## Some Facts About Shoe Prices For Fall and Winter, and Our Policy

There have been so many articles published in the last few months about the high prices of shoes for fall, that we think it is proper for us to come out at this time with a statement of facts.
We are not attempting to make a general statement, but simply as far as our own business is affected by the great advances you have read about.
Based on reports from the most reliable manufacturers of shoes, we find that prices have advanced about 40 percent within the last four or five months.
We are not attempting to explain the reason of this advance. The manufacturers state that they are forced to advance prices for the reason that every article that goes into a pair of shoes has advanced enormously, as well as increased wages.
It is no use to worry about what you will have to pay for your next summer slippers, we are not going into that, slippers should be cheaper on account of so much less material being used.
It's the fall and winter of 1919 that we are concerned with right now.
In the morths of January and February we placed orders fo: our fall and winter shoes to be delivered in July and August.
We bought more shoes than we ever bought in one season, not because we anticipated such advances in prices, but because we wanted to be sure to have enough.
A great part of our purchases came in early and are in stock.

We bought these shoes to sell at a certain price, and we are selling them at just what we expected to ask for them when we bought them.

Howard and Foster Shoes for Men in the beat grades are $\mathbf{\$ 1 2 . 5 0}$. There are lots of good Shoes in tan, brown and black for a great deal less.

Krippendorf-Dittman's Ladies' Boots are \$8. to $\mathbf{\$ 1 2 . 5 0}$.

There are lots of "beauties" made by other manufacturers for $\$ 6.00$ to $\$ 9.00$ in the very same styles, and absolutely guaranteed.

Children's Boys and Misses Shoes will range in prices from $\$ \mathbf{3 . 5 0}$ to $\$ 6.00$, according to sizes and quality.

It is true that these shoes are worth from $\mathbf{\$ 1 . 5 0}$ to $\$ 3.00$ a pair more than we are asking for them, based on the present shoe market, and figuring on what it would cost us to replace our stock; but we bought these shoes to sell this fall and not to hold for speculation.

There should be no "kick" on our fall prices from the consumer, but rather an agreeable surprise after having read all the printed matter on the subject of high prices.

We have just completed our new shoe shelves which cover one whole side of our main street store, and hold 3500 pairs of shoes. They are full now and more shoes coming in every day.

It will be our pleasure to show you at any time, and our satisfaction to know that every pair of shoes we sell is a real value to the purchaser, and priced about 40 per cent under the present market.
