

**LONDON ACCORDS
JAPANESE CROWN
PRINCE OVATION**

Full Honors of State Were Extended; Is in England for a Three Weeks Visit

London, May 10.—The capital of the British empire today accorded Prince Hirohito, heir to the Japanese throne, a tumultuous welcome upon his arrival here for a three weeks visit to England. Full honors of state were extended to him, the occasion being the first such honors to a visiting foreign dignitary since 1914. A bright spring day provided ideal weather for the function.

The Japanese "prince ambassador" accompanied by the Prince of Wales, arrived at Victoria station on a special train from Portsmouth. He was greeted with cordial handshakes by King George, the Duke of Connaught and the Duke of York. A brilliant suite of British officialdom in attendance stood at salute while the bands played the Japanese anthem. Then at the side of the king in a state carriage the crown prince was driven off through streets cordoned by troops and lined with cheering multitudes to Buckingham Palace.

Two platforms of the great Victoria station had been cut off from the public for the accommodation of the royal train and decorators have been at work for two days making them ready for the prince's arrival.

King George wearing the uniform of a field marshal and the sash of the Japanese Order of the Rising Sun, with the Duke of Connaught and the Duke of York in naval uniform, stood on the red carpeted quadrangle flanked by a notable assemblage of cabinet members, diplomatic representatives and military and naval officials. Viscount Chinda, former Japanese ambassador to Great Britain, who accompanied the crown prince on his voyage to England, served as interpreter for the

**HOOTCH CANDY CAME
FROM CHARLESTON**

Charlotte, N. C. May 9.—Samples of the "hootch" candy which is declared to have seriously intoxicated six school children here Friday were sent today by Dr. W. A. McPhaul, city health officer, to the state laboratory at Raleigh for analysis.

Further action by the local health authorities will depend upon the result of the analysis, Dr. McPhaul said. If the tests show that the candy contains injurious ingredients the federal pure food authorities will be advised, and if traces of alcohol are found federal prohibition agents will be notified.

The health officer reported that his investigation disclosed that the candy was bought in Charleston, S. C., by a Charlotte man and that his children who became intoxicated to the point of unconsciousness after eating it. This particular brand of candy is not on sale in stores here, so far as the health officer was able to find today, he said.

Dr. McPhaul pointed to the printed labels on the packages as suggestive of the days when liquor was plentiful. They contain the phrases "Should auld acquaintance be forgot?" and "The candy with the flavor," the latter "the" being underscored for emphasis. The labels bear the name of a Chicago manufacturer.

royal Japanese visitor, who appeared somewhat nervous during the lengthy exchange of handshakes and greetings. After the crown prince and his royal hosts had inspected the guard of honor, made up of a battalion of the scots guards smartly attired in long gray coats and busbies, the royal guest of honor was conducted to the state carriage, in which also the king, the prince of Wales and Viscount Chinda were seated.

GREENWOOD'S NEWSPAPERS

(Index-Journal)

When was the first newspaper published in Greenwood and how many papers have there been since?

The first newspaper which Greenwood can claim as her very own was "The New Era" published forty-six years ago, 1875, by the late Col. W. K. Blake. As stated by a chronicler of the journalistic history of the town this paper "was looked on with indifference at home and was rather the sport of its grave and dignified contemporaries in the court house town of Abbeville." The Press and Banner, this chronicler says, took a very large view of the mission of the New Era and called it "the G-r-e-a-t American" while the Abbeville Medium regarded "it in rather an aetherial, light and thought it was the Greenwood Gasometer designed as a safety valve for the town's effervescing patriotism and enterprise, while," as the aforesaid chronicler goes on to aver "it was in reality the dawn of a New Era which was to date her future rise and progress."

The above more or less facetious references to the town's first newspaper appear in a Greenwood issue of the Press and Banner of date, Wednesday July 20, 1887 on the occasion of the biggest celebration in the town's history, the great day of the Tournament.

Congressman Radcliffe, of New Jersey, was a blacksmith before he was elected to Congress.

