76th Year

The World Needs Food

Short crops of food products coupled with increased consumption throughout the world calls for increased production of corn, hay, vegetables, meats, fowls, butter, eggs, fruit, Etc.

Americans must make extra efforts to feed, not only themselves but assist in feeding the world. Abbeville county must do her part

Let the people eliminate as far as possible all waste of food stuff, and wherever practicable plant acres and small patches of beans, peas, peanuts, corn and vegetables, and give closer attention to the production of fowls, eggs, milk, butter and meats

Food will be scarce and correspondingly high by reason of the world's demand. Let us use this opportunity to get out of the circle in which we have lapsed of buying food stuffs to raise cotton, raising cotton to buy food stuffs.

Seed at Cost

We have contracted for large quantities of velvet beans, soy beans and peanuts and will distribute **WITHOUT PROFIT** to anyone who will plant them.

Free information and Bulletin will be distributed at the following places:
