

THE SMALL FRY POLITICIANS. A Song .- Air-"Hunters of Kentucky." Ye politicians large and small, Of giant size-and little; Who loudly and incessant batel To show your patriot mettle! I've made a song to sing to ye,-What e'er its merit be sirs, But if a lash to some it be! I'm amply satisfied sirs;-Oh! ve noisy-uprorious politicians.

Your rostrum is a bar room chair, Your stimulant-hard eider! And once a crowd you gather there, Your voices grow still wider! Ye storm and sweat and rant and tear, Until each soul gets furious; And should ye fall to by the ear, Ye think ye're learn'dly curious! Oh! ye noisy-uprorious politicians.

Of ev'ry great one of the land, Ye swear ye are his equal, And scarce would shake with him the hand, But mark ve all the sequel! If one of them comes but in sight, Ye'll stand an hour uncapp'd sirs, As if he were some god too bright, To simply greet-"good day"-sirs! Oh! ye noisy-uprorious politicians.

Ye'd better try to make your break, The way that suits your calling! And cease to strain-an honest head, By idle caterwauling; Ye have your vote !- go put it in, Like folks of good intention; If Tippy falls-'tis not your sins,-He's ranquish'd in contention! !

Oh! ye noisy-uprorious politicians

Miscellaneous.

From the Carolina Planter. LUCERNE. SUMTERVILLE, Aug. 12, 1840.

Dear Friend .- Business and absence have prevented me from answering your letter concerning Lucerne. 1 am, however, in time, if you only desire to commence its cultivation this season.

The time for planting is any part of the mouth of September. I think the best mode of preparing the ground and in abundance it may be dried which is our planting, is to measure a piece of high, light land, rather sandy, but of as much fertility as may be found on our soils: ble manure to the acre—plough it in as fast as it is spread, to avoid evaporation, and plough as deep as possible—eight or ten an eighth of an inch thick in the sun. the land very shallow about 18 inches a- to pack away in bags, which should hang part, and sow the seed in the drill about in a dry room." We consider the tomato as thick as you would sow wheat. When and rhubarb the most healthy products it comes up you can keep it clean of grass by hoeing. After sowing it cover it very lightly, as you do cotton seed, and press the dirt on the seed with a roller or some

If the object is to feed it to the hogs, &c .- Albany Argus. they should be let on it sparingly the first summer. It may be cut and fed to hogs every day if they are kept out of the patch where it grows, and will not be injured by this mode of using it, whilst the hogs are receiving as much benefit as if they were allowed to run on the growing crop. This is called soiling, and for this it is invalable. I have seen a small spot in a garden thus cut five or six times during the sum-

Any one who desires to keep his hogs red and cultivated, for soiling twenty-five or thirty hogs, large and small, with little or no food-and this would be infinitely better for any one than to have his hogs starving on our poor lands in the summer -and if by chance one of his hogs should get in a catable condition, to have him killed by negroes, who may happen to find

You ask if any particular preed of hogs will do better on this grass than another. that will do better on it than another.

A writer in the Farmer's Cabinet recommends that the Lucerne should be sowed broad cast-but I should be afraid of the weeds and grass overrupping it the first year and thus destroying it. After it has once gained the ascendancey over the weeds and grass of other kinds, it will keep

it for a generation. If you plant it in drills you can manure it as often as you may desire, with such manure as you may have. Grass sowed broad cast may be manured by top-dressing with ashes, plaster of Paris, &c., but these are not always to be obtained without greater expense and trouble than is attendant on procuring the manure ordinarily made in this District. I would refer you to vol. 4th of Farmer's Cabinet. published in Philadelphia, and some late numbers of the Columbia Planter, for much valuable information on this subject.

The value of an acre of land successfully cultivated in Lucerne, may be estimated in the following manner.

Three thousand weight of hay may be, and often has been obtained as a moderate harvest at each cutting. Four cuttings may be had each summer. More than four thousand weight has been obtained at a cutting. Good hay is worth one dollar a single wound upon his body! per hundred pounds. The result is, that the difference the entire harvest of hay from a single acre and a sham hero!

of land in Lucerne Grass would be worth one hundred and twenty dollars per annem. Let it be remembered too, that this grass will require to be planted but once in your lifetime. A friend of mine who has been cultivating this grass, said to me that if he had five acres of it growing on his planation, he would not be deprived of it for one hundred dollars per acre.

As you have been interested by my first article on Lucerne, published in the Planter, to address me on this subject, and supposing that the information sought, by your letter, may be in like manner inqured for by others, I have thought it best to answer you through the medium of a paper, which is doing more good to the couniry than half of our political prints to-PINEWOOD.

From the Farmer's Cabinet.

SLACKING LIME AND CHURNING BUT-TER .- All bodies, in changing from a fluid to a solid state, give out hear; and when solid bodies become liquid heat is absorbed.