Sun spots are now thought to be a sign of commencing debility of the sun.

**FRENCH ARMY WILL
NOT BE MOVED
BEFORE JULY**

Paris, May 10.—The army contingents of 1919, called to the colors in connection with the preparations for the possible occupation of the Ruhr valley will in no case be sent before July, it was said today in official circles. Even if the Germans accept the allied ultimatum the troop mobilized for the occupation will be held in readiness for action in case Bavaria does not disarm before June 30, the time limit fixed by the allied for completion of the disarming process, it was stated.

The contingent of 1921 will by that time have been sufficiently trained to take the place of the older class it is considered, and the 1919, class will they probably be demobilized.

SPRAY GRAPES FOR FRUIT

Clemson College, May 12.—If you would have fine grapes instead of diseased poorly developed ones, spray with Bordeaux, says the horticulturist of Clemson College.

Where diseases have caused serious trouble the preceding season make the first application before the buds open, the second application as soon as the fruit is set, and an additional application every two weeks until fruit begins to ripen.

Where diseases have not caused serious loss in the past, three applications will be sufficient. In this case, the first application should be made after the fruit is set, the second three week later, and the third and last just before the grapes begin to ripen.

Use Bordeaux mixture as follows:

4 pounds of cooper sulphate (bluestone), 4 pounds of quick lime, 50 gallons of water. Make according to directions given below.

Place the lump of lime in a vessel and slake slowly by using a small quantities of warm water until the slaking process has been completed and all of the lumps thoroughly dissolved. Dilute to make 25 gallons.

Dissolve the bluestone by placing in a cloth sack and suspending in a few gallons of water (one gallon of water per pound of bluestone) and dilute to make 25 gallons. Use only wooden or earthen vessels to mix or dissolve the bluestone in.

Make the Bordeaux mixture by pouring together through a sack at the same time equal parts of the

lime and bluestone solutions. For small quantities use: bluestone, 4 ounces; quick lime, 4 ounces; water, 3 gallons.

**THE "OLD RELIABLE"
THEDFORD'S BLACK-DRAUGHT**

White Haired Alabama Lady Says She Has Seen Medicines Come and Go But The "Old Reliable" Thedford's Black-Draught Came and Stayed.

DuPont, Ala.—In recommending Thedford's Black-Draught to her friends and neighbors here, Mrs. T. F. Parks, a well-known Jackson County lady, said: "I am getting up in years; my head is pretty white. I have seen medicines and remedies come and go but the old reliable came and stayed. I am talking of Black-Draught, a liver medicine we have used for years—one that can be depended upon and one that will do the work."

"Black-Draught will relieve indigestion and constipation if taken right, and I know for I tried it. It is the best thing I have ever found for the full, uncomfortable

feeling after meals. Sour stomach and sick headache can be relieved by taking Black-Draught. It aids digestion, also assists the liver in throwing off impurities. I am glad to recommend Black-Draught, and do, to my friends and neighbors."

Thedford's Black-Draught is a standard household remedy with a record of over seventy years of successful use. Every one occasionally needs something to help cleanse the system of impurities. Try Black-Draught. Insist upon Thedford's, the genuine.

"Education is the Mainspring of Democracy"

Know and Help our Schools

This week petitions are being circulated for an election on the question of issuing bonds not to exceed \$100,000 to build a *New High School*....

It is your duty and privilege as a citizen and freeholder of Abbeville to sign this petition and cast your *vote for the bonds*....

You have the following representative citizens on your board of trustees. Are you not willing and eager to follow their wise leadership in the upbuilding of your schools?

- W. M. BARNWELL, Chairman
- W. A. CALVERT
- J. D. KERR
- C. H. McMURRAY

- J. C. THOMSON, Sec'y
- ALBERT HENRY
- R. S. LINK
- H. R. McALLISSER

E. R. THOMSON

A city is judged by the schools it has---Let's restore Abbeville to her rightful place as the "Athens of South Carolina".
