PROSPECTUS

OF THE THIRD VOLUME OF The Mamburg Journal, Published Weekly, at Hamburg, S. C.

Terms-83 per annum-invariably in advance.

WO years has nearly elapsed since the Journal first made its appearance before the public, and asked only a small share of pa-tronage from its triends, until the time should arrive when confidence could be placed in its uccess. The editor has now the pleasure of announcing that this desired period has arrived; and he now earnestly solicits a liberal support from the reading community, and the bu siness portion of those, who may favor him with their support. The first number of the third volume will be issued on or before the first day of April next.

When the Journal was about to be issued wo years ago, promises were made by the pubishers to the public, that they would exert themselves industriously and employ the best efforts of their humble abilities to make their paper entertaining, useful and instructive .-These things have been fulfilled; our time and money spent to sustain our promises, and bring out a paper every way worthy of the growing prosperity of Hamburg And, now that these promises have been accomplished, and the lournal passed the gaol at which such enterprices, either falls or rises, may not a full share of support be expected by us from those who should give a helping hand?

Many believed that the Journal was established for certain private, party purposes, and we have contented ourselves to let them remain in this belief, knowing that TRUTH will work its way and frown down every thing that leans to error. But, now that we have surmounted every difficulty and spread our pennant to the breeze, we fearlessly proclaim, that the good of Hamburg alone in every and any case, has been our earnest design. Her interest demands a public paper, and we have supplied her want-Here shall the Press the People's rights maintain.

Unawed by influence unbribed by gain; Here Patriot Truth its glorious precepts draw Piedged to Religion, Liberty and Law."

Promises were likewise made by the publishers, that their columns should not be burthened with the partizan essays and speculations of the day. These promises have been adhered to, and although we have no great desire to launch out on the troubled sea of politics, we shall speak that which we may feel bound to do-condemn the wrong, and hold up light to the peo-ple, let our words offend what party it may. I is the duty of the press to watch over the liberties of our common country, and warn the people whenever danger is visible. We adhere to the Democracy of this country, yet if this party goes estray, we shall endeavor to bring it back by timely and virtuous reproof.

The duty of an editor is a distinct and lofty profession, exercising great influence over soiety. It is a power that has never been ingasured, and we shall endeavor to sustain and cherish the moral agencies which the functions of editorship holds among the world, and endeavor to persuade our co-temporaries to im-prove the character of the Press, to rescue it rom intidelity to itself, and from the indifference and contempt of the public; assert its claims, vindicate its dignity and exhort it to its duty, by a straight forward virtuous course These admonitions we have learned from wise and experienced heads, and we will profit by

The columns of the Journal are devoted to Foreign and Domestic News, the Markets, Lite rature, Science, etc. Our readers will be fur nished with correct information in relation to passing events in every quarter of the globethe state of the markets at home and abroad. and every description of business intelligence. besides a great variety of miscellaneous matter. The great increase of trade to Hamburg, her natural advantages for health and business, and her flourishing condition, renders a paper in dispensibly necessary here, as well to the citizens as the planters and others who trade to this place; all of whom should patronize a paper of correct information. Therefore, the editor of the Journal knows that he can send out a weekly sheet as well worthy of patronage as any other now before the public. He respect-fully solicits from a liberal and enlightened community, that increase of patronage which ho believe his work deserves.

JOHN W. YARBOROUGH.

Hamburg, Feb. 15

GEO. POPE, c. c. p. Clerh's Office, Dec. 15, 1841 C. age 47 ALUM SPRING PILLS.

ppetite, and promoting digestion; they are alternative, exciting the secretions of the glandular system generally, and particular of the liver and kidneys; they are cathartic, producing copious, dack, bilious evacuations; and they also effect a determination to the surface, increasing the perspiration. From the combination of all these effects upon the system, they are a great purifier of the blood, and equalizer of the circulation. The effect of the Pills, made from these waters, are in all respects, similar to the water itself, and each pill is equal to a common glass of water. For the cure of the above diseases, and all other chronic (or slow) diseases, preseverance in the use of these Pills, according to the directions given in the small bills, accompanying the pills, is all important; and if they are perveringly used as directed, a cure may be more certainly expected, than under any other treatment heretofore discovered, except from the use of the water, from which, they are prepared either by an attendance at the Springs or otherwise. They very

for all bemorrhages; and as the Pills have the same effect in other cases, it is believed they will also have the same effect in cases of hemorrhage. They cure dropsies in some cases but are not an infalible remedy in all cases of this disease. From the efficacy of these waters and

