Would Wake Mother With Loud Groaning

MISS MADGE CLEVELAND'S HEALTH WAS VERY BAD— OPERATIONS FAILED.

There really seems to be no limit to the number of cases wherein Tanlac, "the master medicine," has given relief that can be considered truly wonderful. And the case of Miss Madge Cleveland, of 135 Main street, Equinox, Anderson, S. C., considering the results Tanlac gave her, takes rank with the most remarkable. Her mother, Mrs. L. E. Cleveland, vividly described her daughter's long train of troubles and her many ailments, and expressed deep appreciation for the wonderful effect of Tanlac in building up her health and strength. Mrs. Cleveland's endorsement of Tanlac and her statement regarding the case of her daughter follows:

"My daughter, Miss Madge Cleveland, suffered from a number of ailments, and her system was badly run down and weakened. She had no appetite at all, and would eat scarcely more than one biscuit for breakfast. She had twice been operated on for tumor and appendicitis. The first operation was not successful, and the second was necessary. As a result, her health was undermined and her condition became very bad.

"She was so weak she could hardly walk, and she was so restless at night that she really was very little refreshed when morning came. She would wake us at night many times with her groaning. She lost a great deal of weight, too! It was her side where the cuts were made when she was operated on that caused her so much pain. And, too, her system was generally out of order.

"She has already taken three bottles of Tanlac, and if I had not seen the improvement Tanlac made in her condition, I don't know whether I would fully believe it could be so great, should someone have told me that. She has gained 12 pounds and now weighs 122 pounds—more than she has ever weighed before. She has a very good appetite and it is steadily improving. Really I have told her if she continues to increase the amount of food she eats I will have to make her stop taking Tanlac. And what she eats is nourishing her.

"Her health has improved in every way and she is very much stronger. She goes to sleep now just as soon as she gets in bed, and she sleeps soundly all night. Her nerves are quiet and strong now, though they troubled her a lot before she began to take Tanlac. She used to have bad spells of headache, too, but Tanlac broke them up and she has not had an attack since she began taking it.

"Just before she began taking Tanlac, she decided to go on a visit to Pell City, Ala., but was told she could not stand the trip. But she left for that city just two days ago in fine health, so great was the bene-

Southern Covers Textile District

Washington, D. C., August 23.—Eight hundred and twenty-seven textile plants, carrying 9,865,248 spindles and 214,467 looms, in operation on the lines of the Southern Railway, Mobile and Ohio Railroad, Georgia Southern and Florida Railway and associated lines—that is the record presented in a textile directory for 1916 just issued in booklet form by the industrial and agricultural department of these roads to show the rapid advancement of the textile industry in the South and its possibilities for future development.

The directory shows a total of 635 mills. 152 knitting mills, 33 woolen mills and 7 silk mills, with eleven new textile plants under construction

at the time the information was compiled. The knitting mills have 23,579 knitting machines and 2,935 sewing machines. The names and location of the different plants, with information as to equipment, power used and character of product, are given.

According to the most recent statement of the United States census bureau there are 13,245,148 cotton spindles in the cotton growing states. Of the spindles shown tributary to Southern Railway lines, 88,000 are in Indiana and Missouri, while all the rest are located in the Southern states. These mills with additions since made to the equipment of established plants, make the total number of cotton spindles in the South on the Southern Railway 10,000,000 or five-sevenths of all the spindles in the cotton growing states and almost one third of all the cotton spindles in the United States.
