

Reynolds Employee Tells What Cured His Wife's Nerves

"She Would Roll All Night Long Without Any Sleep. Any Sudden Noise Would Make Her Jump." Dreco Brings Quick Relief.

"My wife suffered agonies from those dull, heavy, dragging pains in her back says E. R. Evans, the popular operative employed by the R. J. Reynolds Tobacco Company and residing at R. F. D. No. 5, South Winston. She was in terrible misery for a long time and nothing we ever did brought any relief. Her nerves were all on edge and she would roll all night without any sleep. Any sudden noise would make her jump.

"Several friends advised us to try Dreco. She took three bottles and has improved from the very start. Now her nerves are steady and she never has a pain in her back any more. But she is going to take another bottle just to make sure."

Most women lead a confined, monotonous life, narrowed down to the four walls of home the greater part of the day. Such women seem to be easy prey to nervous attacks, sleeplessness, and the hundred and one other little ailments so common to their sex. Dreco is declared to be just what such nervous, depressed persons need to restore their nervous energy and to lift them out of their constipated, dyspeptic habit of life.

Dreco works to counteract the exhausting strain of work by its strong inducement to the delicate tissues to take more food. It plainly induces the nerves and brain to feed themselves more liberally and thus can save countless men and women from chronic neuralgia, rheumatism, sleeplessness, failing mental power and digestive disorders.

Dreco is purely vegetable and is recommended as a quick, natural, and harmless body tonic and system invigorant by good druggists throughout the country.

Dreco is sold in Abbeville by P. B. Speed.—Adv.

Half Your Living Without Money Cost

We are all at a danger point. On the use of good common sense in our 1919 farm and garden operations, depends prosperity or our "going broke."

Even at present high prices no one can plant all or nearly all cotton, buy food and grain at present prices from supply merchant on credit, and make money. Food and grain are higher in proportion than are present cotton prices.

It's a time above all others to play safe; to produce all possible food, grain and forage supplies on your own acres; to cut down the store bill.

A good piece of garden ground, rightly planned, rightly tended and kept planted the year round, can be made to furnish nearly half your living. It will save you more money than you made on the best two or three acres of cotton you ever grew! Hastings' 1919 Seed Book tells all about the right kind of a money saving garden and the vegetables to put in it. It tells about the farm crops as well and shows you the clear road to real and regular farm prosperity. It's Free. Send for it today to H. J. HASTING'S CO., Atlanta, Ga.—Adv.

AS TO FERTILIZERS FOR 1919.

Clemson College, S. C., Jan. 29.—At the beginning of the annual meeting of the Extension Service forces here last week a strong committee of Extension workers was appointed to consider the fertilizer situation and report at the end of the meeting with recommendations as to the use of fertilizers in 1919. The committee held various meetings and consultations with the Director of the Experiment Station, the agronomists and chemists, and after studying the results of 1918 experiments, offers the farmers of the state the following suggestions and recommendations for 1919.

1. Under present conditions—cotton seed meal and acid phosphate seem to be the best and cheapest fertilizer material.
2. Buy no potash for the red clay land sections of the state.
3. For cotton and tobacco on sandy or gray soils use an 8-3-3 fertilizer.
4. For corn we think cotton seed meal and acid phosphate in equal proportions, or a 9-3½-1 formula, will be best.
5. Use nitrate, if available, as a side application on corn; or, instead, cotton seed meal by applying earlier.
6. Experiments show that the use of potash gave very little increase in production of corn; therefore we do not recommend its use this year.
7. We do not advise the use of ground phosphate rock under present high prices.

WINTER ORCHARD SPRAYING.

Clemson College, S. C., Jan. 29.—As a rule spraying orchard trees with lime-sulphur solution for the control of scale should be completed by the middle to last of February. It is true that at times it can be done as late as early March, when the winters are longer, but the March spraying should not be counted on. Therefore, every orchard in South Carolina, whether it be home orchard or commercial orchard, should be in the program of work for January and February, to be pruned first and then sprayed thoroughly with lime-sulphur solution.

This lime-sulphur spraying will not only absolutely control the San Jose scale but it is a good tonic in general for the trees. Obtain your lime-sulphur at once by the most convenient method. It can be had locally from seed houses and nurseries and from drug and hardware stores. Your county agent can usually give information as to the nearest and best dealers and prices.

For good results lime-sulphur wash should be sprayed with a barrel pump with a force of 100 to 125 pounds of air pressure. Mix the concentrated solution one gallon of solution to nine gallons of water, unless otherwise directed. Do not delay this important work, but see that it is done before the first of March.

SWEET CHOCOLATE CARRIED UNDER FIRE

Chocolate Furnished by Y. M. C. A. Arrives Just When It Is Needed

With the American Armies in France, Jan. . . Praising the men of Company D, 109th Machine Gun Battalion, 28th Division, Howard R. Keister, a Y. M. C. A. man of Dunnellon, Fla., tells the sweet chocolate which he secured for them in an isolated platoon, which was under severe fire, across the Vesle river at Fismes.