The heat which is given out during the the slacking of lime, escapes from the water, in consequence of its changing from a liquid to a solid form, by its union with the lime. The same effect is produced in making butter: when the cream changes from a fluid to a solid, a considerable degree of of heat is produced. Hence the importance of turning the churn slowly when the butter is about forming, so that the heated air which is expended in the churn may gradually escape by the vent, (which should be kept open at this period of the operation) and not operate so often and

injure the butter in very warm weather. Some butter-makers put a portion of cold water in the churn when the butter is forming, in order to lower the temperature, and to counteract the effect of the heat, set at liberty at this juncture; but experienced dairymen say, that water should never be brought into contact with butter, either in the churn, or during the process of working out the buttermilk. It destroys its fine flavour, and reduces its standard of perfection.

The Tomato -We are receiving new evidences of the utility of this grateful gar den vegetable in preventing and curing indigestion, and disease of the liver and lungs, A writer in the Farmer's Register, says it has been tried by several persons, to his knowledge, with decided success. They were afflicted, says he, with chronic cough, the primary cause of which, in one case, was supposed to be diseased liver-in another, diseased lungs. It mitigates, and sometimes effectually checks, a fit of coughing. It was used in a dried state, with a little sugar mixed with it render it more agreeable to the taste. The writer expresses a conviction that if freely used in July, August and September, it would prove a complete antidote to bilious fevor. The tomato, to have it in early use, should be started with us in hor beds; though if raised practice, and may be at command through the year. The mode of drying is as follows-"Full ripe tomatoes are scalded in broad-cast, with about fifteen large four hor water, to facilitate the operation of ta-horse wagon loads of well rotted yard or sta-king off the skin; when skinned they are inches will be quite shallow enough. Drill They will dry enough in three or four days of the garden.

IMPORTED ENGLISH SEEDS .- In our brief notice a few days since to the valua other contrivance, in order to make it come ble breeds of Euglish stock, imported by up. In May or June, if the grass does Mr. W. H. Southam, of Pench Lake not take possession of it, you may cut it Farm, Jefferson County, and Erastus the first time for hay, and you will get Corning, Esq. of this city, we omitted to another and perhaps two or three other state that those gentlemen had imported, cuttings from it during the summer, if the at the same time, 275 different kinds of manure and the land suit it. It will die seeds, of almost every description for field on land which is incumbent on a wet subsoil, where the water rises within two feet for seed, seven of oats, nine of beans of the top of the ground. three of barley, nine sorts of potatoes, &c three of barley, nine sorts of potatoes, &c.

The culture of Ruta Baga is exceedingly simple. The great thousand and eleven hundred bushels crops that have been raised in this vicinity, were raised on a deep loamy soil, a little inclining to clay, which have been highly manured and had been cultivated and kept clear from weeds the year before. The whole secret then lies in this. Choose a good loamy soil that is completely subdued, and pulverized by previous cultivation. Manure it high-Plough, harrow, and if you please, up all the summer may do so, and have roll it. Plant good seed in rows or drillabundant food from one acre, well manu- from eighteen inches to two feet apart, and about a foot apart in the rows. Weed again when the plant has become large enough to transplant, and thin out, leaving but one in a hill. Fill up any vacan cies which may occur by setting out some that you have pulled up. If your ground is weedy give it another hoeing; at any rate stiring the ground is beneficial. Let the crop stand as late in the fall as you can, and not have it freeze into the ground, We have always had the best crop in this I am not a ware of any one breed of hogs country when we sow early; say the middle of May, if not before, - American Farmer's Companian.

Good Breeding .- A farmer who came up to town to visit a brother, having given some offence to his sister in-law, who piqued herself upon her gentility, by something that did not accord with her ideas of good manners, she pertly told him that he was very ill bred, and did not even know what good-breeding was. "Why, look ma'am," replied he, "as for that, I consider myself quite as well bred as you, for all your fine airs; -my mother had seventeen of us in sixteen years, and that I take to be good breeding.

Miss Catherine Wilson-a western lady -gave the following toast on the 4th ult: "The substitution of spinning wheels and looms for Pianos and banks-a sufficient protection against foreign importa-

Vegetable Life Medicines.

THESE Medicines are indebted for their name to their manifest and sensible action in purifying the springs and channels of life, and enduing them with renewed tone and vigor. In many hundred certified cases which have been made public, and in almost every species of dis-ease to which the human frame is liable, the happy effects of MOFFATS LIFE PILLS AND PHENIX BITTERS have been gratefully and publicly acknowledged by the persons benefitted, and who were previously unacquainted with the beautifully philosophical principles upon which they are compounded, and ipon which they consequently act.

