the fall and winter. These cheapen expenses and save ills and doctor bills.

Don't over eat or over feed. It is not the amount ingested, but the amount digested that is worth while.

Don't fail to arrange to attend the Clemson short course July 31 to August 26, and combine outing with instruction at less cost than either can usually be secured alone.

Don't fail to get acquainted with your County Demonstration Agent, and get his co-operation in farm work if you feel the need of help and advice.

The Second Term.

"Several of the newspapers of South Carolina are pleading the unwritten law for second terms for Governor Manning's re-election, and I have been thinking over the record," declared Prof. J. B. Watkins, superintendent of the Belton schools, who was a visitor in the city today. "I find that only nine of the 66 governors of the state have been given second terms, and one of these was Robert K. Scott, the radical governor."

"Possibly I can recall the names of the governors who were given second terms. First there was Charles Pinckney. Then Robert K. Scott, Hugh S. Thompson, John Peter Richardson, B. R. Tillman, M. B. McSweeney (or may be it was Ellerbe), D. C. Heyward (who was unopposed), M. F. Ansel and Cole L. Blease.

"The newspapers who are now pleading the unwritten law in advocating Mr. Manning's re-election have not supported but two of the governors for second terms during the past 20 or more years. These two were Heyward and Ansel. If my memory is not at fault, I remember that these same newspapers opposed second terms for Tillman and McSweeney, and yet they are calling on the people now to give Governor Manning a second term because it is 'customary.'"

There are some voters here and elsewhere in the state who would like for Governor Manning to say whether or not he has ever supported a governor for a second term with the exceptions of Mr. Heyward, who was unopposed, and Mr. Ansel.—Daily Mail.
