The appearance of a few cases of influenza at Camp Jackson has caused the camp authorities to issue an order to prevent gatherings of soldiers. Under the order soldiers are not allowed to enter moving picture shows or other places of amusement indoors in either Camp Jackson or Columbia. Medical officers announce that there are only a few cases in camp and they hope to stamp it out in a week.

### CABLES FROM ACROSS.

The Holy Land is aflame under the impetus of a mighty stroke by the British, French and friendly Arab forces, and the Turks from the Jordan river westward to the Mediterranean seemingly are in rout. Added to their already heavy losses in ground, men killed, wounded or made prisoners, and stores captured in Belgium, France, Italy and the Balkans, the Teutonic allies, judging from first reports of the hostilities begun against the Ottoman in Palestine, are in for further extremely hard usage. In less than a day General Allenby's British forces, aided by French troops and natives under the flag of the king of the Hedjas, struck the Turkish line over a front of 16 miles and penetrated it to a depth of 12 miles, taking more than 3,000 Turks prisoners and overrunning the entire hostile defensive system.

The Serbians it was said were delivered to contractors, who are engaged on work in Asia Minor and Anatolia. It is said they were subjected to terrible treatment and that thousands have died from typhus, Cholera and hunger."

A long-range American gun has been shelling Metz, according to official entente cables, quoting German official press reports. The bombardment has been carried on several days and word has traveled throughout Loraine, despite German attempts to suppress the news. The Germans say they have expected the long-range shelling for some time and point to their guns which fired on Paris to prove that long-range cannon have made possible shelling of cities at great distances. The German reports indicate the gun is located near Pont-a-Mousson.
