## SENATE INQUIRY ORDERED

### AS TO RESERVE BANKS

The extent to which the reserve banks of this country have withdrawn their credits on grain is to be investigated by a Senate Committee. The Committee on banking and currency will make the inquiry. Chairman Gronna of the Agricultural Committee, who proposed the inquiry said the curtailing of credit by the

## SAYS HOT WATER WASHES POISONS FROM THE LIVER

Everyone should drink hot water with phosphate in it, before breakfast.

To feel as fine as the proverbial fiddle, we must keep the liver washed clean, almost every morning, to prevent its sponge-like pores from clogging with indigestible material, sour bile and poisonous toxins, says a noted physician.

If you get headaches, it's your liver. If you catch cold easily, it's your liver. If you wake up with a bad taste, furred tongue, nasty breath or stomach becomes rancid, it's your liver. Sallow skin, muddy complexion, watery eyes all denote liver uncleanness. Your liver is the most important, also the most abused and neglected organ of the body. Few know its function or how to release the dammed-up body waste, bile and toxins. Most folks resort to violent calomel, which is a dangerous, salivating chemical which can only be used occasionally because it accumulates in the tissues, also attacks the bones.

Every man and woman, sick or well, should drink each morning before breakfast a glass of hot water with a teaspoonful of limestone phosphate in it, to wash from the liver and bowels the previous day's indigestible material, the poisons, sour bile and toxins; thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

Limestone phosphate does not restrict the diet like calomel, because it can not salivate, for it is harmless and you can eat anything afterwards. It is inexpensive and almost tasteless, and any pharmacist will sell you a quarter pound, which is sufficient for a demonstration of how hot water and limestone phosphate cleans, stimulates and freshens the liver, keeping you feeling fit day in and day out.

banks had resulted in an artificial depression in the price of grain. He charged that a "situation was being forced to move grain from the hands of the farmer and country elevators into the larger cities."

It was explained in support of the charge that the increased rates would result in a readjustment by the banks of the amounts of credits to their customers, and that such a readjustment necessarily would affect customers who had borrowed on necessities held in storage. The increased total of interest on their loans also was expected to curtail the amount of loans customers would be able to carry.

## LOWNDESVILLE

Lowndesville, Feb. 11.—Married at Iva Feb. 5th, by Rev. McRee, Mr. Lester Waters and Miss Lollie Scoggins, both of Lowndesville. Mrs. Waters has been teaching for several years and at the time of her marriage was teacher of the Diamond Spring school. Mr. Waters is an exemplary young man of splendid moral character and good business qualifications. They have gone on a wedding trip to Atlanta and several other points, after their return they will make their home at Harper's Ferry.

There are three garages in town, two in New Town, Messrs. Hill and Ellenburg and Messrs. Rosenwycke and Williams in Old Town, Messrs. Bell and Harper. The latter have put in a filling station and installed an electric storage plant.

Sergt. McCoy, Camp Bragg, spent several days at the Smith house recently, soliciting recruits for different branches of the army.

There is a great deal of flu in town all the cases mild and doing well. Mr. C. L. Bowen suffered a relapse but is convalescent and hopes to be out in a few days.

Mrs. Ada McAdams and Miss Claudia Bell of Iva, were recent guests of Rev. and Mrs. H. C. Fennell. Mr. Marion Nickels, Greenwood,

was a business visitor in town last week.

Mr. J. A. Harper was a business visitor for several days to Atlanta last week.

Mrs. W. M. Speer has returned from Atlanta, where she spent several weeks with her sister, Mrs. W. L. Tennent.

Mrs. J. F. Harper and little son, Caldwell, Calhoun Falls, are guests of her brothers, Messrs. D. L. and A. V. Barnes.

Mr. Ray Clinkscales, Anderson, has been in town several days. He is slowly recuperating from his injuries, but still unable to resume his work on the railroad.

Rev. H. C. Fennell was quite ill for several days last week with severe attack of hiccoughs, but is able to be on the street again.

Misses Treva and Hattie Speer are spending this week with relatives at Antreville and Calhoun Falls.

Mrs. Ida Garner visited her aunt, Miss Lois Watson of Anderson, several days last week.

Mr. and Mrs. J. A. Harper and their little folks have moved into the cottage opposite Allen's Corner.

Mr. Albert Power and Dr. Eugene Power were in town for a few hours last Saturday. Dr. Power is a medical missionary to Korea, but with his wife and baby is at home on a year's rest from his work. But owing to the conditions induced by winter epidemics, he has been doing hospital work in Anderson for several weeks.

Mrs. Kittie Latimer Kay left a few days ago for Byron, Ga., where she will spend several months with her son, Dr. Jas. Ben Kay, who has located there and is doing an extensive practice.

Mrs. E. W. Haper, Sr., is not doing so well, she is suffering considerably from a rheumatic trouble for the past few days. Mrs. Harper is greatly loved by every one and her indisposition is very much regretted by the entire town.

Mrs. L. P. Pettigrew, Barnes, was the guest of her sister, Miss Annie Hutchison last Tuesday.

Mr. T. D. Cooley and Mr. Henry Carlisle came near losing their dwellings by fire a few days since.

The fire in Mr. Cooley's residence was discovered and extinguished before it did any damage. Mrs. Carlisle lost most of her wearing apparel which was stored in the closet where the fire originated. In this case also the flames were arrested before any considerable damage was done to the house. Both of these fires are supposed to have been caused by loose matches and rats.

## WHAT TO DO WHEN ONION SICKNESS OCCURS

Maybe it is because of its strong smell. Anyway there is some magnetic attraction which apparently draws disease of various kinds and conditions to the onion crop. Take, for instance, onion smut. It works overtime in trying to snuff out the young seedlings by forming brownish black, elongated blisters which finally split the leaves and expose the fine powdery black mass of spores within the interior of the blister. A specific fungus causes this onion ailment, the spores wintering in the ground and again attacking the young seedlings in the spring.

The onion is susceptible to the fungus only while in the young seedling stage. After the plants reach a height of 3 to 4 inches they become immune to further infection. Smut spreads slowly in the soil, but an infested area in a field will gradually become larger and more severely diseased each year onions are grown on such an area. The spores are spread on farm implements, the feet of men and animals, by surface water, and dust carried by the air. Purchasers of onion sets should use caution that they do not contaminate the soil by planting smutted sets.

Control is accomplished in home gardens by changing the location of the onion bed to clean soil, or by planting sets instead of seed. In large commercial onion districts of northern States formaldehyde solution is applied in the furrow with the seed, as this disinfectant holds the fungus in check. One fluid ounce of 37 to 40 per cent formaldehyde solution is used with each gallon of water, his diluted solution being applied at the rate of 200 gallons per acre or 1 gallon to about 185 feet of row.

## Shake-a-Leg

In these money-making times thrifty folks are hopping ahead, despite h. c. of l. They are swiftly saving some funds for the future, and if you don't want to get left behind, better get a move-on.

If you haven't a bank account make a bee-line for our bank and get here before the doors close today. No one ever made much progress without a bank account. Lose no time in opening one. Get in the race for success.

If you have a bank account but have let it lag, speed up your saving gear and make us write some figures to your credit. Put a little jazz in your efforts and run up your account till you're proud of it.

FULL SPEED AHEAD.