acidity of the stomach, and what is com-

may be taken at any time, when the stom

ach is troubled with acidity, with the hap-

piest effect. These Pills have an excel

ent effect to preventing the attacks of

pills in purifying the blood, they are invaluable in the cure of all diseases of the skin, and all indolent sores, not disposed to a bealthy action. In the use of them for such diseases, if the disease of the skin appears to be rietated at first, or if the ulcers necome more inflamed and discharge more freely, let not this circumstance alarm any one, or deter him from persevering in their use. These are evidences of the good effects of the Pills in expelling the vitiated humors from the blood to the surface, and until the blood is purified, such disease cannot be cured. In scrofulous ulcers, the use of these waters and pills, invariably cause them to discharge more freely, and in a short time, of a more healthy appearince. They are a very useful remedy in Cholera Infantum or the summer bowel complaint in children; as also for expelling worms from children. They immediately give a good appetite, promote digestion. and will effectually correct and cure acidity of the stomach. From their cleansing and purifying effects upon the blood; and from the tone, vigour and energy which their operation imparts to the whole 'system they will be found a great preventative of the fevers, which prevail in low and urhealthy regions; hence, persons living in such regions, will find it greatly to their advantage to use the pills, for a fortnight, at the commencement of every spring and fall season, as a preventative, and to build up constitutions broken down by previous attacks of fever.

These Pills are a valuable assistant to the use and efficacy of sulphurous and saline mineral waters, and three or four of them taken each day, at different times, which in attendance at other mineral springs, would add greatly to the curative effects of these waters.

These waters and pills are worthy of the notice of the Medical Faculty; and in their hands would be a valuable article in the treatment of many diseases, otherwise unmanagable. In amenorrhea, dysmenorrhea and luchorrhea, the waters of the Alum Springs are peculiarly effecacious; and we believe the pills made from these waters, would have the same effect in the treatment of those diseases. that the water has: therefore, we would recommend a trial of them, by the Faculty, in those diseases. These Pills are easily taken, naving no nauseous taste, are perfectly safe in all cases where active fever does not exist a d do not sicken persons while using them.

Just received and for sale by J. D. TIBBETS, at the Edgefield Shoe Store. tf 15 may 11, 1842

MOFFATT'S VEGETABLE LIFE PILLS AND PHŒNIX BITTERS.

ORIGIN OF THE LIFE MEDICINES. HE reader may not perhaps be aware that the origin of Moffat's Life Medicines was the result of a protracted and painful illness of their originater, Mr John Moffat When taken ill. Mr. M. was a prosperous and flour-ishing merchant to the lower part of the city of New York; and having consulted and employed a number of our most skilful physicians, he, after months of suffering, was prevailed upon to purchase the recipe of the invaluable vege-

table preparation now offered to the public. The effect of the Life Medicines in his own case was so sugular and remarkable, that he immediately determined to offer to the world a nedicine to which he not only owed his life, but his happiness. The uniform success which has since attended their administration in every instance, where a fair trial has been given tity of the Life Medicines in the house, as a rem-them has been attested by thousands, and incontestibly proves their intrinsic merit.

THE LIFE MEDICINES-GENERAL REMARES. to their manifest and sensible action in purifying the springs and channels of life, and endning them with renewed tone and vigor, and to the undoubted fact that at a very early period in their history they had rescued sufferers from the very verge of an untimely grave, after all the deceptive nostrums of the day, prescribed by physicians, had utterly failed, in which exses they also permanently secured that uniform enjoyment of health, without which life itself is but a partial blessing. So great indeed had their efficacy invariably proved, that it was scarcely less than miraculous to these who were unacquainted with the beautifully philosophical principles upon which they were compounded, and upon which they consequently act,

THE PHENIX BITTERS are so called, because they power the power of restoring the appring unders Cheath, to a glowing regar ALUEI SPRING PILLS,

FOR THE CURE OF

Dyspepsia, Serofulous and Chronic Liver

Diseases

THESE Pills are prepared by Dr. S.

R. Campbell, from the water of the highly celebrated Mineral Springs, in Rockbridge county Va., called the Alum Springs, These waters in their effects upon the system are tonic, increasing the appetite, and proposing digestion; they are sickness incident to young females; and will be found a certain remedy in all cases of serrous debility and seakness of the most impaired constitutions. As a remedy for Chronic and Inflammatory Rheumatism, the efficacy of the Phonex Bitters will be demonstrated by the use of a single bottle.

The proprietor rejoices in the opportunity af-forded by the diffusion of the press, for placing his VEGETABLE LIFE MEDICINES within the knowledge and reach of every individual in the community. Unlike the host of pernigredients, the Life Pills are purely and solely vegetable, and contain neither Mercury, Antimony, Arsenic, nor any other mineral, in any form whatever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several Indian tribes, and recently to some eminent pharmacentical chemists, are altogether un-known to the ignorant pretender to medical science; and were never before administered

in so happily efficacious a combination.

The first operation is to loosen from the coats of the stomach and bowels, the various impurities and crudities constantly settling around them; and to canove the hardened faces which speedily cure diarrhous attended with collect in the convolutions of the small intestines. Other medicines only partially cleanse these; monly called heart-burnt two or three pills and leave such collected masses behind as to produce habitual costiveness, with all its train of evils, or sudden diarrhæn, with its imminent dangers. The fact is well known to all regular anatomists, who examine the human bowels after neath; and hence the prejudice of these nervous or sick-headache; from three to six pills should be taken at once, when the symptoms are felt.