It was during the heavy fighting eastward from Chateau Thierry, that the men of the 109th Machine Gun Battalion got ahead of their supplies, and the sweet chocolate which the Y. M. C. A. managed to get to them, was specially welcome.

The battalion reached the Vesle river on its advance. There the German line held. Men were thrown across the river by various units to keep in contact with the enemy. There was terrific fighting all along the line. A platoon of Company D was hurried over to help in holding the narrow strip that had been taken at great cost by the American soldiers. It was surrounded on three sides by the Boche, who tried every means in his power to dislodge them,—gas, shells, machine-gun fire and snipers. It was a difficult matter to get food over to them for men with supplies had to cross the river which was exposed and under heavy fire.

FIGHTING PARSON GETS WAR CROSS

John Clifford Wearing Y. M. C. A. Uniform, Proves Himself Real Hero

New York, Jan. . . There have many war heroes, but there is certainly no more conspicuously heroic figure than John H. Clifford, Baptist minister in time of peace, but real fighter in time of war, who has been awarded the Croix de Guerre for extraordinary heroism in action.

John Clifford, as a Y. M. C. A. worker, braved the red wrath of war. He has been in the firing zone as much as the hardest infantryman and was decorated for a most unusual exploit. He was one of three men who braved incessant enemy shell fire while rescuing Col. Albertus W. Catlin, commanding officer of the Sixth regiment of Marines. The trio carried the colonel to safety on a stretcher.

GRAPES FROM CUTTINGS.

Clemson College, S. C., Jan. 29.—Grape cuttings should be made from wood that grew last summer. Cut into pieces eight or ten inches long, with one to three buds on each piece. Tie in bundles of 25 to 100 and bury in a well drained place with tops down. Cover with six inches of soil and a few inches of mulch, being sure the soil is packed firmly around and between the bundles to prevent drying out.

In early spring, when the ground is dry, take all but three inches of soil from the cuttings and replace with six inches of fresh horse manure. This causes the cutting to callus. In March or April plant the cuttings six inches apart in three-foot rows. Be sure to invert the cuttings, having the callused end down, and bury up to the top bud. Cultivate well the first season.

WOOD'S FORTIETH ANNIVERSARY Seed Catalog

Gives the fullest and most up-to-date information, not only about seeds that can be planted to advantage, but also about crops that promise to give the largest profits during the coming year.

OUR 40 YEARS' EXPERIENCE, and an equipment that is unsurpassed in this country, give us unequalled advantages for supplying THE BEST OF Farm and Garden Seeds. Write for Catalog and Prices of GRASS and CLOVER SEEDS, SEED OATS, SEED CORN and SEED POTATOES. Catalog Mailed Free on Request. T. W. Wood & Sons, SEEDSMEN, - Richmond, Va.

MUST SAVE FOOD FOR WORLD RELIEF

Herbert Hoover Now in Europe, and Definite Program of Food Conservation Will Soon Be Announced From Washington. — Millions of Hungry People Looking to America For Food.

Columbia.—With the declaration of the armistice and the cessation of the fighting in Europe there is danger that we, in America who have been affected so lightly by the war, as compared with the sufferings of the people of many European countries, may think our duty done and decrease our efforts toward food conservation.

This must not happen, says the Food Administration. The American people have before them a greater obligation than ever before, because famine is threatening in many lands which have been opened up to the allied world by the evacuation of the enemy, and the millions of people dependent upon the outside world for food until they can make a harvest, are looking hopefully to America.

Hundreds of thousands of American soldiers and their allied comrades must continue to eat, although they have ceased to fight.

The countries that are laying down their arms are plunged into a state of great unrest. No factor is so conducive to anarchy as is hunger.

What may happen in Europe no one knows. But to relieve the world hunger is the surest way to quickly restore the world to normal. For the present the Food Administration is appealing to the American people merely to exercise care and judgment in food buying and food consumption. Later a definite program of conservation of food for world relief will be made public.

Herbert Hoover is now in Europe looking into conditions. As soon as it is known what are the food requirements, this program will be formulated, and every housewife in the land will be asked and expected to participate.

The Government, through the Food Administration, is asking the American people at the present time to carefully use meats, fats, butter, lard, cheese and kindred commodities, and to await the forthcoming food saving program soon to be made public.

WORLD FOOD CONDITIONS ARE SHOWN IN SUMMARY.

Three Billion Pounds of Fats and Three Million Tons of High Protein Feeds Short—Plenty Wheat and Other Foods if Used With Economy.

Columbia.—In support of its policy to keep farmers of the United States fully informed of world food conditions and probable needs for certain commodities, the Food Administration has completed a summary of unusual importance to producers.

The world balance sheet of food products shows a shortage of 3,000,000,000 pounds of fats and 3,000,000 tons of high protein feeds. Among fats are included pork products, dairy products and vegetable oils.

Commodities of which there are sufficient supplies, if used with economy, are wheat, rye, beans, rice, peas, and feeds other than those high in protein. Sufficient beef is in sight to load all refrigerating ships' capacities.

