UNCLE SAM SHOULD HELP IN MARKETING FARMERS' PRODUCTS

Secretary Wallace Addresses Farmers Grain Marketing Committee at Chicago.

Chicago, April 7.—The department of agriculture should lend the same aid to farmers in marketing their crops as it does in their production, Secretary Wallace declared today in an address here before the Farms Grain Marketing committee of seventeen.

Study of improved marketing methods as well as of conditions the farmers should understand to produce intelligently and "adjust his production to the needs of consumption," the secretary said, "are proper functions of the department."

"A plentiful supply of food at prices which are just to both producer and consumer is vital to our national welfare," continued, "and it is a proper function of the government to do what it can to insure it."

Information of world production and consumption is "especially useful and necessary," the secretary declared, to aid farmers in deciding "in what quantities given commodities should be produced and in order that there may be an adequate supply." It is coming to be recognized, he said that if prices are to be satisfactory "there must be a right adjustment of production to marketing conditions."

The farmers' right to organize into association, co-operative or otherwise for the purpose of marketing their crops, Mr. Wallace said, cannot be questioned "so long as they observe the requirements of our laws."

While not discussing the committee's marketing plan in detail, the agriculture secretary said it appeared to have profited by practical experience of the past and to have avoided the weaknesses which had broken down many previous organizations. The committee he asserted was "neither attempting to create a monopoly or to fix prices."

Calling attention to the current low prices for farm products while "practically everything the farmers buy are from 50 to 100 per cent above pre-war normals," Secretary Wallace said it is not strange that thousands of them should be willing and ready to adopt a drastic measures to correct a condition which is so grossly unjust and which is causing widespread hardship and suffering.

"This nation," Secretary Wallace, asserted, cannot hope to maintain its agriculture on a sound economic basis unless our farmers give attention to the business end of farming, this is imperative if production is to be maintained and our people are to be fed at reasonable costs."

Sunday's Best Recreation

Lies not in the few hours with the newspaper, your favorite magazine, or a work of fiction; nor in a stroll through the fields nor in an auto ride to the country.

These things are excellent in their place and season, but if one is seeking the finest recreation which Sunday has to give he will find it rather in doing those things for which the Sabbath was created, namely, the worship and service of God.

Communion with God on the Lord's Day brings new strength to mind and body as well as soul, for God's Word tells us, "My God shall supply all your needs."

Busy men, driven at a rapid pace through

the week, and tired housewives, need to relax on the Lord's Day, and, giving their bodies a chance to rest, renew their spiritual strength by communing with God face to face.

"Where two or three are gathered together in my name, there am I in the midst of them," He has assured us. And where God is new strength and grace and peace and joy are always available.

Will you not be one of those gathered together in His name at THE BAPTIST CHURCH next Sunday? God is anxious to help you solve all your problems.

Won't you give Him a chance?