These waters are an effectual remedy after death; and nence the prejudice of the agent, and nence the prejudice of the agent informed men against the quack medicines of the age. The second effect of the VEGE-TABLE LIFF. PILLS is to cleanse the kid news and the bladder, and by this means the liver and the lungs, the healthful action of which entirely depends upon the regularity of the urinary organs. The blood, which takes its red color from the agency of the liver and the lungs before it passes into the heart, being thus purified by them, and nourished by food coming from a clean stomach, courses freely through the veins, renews every part of the system, and triumphantly mounts the bunner of health in the blooming cheek.

The following are among the distressing variety of hawan diseases, to which the Vegeta ble Life Pills are well known to be infallible:

DYSPEPSIA, by thoroughly cleansing the first and second stomachs, and creating a flow of pure healthy bile, instead of the stale and acrid kind:—Flatulency. Palpitation of the Heart. Loss of Appetite, Heart-burn and Head achs, Restlessness. Ill-temper, Auxiety, Langour and Melancholy, which are the general symp-toms of Dyspepsia, will vanish, as a natural consequence of its cure. Costiceness, by cleansing the whole length of the intestines with a solvent process, and without violence: all violent purges leaves the bowels costive within two days. Diarrhea and Cholera, by removing the sharp acrid fluids by which these complaints are occasioned, and by promoting the lubrica-tive secretions of the mucous membrane. Frvers of all kinds, by restoring the blood to a regular circulation through the process of perspiration in some cases, and the thorough solu-The Life Medicines have been known to cure heamatism permanently in three weeks, and Gout in half the time, by removing local inflammation from the muscles and legaments of the joints. Dropsies of all kinds, by freeing and strengthening the kidneys and bladder; they operate most delightfully on those important organs, and hence have ever been found a certain remedy for the worst cases of Grazel. Also Worms, by dislodging from the turnings of the bowels the stimy matter in which these creatures adhere: Asthma and Consumption, by relieving the air vessels of the lungs from the muwhich even slight colds will occasion, which if not removed becomes hardened, and produces those dreadful diseases. Scurry, Ulcers. and Inveterate Sores, by the perfect purity which those Life Pills give to the blood, and all the lumors: Scorbutic Eruptions and Bad Complexions, by their alternative effect upon the fluids that feed the skip, the merbid state of which occasions all Eruptice complaints, Sal-low, Cloudy, and other disagreeable Complexions. The use of these Pills for a very short time, will effect an entire cure of Salt Rheum, Erysipelas, and a striking improvement in the Clearness of the Skin. Common Coids and Influenza, will always be cared by one dose, or by two, even in the worst cases. Piles,—as a remedy for this most distressing and obstinate malady, the Vegetable Life Pills deserve a distinct and emphatic recommendation. It is well known to hundreds in this city, that the originator of these valuable Pills was himself afflicted with this complaint for upwards of thirty-five years. and that he tried in vain every remedy prescribed within the whole compass of the Materi-Medica. He however, at length, tried the Medicine which he now offers to the public, and he was cured in a very short time, after his recovery had been pronounced not only improbable, but absolutely impossible, by any human

All that Mr. Moffat requires of his patients s to be particular in taking the Life Medicines strictly according to the directions. It is not by a newspaper notice, or by any thing that he hipself may say in their favor, that hopes to gain credit. It is alone by the results of a fair triat

Advice to Females .- Females who value good health should never be without the Life Medicines as they purify the blood, remove Obstructions, and give the skin a beautiful, clear, healthy, and blooming appearance, To Parents and others .- Persons of a pletho-

rie habit, who are subject to his, headache, giddiness, dimness of sight, or drowsiness, from too great a flow of blood to the head, should take it frequently. Children, and persons of all ages, may take them at any time, as they do not contain mercury, or any ingredient that re-

To Elderly Persons .- Many healthy aged individuals, who know the value of Moffat's Life Medicines, make it a rule to take them two or three times a week, by which they remove the causes that produce disease, preserve their health, and keep off the infirmities of age.

Heads of Families should always keep a quanprompt administration, Cholera Morbus, Gout The Life Medicines are indebted for their name of their manifest and sensible action in purifying the springs and channels of life, and enduing the springs and channels. attaining seven years of age, and the fruitlet source of this mariably is found to exist in that foul state of the source and bowels which produces the sensition of W. foul state of the stomach and bowels which produces the generation of Worms. As the safe restorer of infantine Health, in this critical state, the Life Medicines have long held a distinguished reputation; and for foulness of the stomach and bowels, and convulsions, although Worms may not exist, it is allowed to be superior to any other.