There is enough sugar for normal consumption if other nations retain their present short rations. If they increase their rations, there will be a shortage. Coffee is the only common food commodity of which there is a world surplus. With the possible exception of high protein feeds, the United States has sufficient food and feed for its own people, but to fulfill its pledge of 20,000,000 tons to be sent to Europe by July 1, 1919, there must be continued conservation and avoidance of waste.

According to Food Administration calculations, even with all supplies and best efforts, the world will be far deficient of the normal amounts of fats for two or three years at least.

The future of the American producer who is equipped for general farming seems to lie in liberal crops of meat products and home-grown foods with which to grow livestock economically.

Foreign Nations Urgent Call.

Columbia.—Nations liberated from the German yoke are daily and urgently calling upon the United States for food. The pressure of this demand is emphasized in a cable recently received by the Food Administration from Herbert Hoover, who is in Europe to survey the foreign situation. After a week in Europe, Mr. Hoover cabled that the situation did not then admit of the formulation of a definite program, but that America should be firmly impressed with the necessity for continued conservation, which is more needed now than at any time since the United States became aligned with the enemies of Germany.

Mr. Hoover is now negotiating with the Allied Governments regarding shipping, finances and organizations. Until these details are finally settled, it will be difficult for him to outline a definite constructive program. Mr. Hoover arranged before leaving America for the immediate purchase of 27,000 tons of food to meet the most urgent needs. The first of the fleet of ships carrying these supplies has already reached Europe.

As soon as it is possible to do so, the new program of food conservation for world relief will be made known.

NOTICE OF QUARANTINE.

At a meeting of the Board of Health of the City of Abbeville held this evening in the City Hall in regard to the spread of Influenza in the City of Abbeville, it is ordered until further notice from the Board of Health, that all churches, schools, and picture shows to be closed up, and no public gatherings of any kind allowed. That all parents are required to keep children at home. That a yellow flag be displayed at every home where there is a case of influenza to warn people not to come there. That all proprietors of stores and places of business are required not to allow any more than eight customers in at any one time. That all places serving drinks and cream

are required to use sanitary cups and receptacles.

J. R. POWER, M. D. Chairman of the Board of Health. Abbeville, S. C., Jan. 20, 1919.

FARMERS Make More Money

NEVER before, in the history of the country, have farm products brought such high prices. And the successful farmer the Crop, the greater will your profit be; hence it is essential that you make each acre of land produce its utmost. For prize crops of cotton, corn, truck—use Planters Fertilizer. 90 to 95 bushels of corn—1 to 2 bales of cotton per acre are records established through use of this reputable Fertilizer on Southern farms.

PLANTERS FERTILIZERS

DOUBLES YOUR YIELD

For many years Planters Fertilizer has been the preference of the South's most successful farmers, because it has made it possible to produce bigger, better crops. Make every acre count this year—GET RESULTS THAT WILL PLEASE YOU. Consult our Agent for Free Advice, Information and Prices—or write us direct—TODAY. It means dollars to you.

LIVER DIDN'T ACT DIGESTION WAS BAD

Says 65 year Old Kentucky Lady, Who Tells How She Was Relieved After a Few Doses of Black-Draught.

Meadersville, Ky.—Mrs. Cynthia Higginbotham, of this town, says: "At my age, which is 65, the liver does not act so well as when young. A few years ago, my stomach was all out of fix. I was constipated, my liver didn't act. My digestion was bad, and it took so little to upset me. My appetite was gone. I was very weak. . . I decided I would give Black-Draught a thorough trial as I knew it was highly recommended for this trouble. I began taking it. I felt better after a few doses. My appetite improved and I became stronger. My bowels acted naturally and the least trouble was soon righted with a few doses of Black-Draught."

Seventy years of successful use has made Theodor's Black-Draught a standard, household remedy. Every member, of every family, at times, need the help that Black-Draught can give in cleansing the system and relieving the troubles that come from constipation, indigestion, lazy liver, etc. You cannot keep well unless your stomach, liver and bowels are in good working order. Keep them that way. Try Black-Draught. It acts promptly, gently and in a natural way. If you feel sluggish, take a dose tonight. You will feel fresh tomorrow. Price 25c. a package—One cent a dose. All druggists. J. G.

Run-Down People Vinol is What You Need

Weak, run-down nervous men and women need Vinol because it contains the most famous reconstructive tonics in an agreeable and easily digested form:—Beef and Cod Liver Peptones, Iron and Manganese Peptonates and Glycerophosphates.

We guarantee there is no tonic equal to Vinol.

HERE IS PROOF

Detroit, Mich. "I got into a weak, run-down condition, no appetite, tired all the time and headaches—but had to keep around and do my housework. I read about Vinol and tried it—within two weeks I commenced to improve, and now have a splendid appetite and feel stronger and better in every way."—Mrs. John F. Watson.

Texas, Texas. "I keep house and I was weak, run-down and nervous, back ached a good deal of the time, so it was hard to take care of my chickens and do my work—Vinol has restored my strength, and my nervousness has gone, so I can do my work as well as ever. Every run-down woman should take Vinol."—Mrs. Emma Britt.

For all run-down, nervous, anemic conditions, weak women, overworked men, feeble old people and delicate children, there is no remedy like Vinol.
