WILL MAKE WINE OF STRAWBERRIES Vermit to Manufacture is Issued Alcoholic Content of Product Must Not Be Increased

Says Government.

Washington, March 24-A permi to manufacture wine out of strawserries for non-beverage purposes was issued tonight to the Strawberry Growers Association of Louisiana by the bureau of internal revenue. on Sunday. Provision is made in the permit that sugar shall be added to increase the alcoholic content of the product.

While no explanation of the issuance of the permit was made by the jureau officials said that the straw-Serry growers had appealed to the prohibition authorities for permission to wet up a winery in order to care for their surplus crop which was estimated to be worth about 15,000-100. Under the Volstead act, it was explained, it is legal to establish wineries for the manufacture of nonbeverage products for sacramental or medicinal purposes. The association, it was said, plans to erect a large wine manufacturing plant which will take care of the surplus strawberries of the growers.

Whether the principle on which the permit was issued to the srtawberry men would apply in other uses officials could not say but it was suggested that should surplus of berries occur in other states, the moducers would be entitled to an apportunity to show whether there was danger of heavy loss unless the stablishment of wineries was resortat to.

Such procedure, officials intimatst would not be confined to strawberry producers, but would include porducers of other juicy berries-Mackberries, blueberries and the dif-Scrent shades of raspberries-and might in the case of necessity cover regetables such as beets and pos**sbly** dandelions and elderberries.

Senator Gaudin de Villaine calculated that at 3 per cent. this sum would exceed 37,000,000,000 francs or sufficient not only to pay what France owes America, but also what she owes to England.