The LIFE MEDICINES recommend themselves in diseases of every from & description. Their first operation is to loosen the various impurities and crudities constantly settling around them, and to remove the hardened fieres which collect in the convolutions of the small intestines .-Other medicines only partially cleans these and leave such collected masse behind as to produce habitual costiveneswith all its train of evils, or sudden diarr hea, with its imminent dangers. This fact is well known to all regular anato mists, who examine the human bowel after death; and hence the prejudice of these well informed men against quach medicines-or medicines prepared and heralded to the public by ignorant person-The second effect of the Life Medicines i to cleanse the kidneys and the bladder and by this means, the liver and the lungthe healthful action of which entirely d pends upon the regularity of the urina-The blood, which takes its re organs rolor from the agency of the liver and the lungs before it passes into the heart, bein thus purified by the o, and nourished food coming from a clean stomach, con ses freely through the veines, renews ever part of the system, and triumphan mounts the banner of health in the bloom ng check.

Moffat's Vegetable Life Medicines hav been thoroughly tested, and pronounced sovereign remedy for Dyspepsia, Flate lency, Palpitation of the Heart, Loss of Appetite, Heartborn and Headach. Res lessness, Ill-temper, Anxiety, Languer and Melancholy, Costiveness, Diarrhoa, Choi era, Fevers of all kinds, Rheumatism Gout, Dropsies of all kinds, Gravel, Worms Asthma and Consumption, Scurvy, Ulcer-Invererate Sores. Scobulic Eruptions and Bad Complexions, Eroptive complaint-Sallow, Cloudy, and other disagreeable Complexions, Salt Rheum, Erysipelas. Common Colds and Influenza, and variouother complaints which afflict the humaframe. In FEVER and AGUE, particular ly, the Life Medicines have been most ently successful; so much so, that is the Fever and Ague districts, Physicianalmost universally prescribe them.

All that Mr. Moffat requires of his pair ents is to be particular in taking the Life Medicines strictly according to the directions. It is not by a newspaper notice, or by anything that he himself may say in their favor, that he hopes to gain credit .-It is alone by the results of a fair trial.

MOFFAT'S MEDICAL MANUAL designed as a domestic guide to health,-This little pamphlet, edited by W. B: Molfat, 375 Broadway, New York, has been published for the purpose of explaining more fully Mr. Moffat's theory of diseases, and will be found highly interesting to persons seeking health. It treats upon prevelent diseasos, and the causes thereof Price, 25 cents-for sale by Mr. Moffat's agents generally.

These Valuable Medicines are for sale C. A. DOWD. Edgefield C. II. March 28, 1840 if 9

Citizens of Charleston,

CONTRACTOR OF THE PARTY OF THE

AND THE NEIGHBORING STATES. TOU are respectfully informed that 70 MEETING STREET 76-is my Office for the exclusive sale of BRANDRETH'S VEGE-

TABLE UNIVERSAL PILLS. Price twenfive cents per box, with directions in English rench. Spanish Portuguese and German. The high and universal reputation of the Brantdeth Pills, renders it unnecessary to commert largely on their particular virtues. As an anti-bilious and purgative medicine, they are unequalled by any. Their purifying effect on the blood is universally allowed—all that have ever used have approved any researched.

In many cases where the dreadful ravages of the many cases where the dreamn ravages of the relevation had had bare ligament and bone, and where to all appearance, no human means could save life, have patients by the use of these Pills, been restored to good health; the devour-ing disease having been completely eradicated.

ever used have approved and recommended

In consequence of the pleasantness of their operation, they are universally used in every section of this wide extended country where they are made known, and are fast surperseding every other Preparation of professed similar import. Upwards of Fourteen Thousand cases have been certified as cured, solely from their use since the introduction of that into the U. States, thus establishing the fact beyond all doubt, that the Brandreth Pills cure the (appa rently) most opposite diseases, by the one els with them, until the disease gives way; therefore, whatever may be said of the THEORY, the UTILITY of the PRACTICE IS NOW BEYOND all

As Braudreth's Pills cure Scurvy, Costiveness, and its consequences, seasfaring men, and all travellers to foreign regions, should not be without, in order to resoit to them on every occasion of illness. No medicine chest is required where they are.

N. B.—Time or climate affects them not, provided they are kept dry. Southern gentlemen will find this medicine one that will insure ealth to the people on their estates.

Be careful and never purchase Pills of a Druggist, PROFESSING to be Brandreth's Pills. Under so circumstances is any one of this class made an Agent. My own established Agents have invariably an engraved Certificate signed B. Brandreth, M. D, in my own hand writing. This is revewed yearly-and when over twelve months old, it no longer guarantees the genuineness of the medicine, it would be well, therefore, for purchasers to carefully examine the Certificate. The scal is not wax, but embossed on the paper with a steel seal. If the genuine medicine is obtained, there is no doubt of its giving perfect satisfaction, and if all who want it are careful to go by the above directions, there is little doubt but they wi l obtain it.

Remember 70 Meeting street, is the only place in Charleston where the genuine medi-cine can be obtained, and at W. W. Sales, Hamburg and C. A. Down. Edgefield G.H. the only authorised Agents for Edgefield.
