tion which such an officer, and such an officer only, could give to the Legislature, of the number and position of the poor children in the respective Districts of the State, of the difficables to be overcome in each case, and of the operation of the system under varying circumstances, could enable it in a few years, to rectify most of the evils which are acknowledged to exist, but which many of the Commissioners attribute rather to the improper execution of the acts, than to the system itself. We have recommended a high salary, and a tenure of ofice of some years duration, because we think them necessary for the procuring an officer of the character, and the requirements, requisite to fill such a station, the details of his official daty can be best settled by the Legislature. They Buchanan, of Pa. Roane, of Va., Brown had better, at first, be very general, so as to give him much scope and latitude.

We would recommend, in the third place, that the money allotted to each District, be expended under the joint coursel of the Superintendant, and he Com-missioners of Free Schools, as they may Benton, of Missouri, Norvell, of Michigan, deem most for the interest of the poor children of their respective Districts; Opposition .- Messrs, Ruggles, of Maine, with this restriction, however, that where Prentiss and Phelps, of Vermont, Davis a poor chi'd is placed at a neighborhood or private school, it shall be put upon a footing, as far as money can do it, with the schollars that may be receiving an En- Spence, of Mt., Preston, of S. C., Henderglish education in that school. Let there be no temptation with the master, to negleet the child, or any reason with the child to feel itself degraded by its dependance York, Pennsylvania, Delaware, Virginia upon the State.

We should reccommend, in the fourth place, but this we do with some hesitation, suitable for such an establishment. Those | Sub Treasury, who went there, ought to be expected to support themselves during their term of preparation. Many, doubtless, would be and respectable profession.

in the provissions of its Act, that the Lible | 998,07145. should be a Text Book in all its Se ools, and that r ligion should be more or less incorporated into a system of instruction. Knowledge, unless it be accompanied by virtue, and the highest virtue is the fruit of religion, may only quicken the vice it was St. Luke's, in place of Col. W. E. Mar intended to eradicate and sharpen for the tin, elected Clerk of the Senate, Mr. Thos crimes it was designed to prevent. Be- S. Gillson was elected without opposition. sides, it would be a lopting as a reading book, the best model of idio natic English and only beginning in the Schools, what is af erwards carried on in your higher places of education.

We would recommend, in the last place, that the appropriation for Free Schools be increased to lifteen thousand dollars-a sum only sufficient to cover the additional expense of a Superintendant. and a Cencher's Seminary, and to meet the increase of our population.

The opposition was made principally to the Brigade encampinants. A motion to strike out the section authorizing the appointment of Suters was lost by four votes only. 'The Senate will strike out that section, as they have already passed a bill repeating the

The Committee of Ways and Means recommended an increase of ten cents in the taxes on Negroes, in order to meet a surplus in the Treasury, which they state will exist in the coatse of the next year. There was some sectional feeling en isted in the debate in the House on that proposition. The members from the upper country, a first supposed that this tax would fall heaviest upon that section,but upon a close examination, it was found that this would not be the case as there were more slaves in the lower, than in the upper equatry. The House however, refused to raise the taxes, and they remain as before; leaving the Bank to provide for the deficiency in the Treasury.
