## YA E OF WAR BO

W: ington, Nov. 22.-Every re. of people from Ta Taco at from Providence or P or from ome other point on '. map I the most prosperous natio earil, write letters to the treasur partmant at Washington and a. vice and safe investments for money that are accumulating in a

That department does not w put i' elf in the position of un pushi g its own wares, but it lot of confidence in the govern securities that are kicking about . really feels that an opportunity profit on an investment in the curities is about as good a this one should want. If properly pu treasury officials will reveal a at on which makes it look as the an investor might go far and we than by pu chasing gover-

In all there are ten varieties of is nds on the moket. The gover 1 .. none of them for sale. They ready sold. They are now ownthe people. The government me profit by their rise o: fall. It ha to pay interest on them at par an got to retire them at maturity I all the same to the government if they sell at 90 or 120.

The first Liberty bonds issue drew the lowest rate of interest. The were three and a half bonds. Strange to say, of all the issues this is the o that is today bringing the highes price. These threes and a half are new selling above par. The reason for this is that they are exempt from in come tax. Rich folk whose surplus income goes largely into the coffer of Uncle Sam, buy these bonds an are allowed to keep the whole 3 1per cent. They are a good buy for the rich folk, but they would be the wor buy in the lot for a poor man who i not paying a high rate of income tar

It is interesting that he fourth Lit erty loan issue, which pays 4 1-4 pe cent. interest, sells way below par It is the cheapest of the government securities on the market. It sell around 94. It is not exempt from in come tax, and so is not as good for the rich man. It is fine, however, fo the poor man. It is worth more than 94. The reason it is cheap is largely due to the fact that there is so much of it. It was the big issue. There is \$6,000,000,000 worth of it. There is always a certain per cent who are forced to sell for one reason or another. Of a big issue there are more holders who put their bonds on the market. The old law of supply and demand works and the price is run down. The fourth Liberty loan 4 1-4 at the present price pays 4.77 pe cent on the investment.

The bankers favorite of the Liberty bonds is the third 4 1-4. These bonds mature in ten years. They are selling a little below par. The interest is good and early maturity insures a profit on the buy. At the present market price they figure to yield some interest premium on these long 4.87 on the money put in them.

Then there are the second four: and a quar er. They are to buy of them all that just now yields the highest return on the investment. They'sell around 94. The government has the privilege of retiring them in 1927 and will probably do so. This means that there will probably be a profit of 6 cents on each dollar. This added to the interest that will be collected in the meantime means that these government bonds are today a 5.18 per cent investment, which is mighty good for the bonds of the government which is the most financially sound of any in the world.

These figures are based on the known fact of the rate paid on these bonds and the known figures at which they will be retired. There is nothing speculative in government bonds, bought at these figures. One knows exactly what his returns will be.

But there is a speculative element in the purchase of government bonds. Before the war, for instance, this government was able to sell its bonds at par when they bore interest at the rate of 3 per cent. When a nation is at war, no matter how strong it may be, its securities will not sell as readily as in times of peace. It must-offer higher rates of interest. The United States offered those rates of interest. It sold most of its bonds around 4 and a half. It will continue to pay that four and a 'half until their maturity which will be ten. 20 and 30 years.

## DELCO-LIGHT

## "Electricity for every Farm"

The Delco-Light engine is the valve-in-the-head type-used in the best and most powerful airplane engines and in hundreds of thousands of automo-

It is air-cooled—runs on kerosene in any climate -has only one place to oil and has a simple mixing valve in place of carburetor.

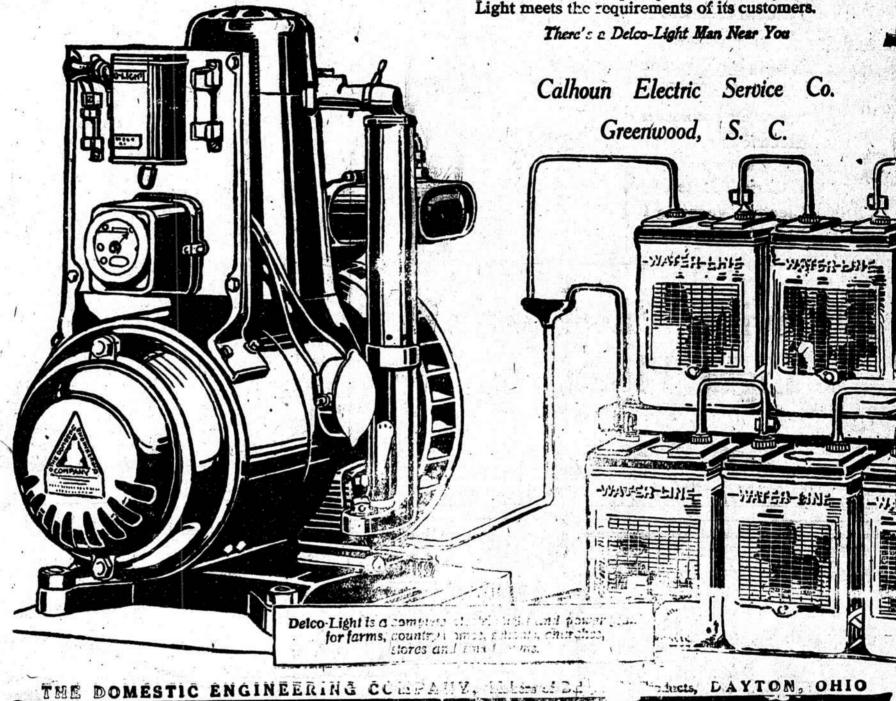

The storage battery is exclusively designed and built for Delco-Light with thick plates, wood and rubber separators and many improvements that insure long life.

Delco-Light long ago passed the experimental stage and has gone through the refining influence of three and one-half years of production and of usage by 75,000 customers.

You will find plants in the homes of your community. Just ask your neighbor about his Delco-Light plant.

Delco-Light makes happy homes; it saves time and labor, taking away lots of hard, unpleasant tasks. It "Pays for Itself" by the work it does and the time it saves.

Of the more than 75,000 Satisfied Users of Delco-Light, the first are among the most enthusiasticproof that the simplicity and durability of Delco-

loans. It can hardly fail to be true that the prices of these bonds will ise in the open market. One of these Liberty loan bonds can sell at 120 and yet yield a 3 1-2 per cent return nvestment. Those wise in finances be-

have to pay will be as high as 3 1-2

lieve that 120 will be about the normal price of th best of these bonds two or three years from now. If one buys at 95 today and sells at 120 thre years from now he will have cleared \$25 on each \$100 bond. In the meantime he will have secured interest on his investment.

FARMERS OUGHT TO SAVE SOME MONEY THIS FALL The Progressive Farmer.

In connection with what we are saying elsewhere in this issue about more in two or three years. farm finance, there is one point we wish especially to emphasize, namely, the need for saving some money this fall. Cotton, tobacco and peanuts, our chief crops, are bringing good prices ,and we will be poor business men indeed if we do not take advantage of this opportunity to put by Dearborn Independent. something against the rainy day that nearly always comes.

If it is granted that, after we have automobile, the piano and the talk-Slavic countries.

per cent., there will still be a hand- twenty or forty acres.
